

# ALB-Control H

Individual measurements shown in green, mean of day in poppy triangles. Grey line shows global mean, with dashed lines as +/- 2SD. Points outside of +/- 2.5SD are labeled for investigation. Day refers to the date in Apr.

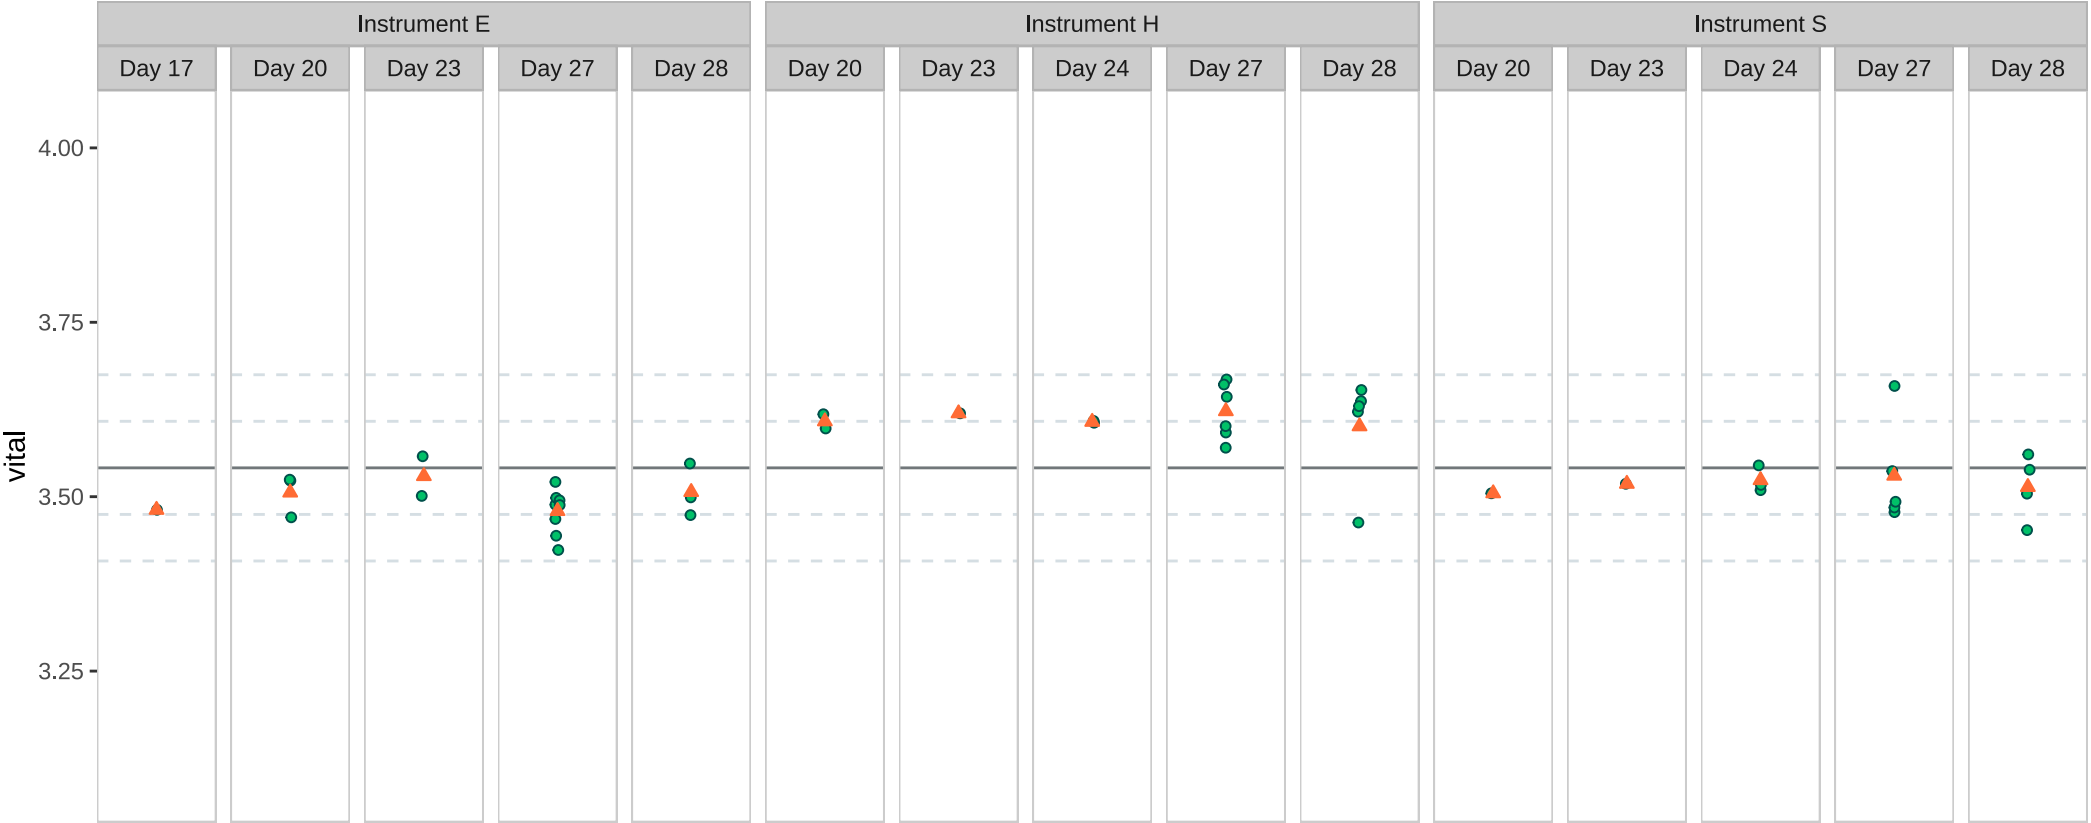

# ALB-Control L

Individual measurements shown in green, mean of day in poppy triangles. Grey line shows global mean, with dashed lines as +/- 2SD. Points outside of +/- 2.5SD are labeled for investigation. Day refers to the date in Apr.

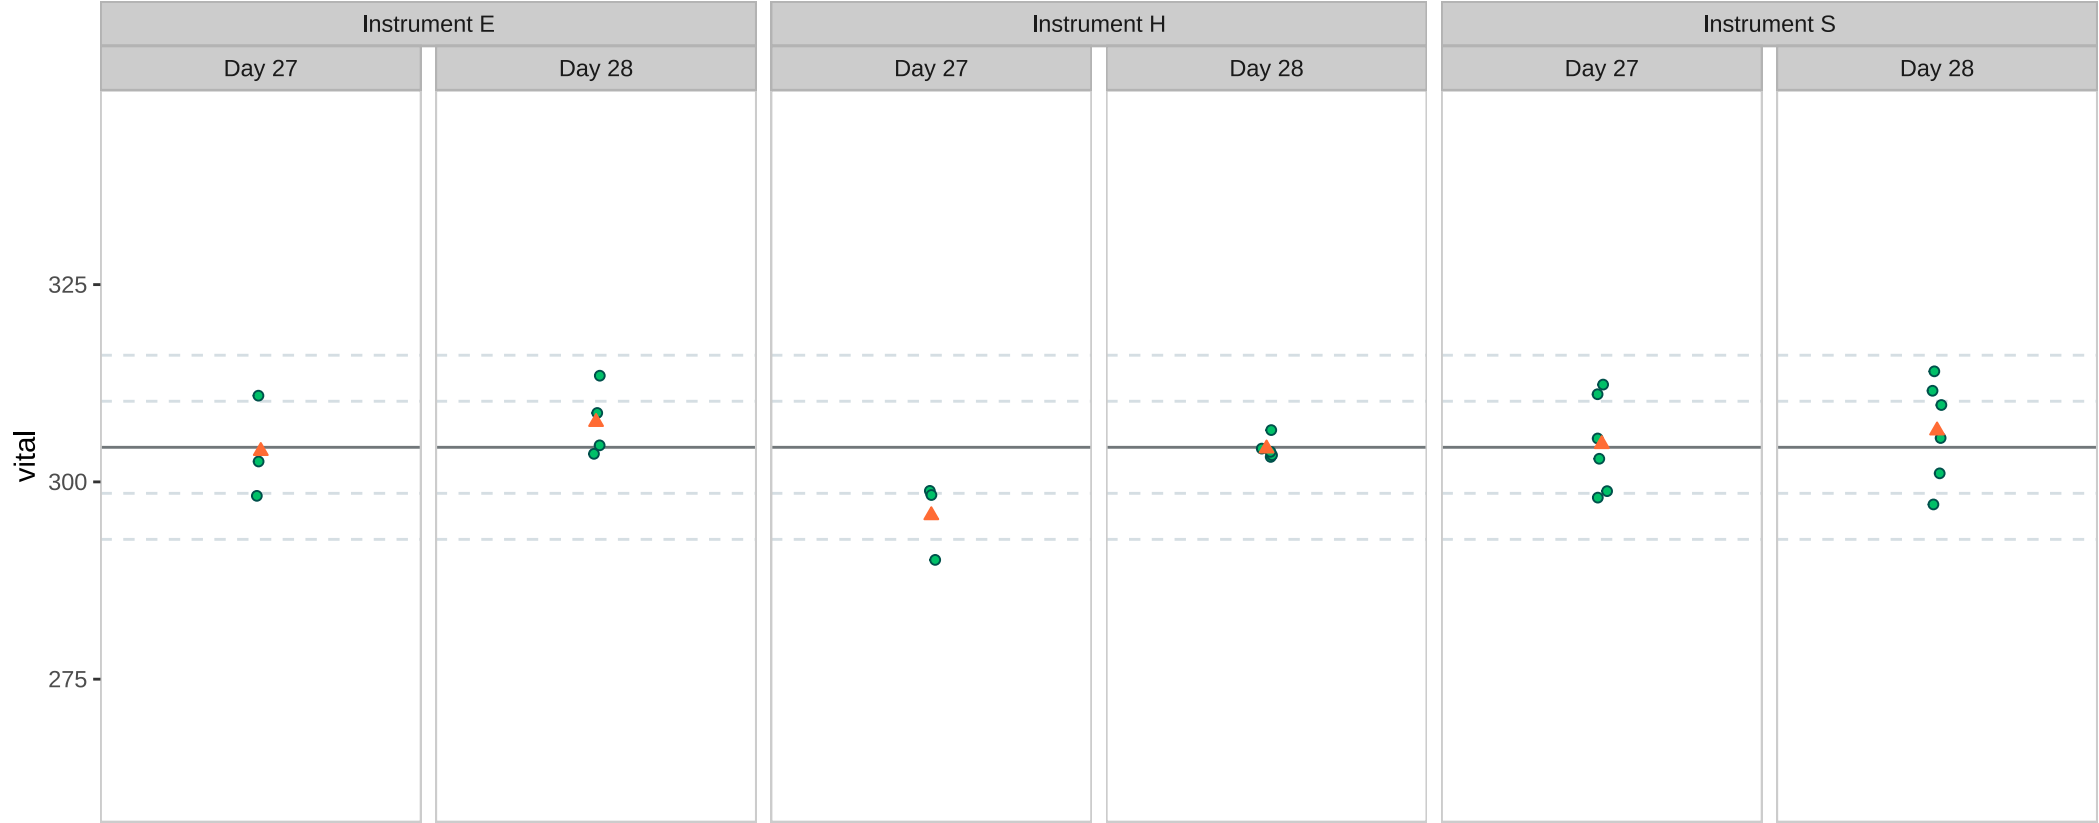

# ALB-Control M

Individual measurements shown in green, mean of day in poppy triangles. Grey line shows global mean, with dashed lines as +/- 2SD. Points outside of +/- 2.5SD are labeled for investigation. Day refers to the date in Apr.

# ALP-Control H

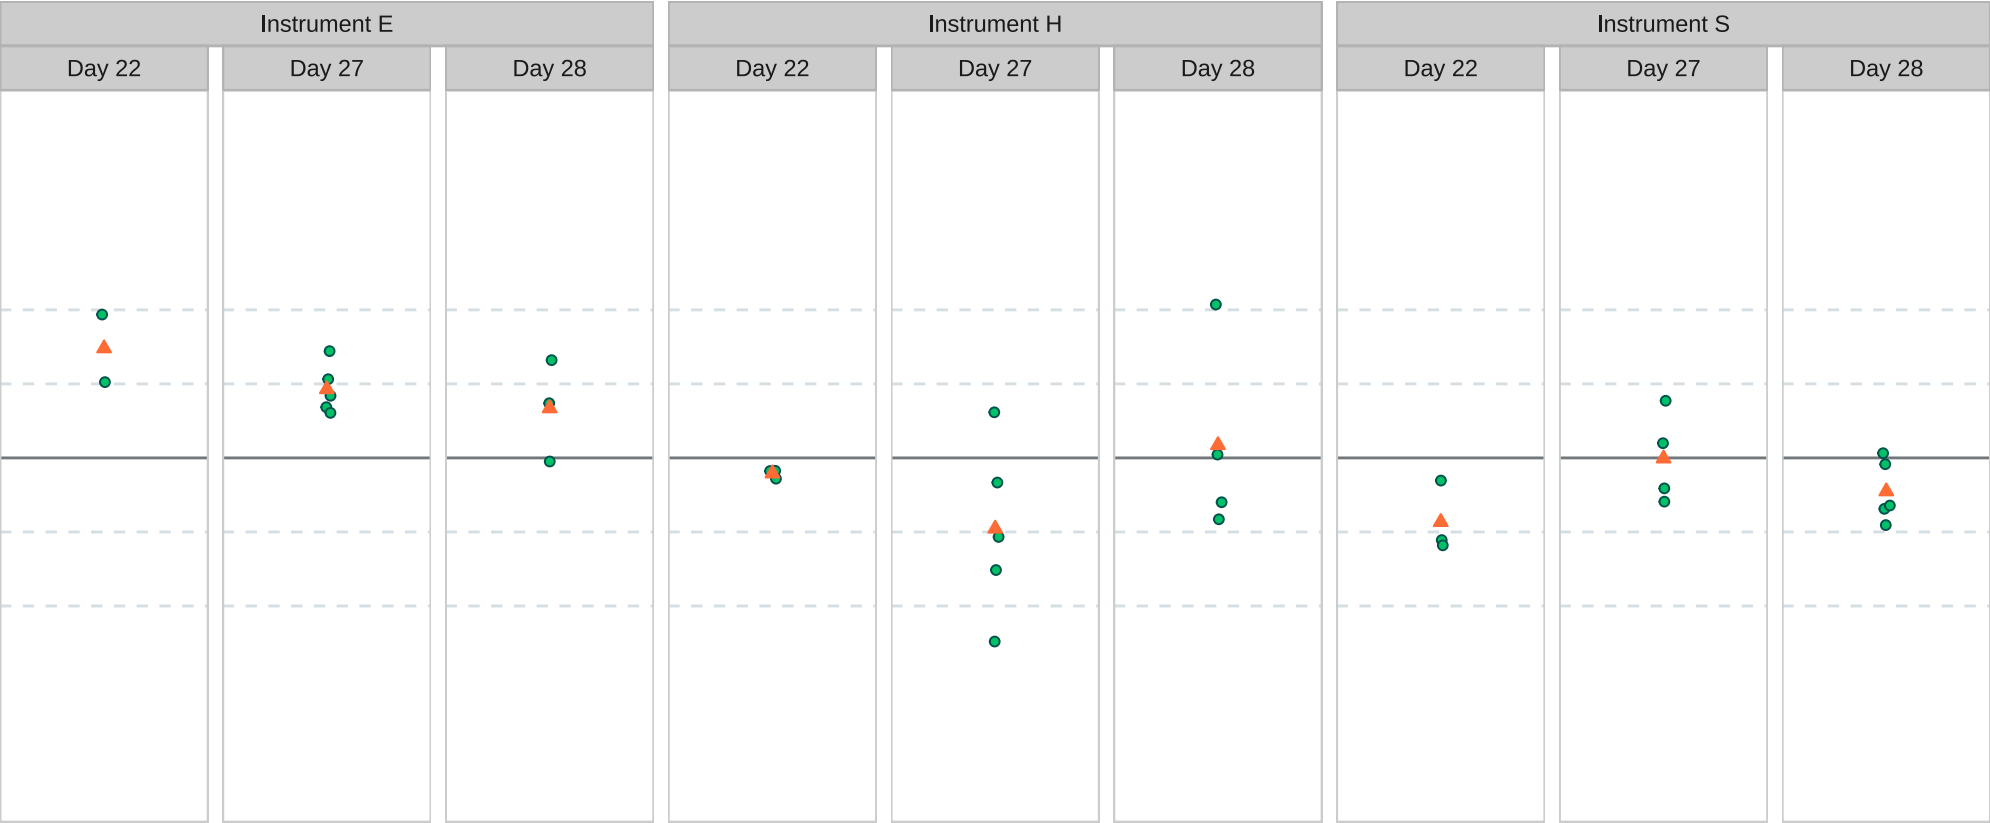

Individual measurements shown in green, mean of day in poppy triangles. Grey line shows global mean, with dashed lines as +/- 2SD. Points outside of +/- 2.5SD are labeled for investigation. Day refers to the date in Apr.

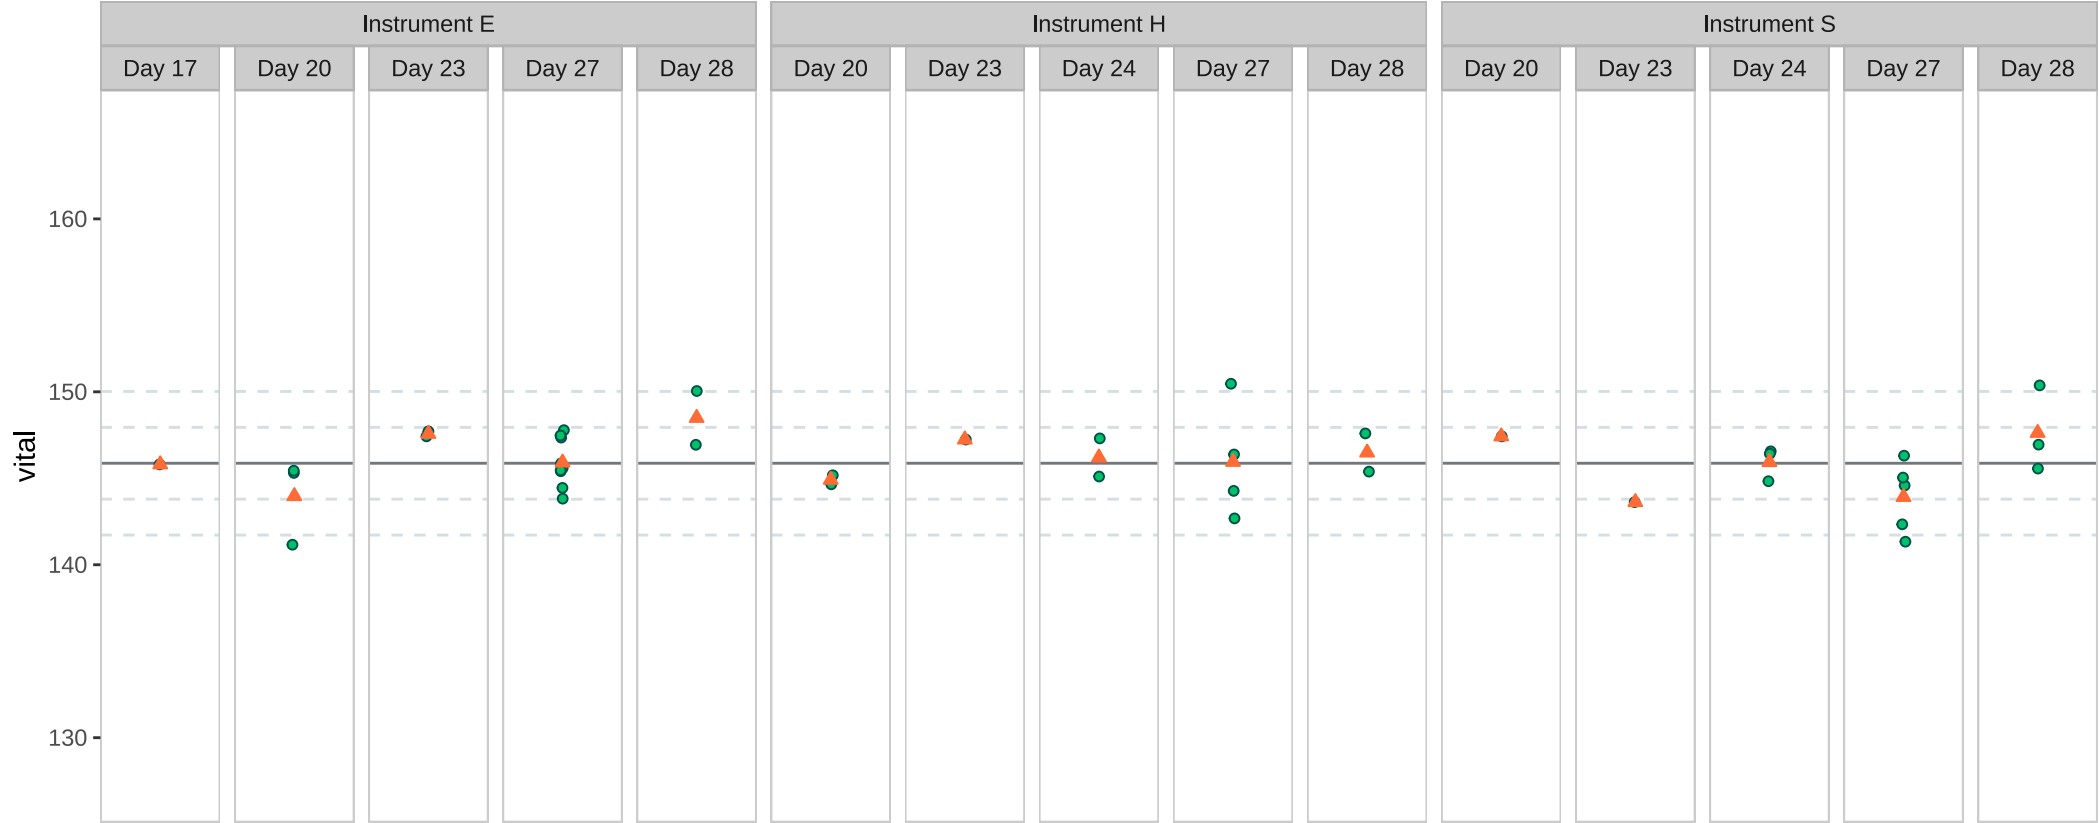

# ALP-Control L

Individual measurements shown in green, mean of day in poppy triangles. Grey line shows global mean, with dashed lines as +/- 2SD. Points outside of +/- 2.5SD are labeled for investigation. Day refers to the date in Apr.

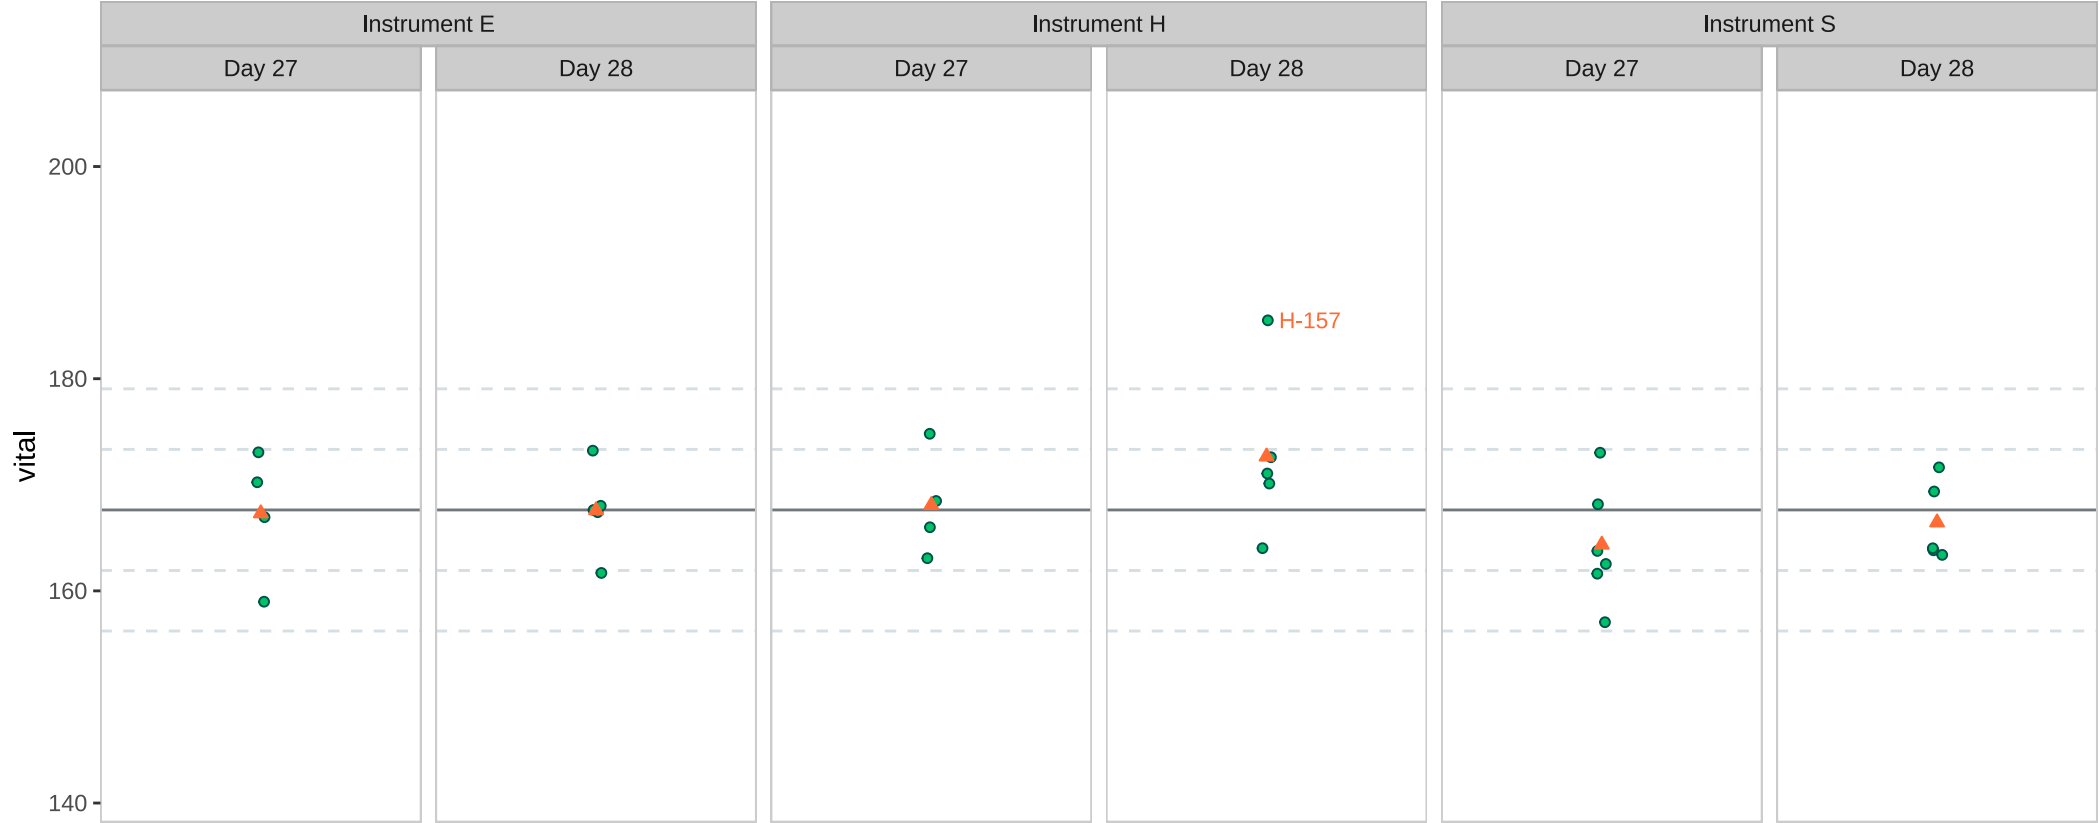

# ALP-Control M

Individual measurements shown in green, mean of day in poppy triangles. Grey line shows global mean, with dashed lines as +/- 2SD. Points outside of +/- 2.5SD are labeled for investigation. Day refers to the date in Apr.

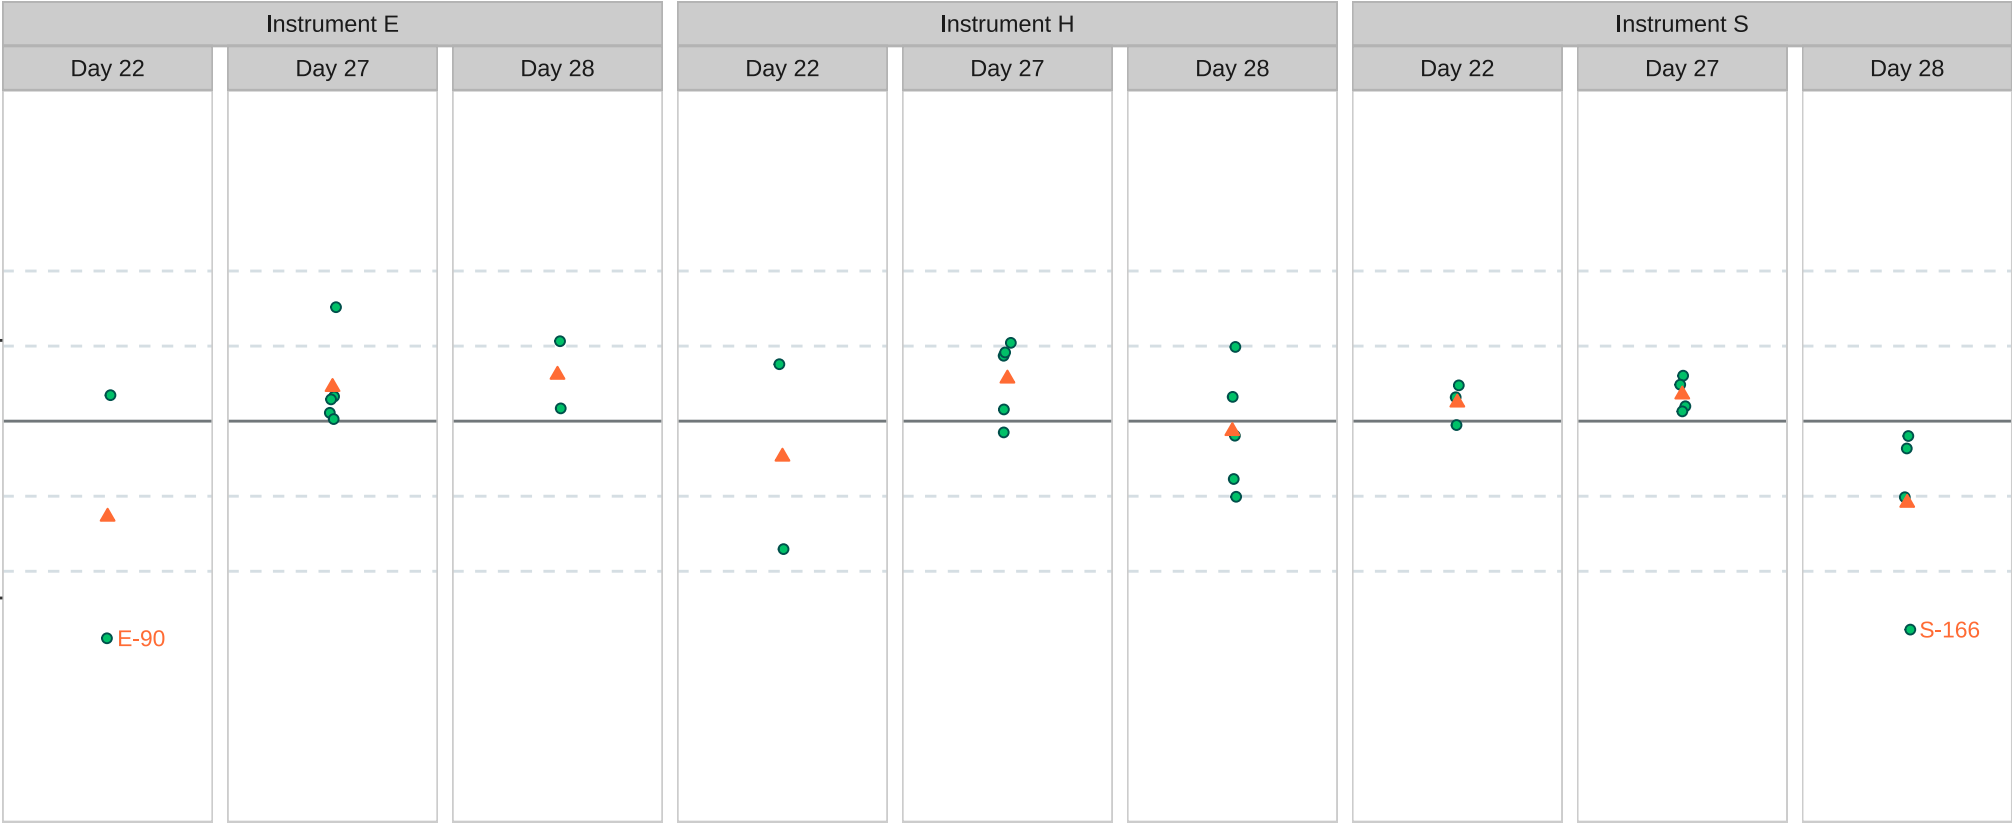

# ALT-Control H

Individual measurements shown in green, mean of day in poppy triangles. Grey line shows global mean, with dashed lines as +/- 2SD. Points outside of +/- 2.5SD are labeled for investigation. Day refers to the date in Apr.

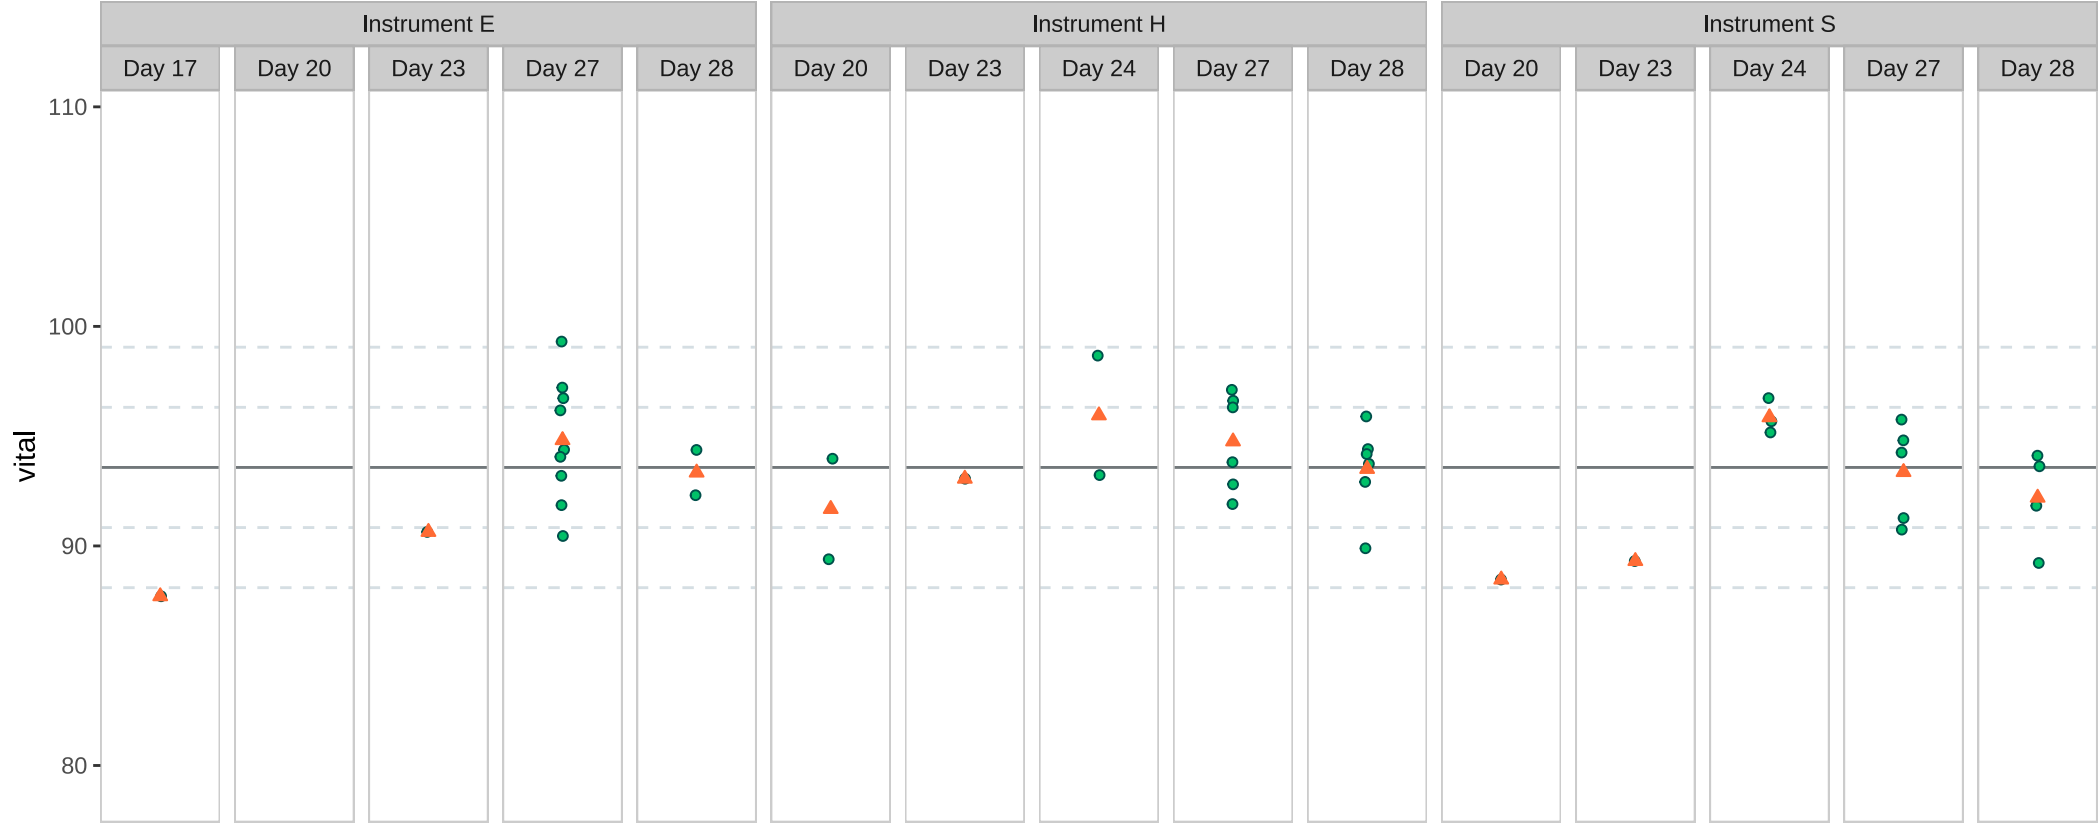

# ALT-Control L

Individual measurements shown in green, mean of day in poppy triangles. Grey line shows global mean, with dashed lines as +/- 2SD. Points outside of +/- 2.5SD are labeled for investigation. Day refers to the date in Apr.

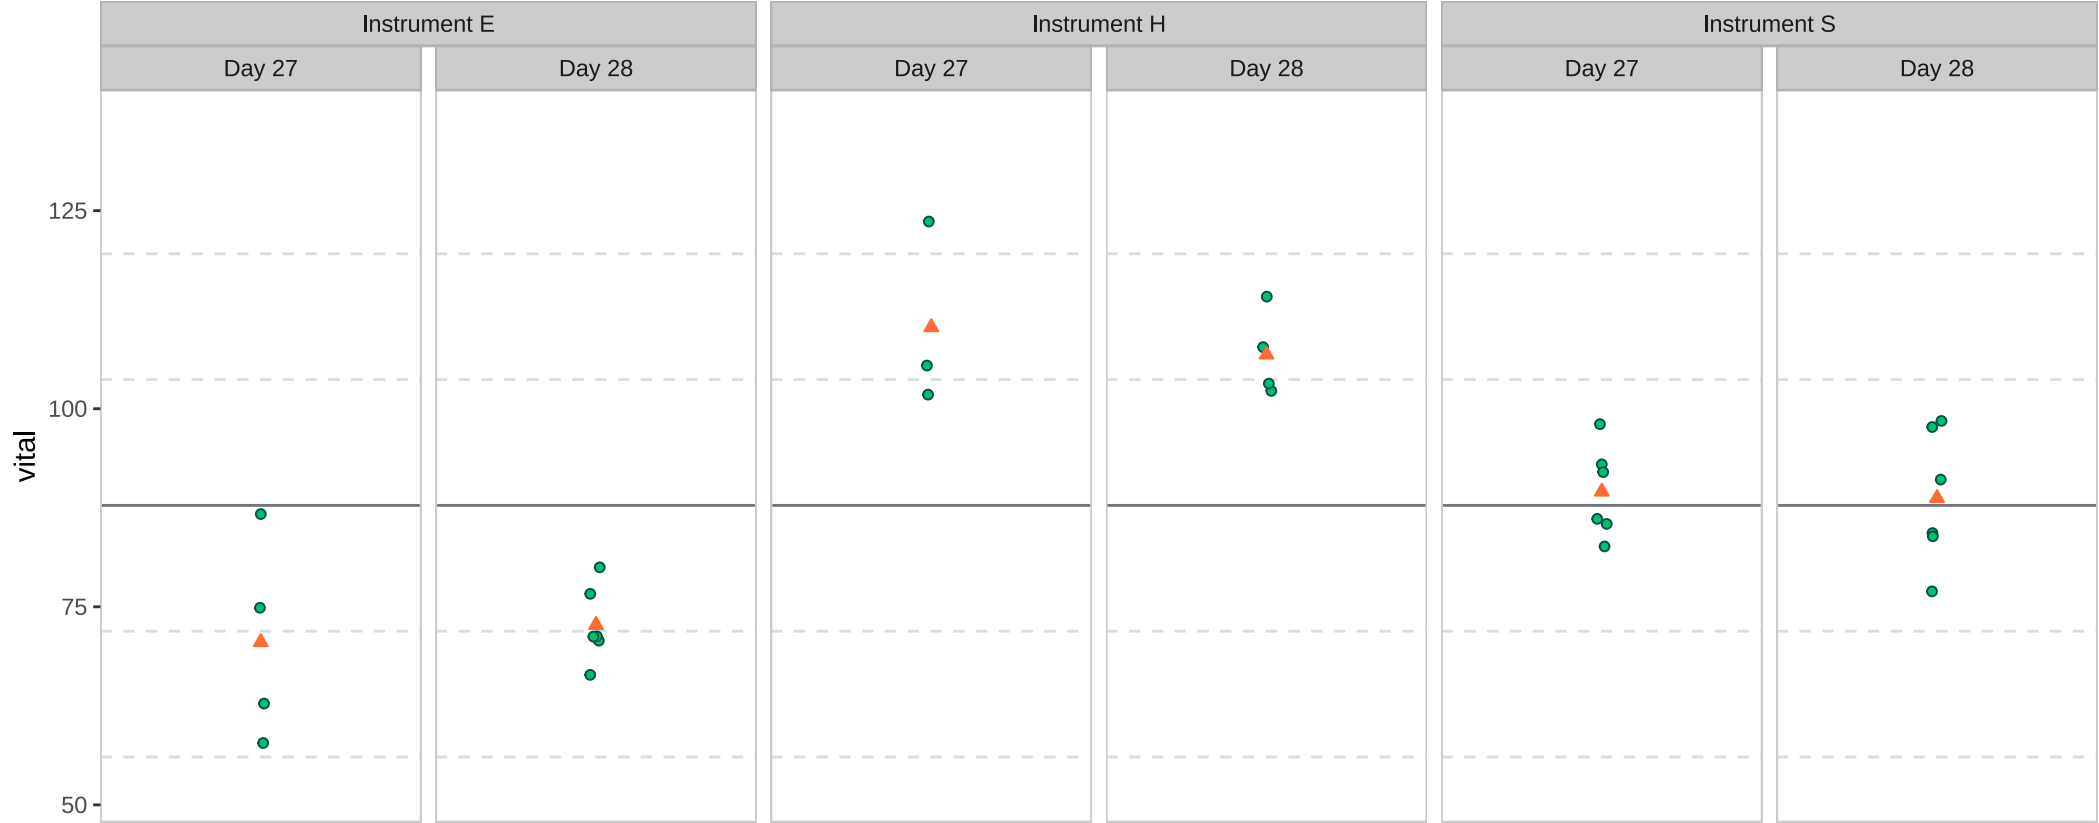

# ALT-Control M

Individual measurements shown in green, mean of day in poppy triangles. Grey line shows global mean, with dashed lines as  $\pm 2SD$ . Points outside of  $\pm 2.5SD$  are labeled for investigation. Day refers to the date in Apr.

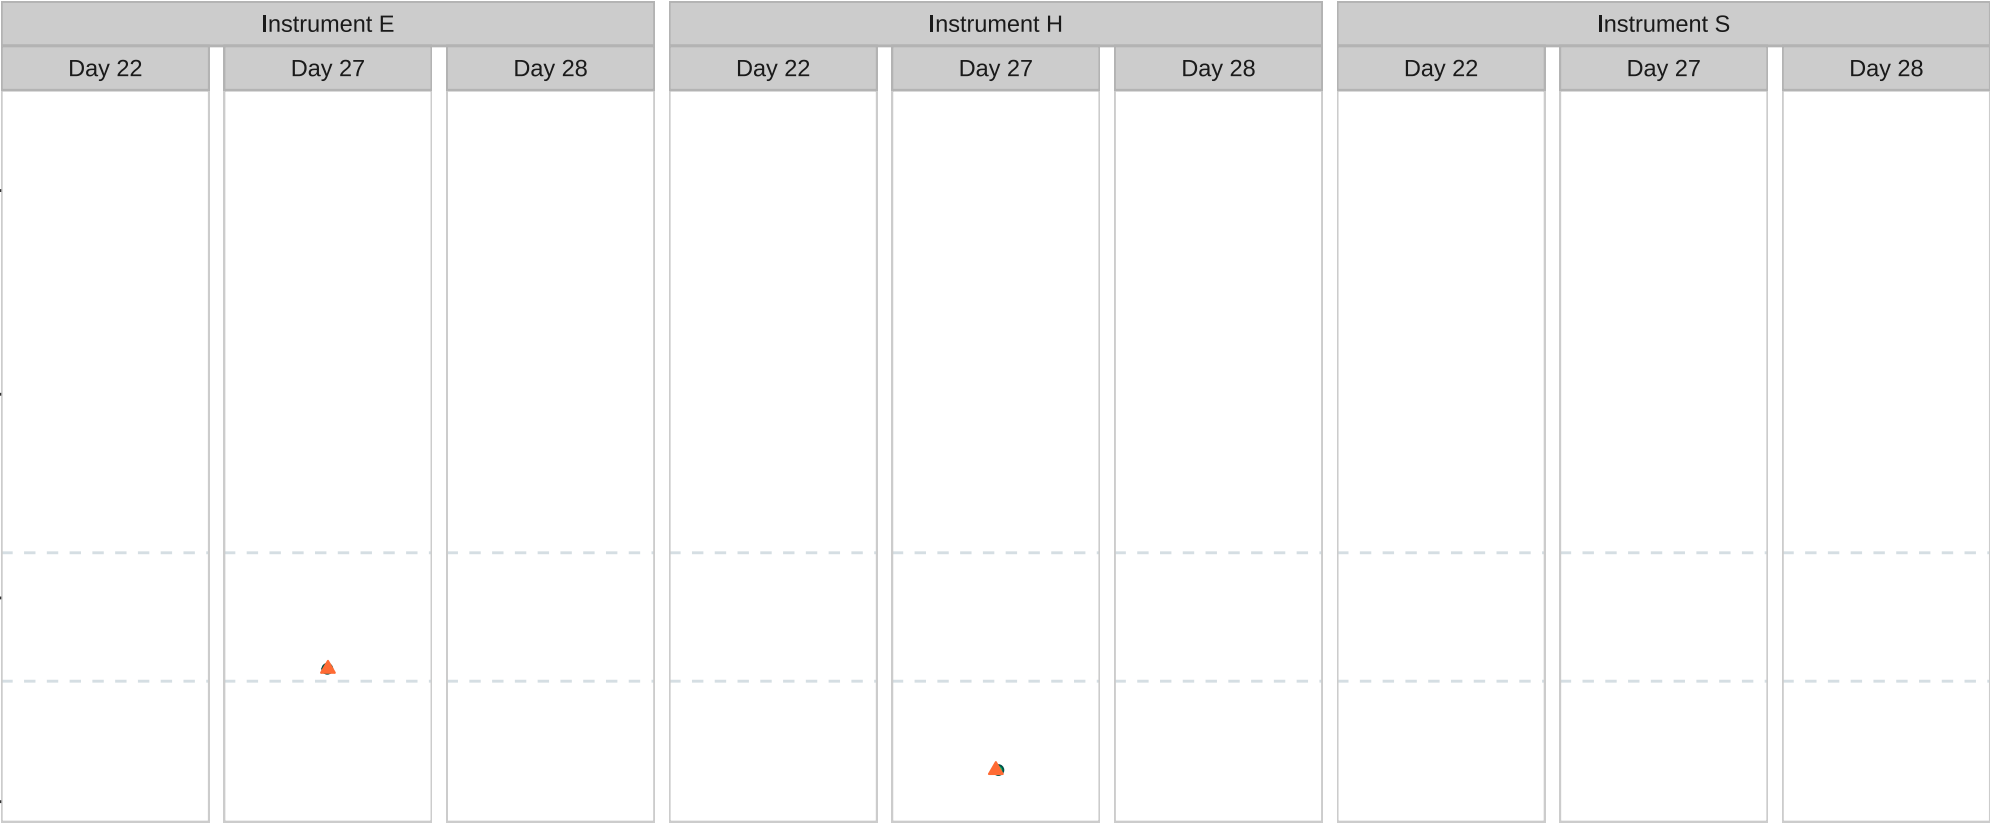

# AMY-Control H

Individual measurements shown in green, mean of day in poppy triangles. Grey line shows global mean, with dashed lines as +/- 2SD. Points outside of +/- 2.5SD are labeled for investigation. Day refers to the date in Apr.

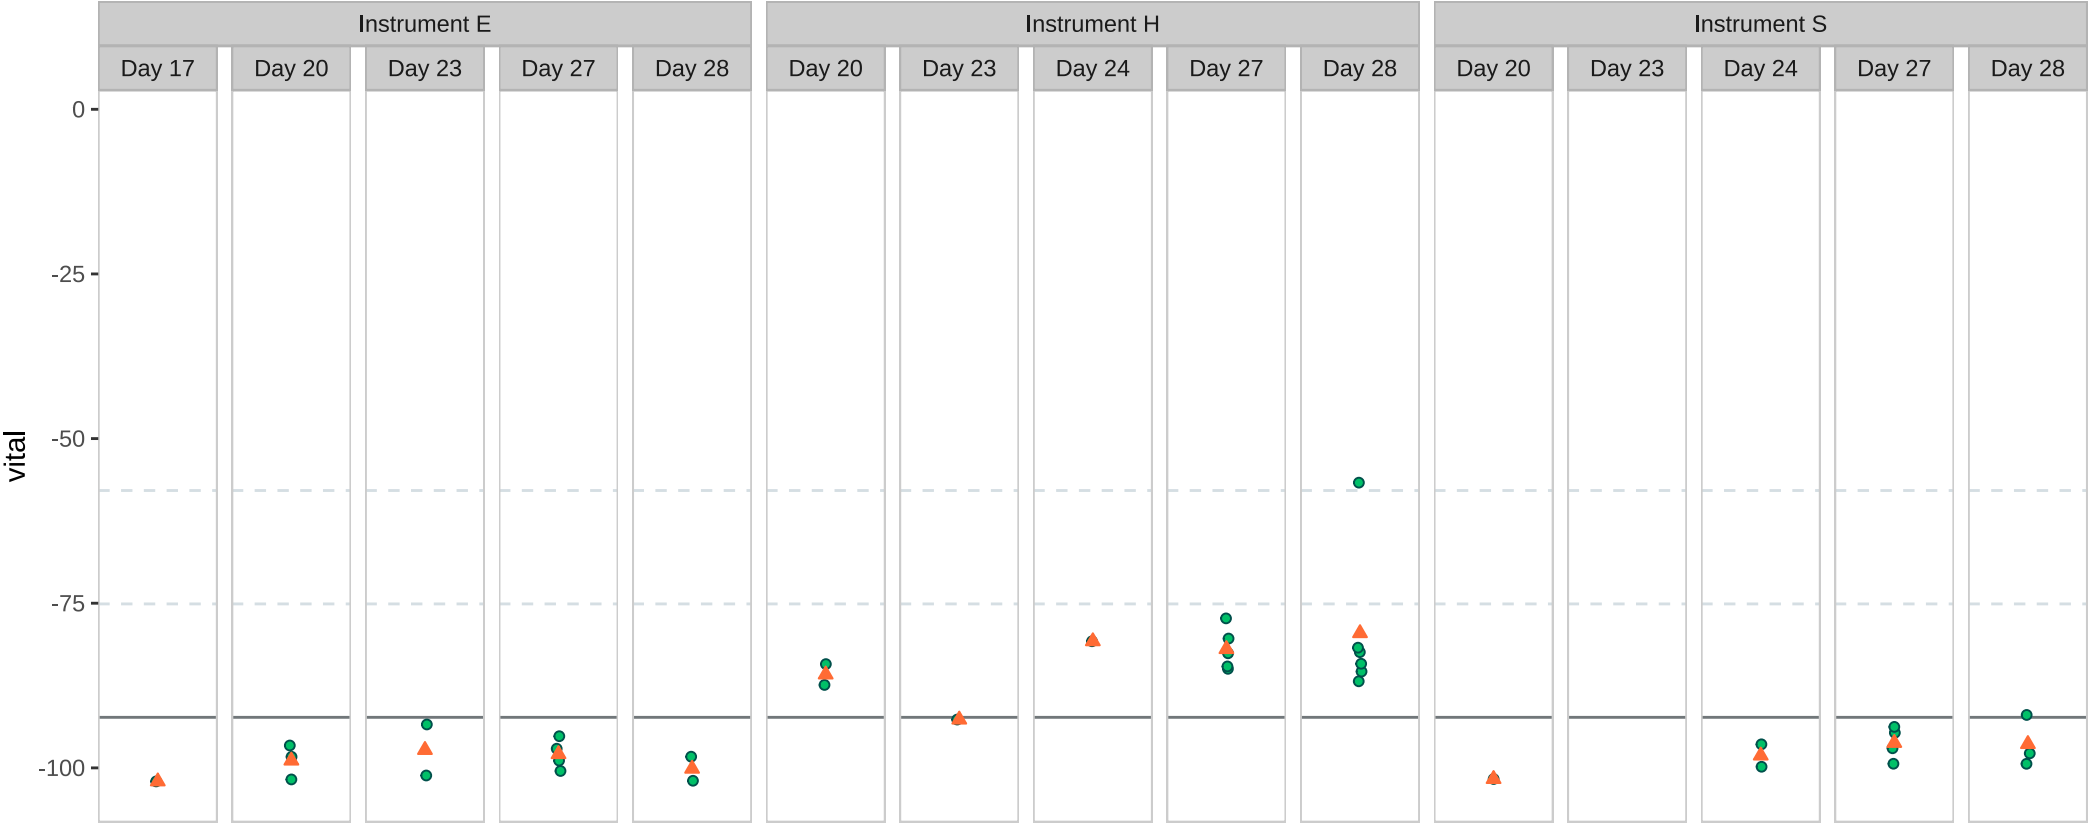

# AMY-Control L

Individual measurements shown in green, mean of day in poppy triangles. Grey line shows global mean, with dashed lines as +/- 2SD. Points outside of +/- 2.5SD are labeled for intvestigation. Day refers to the date in Apr.

# AMY-Control M

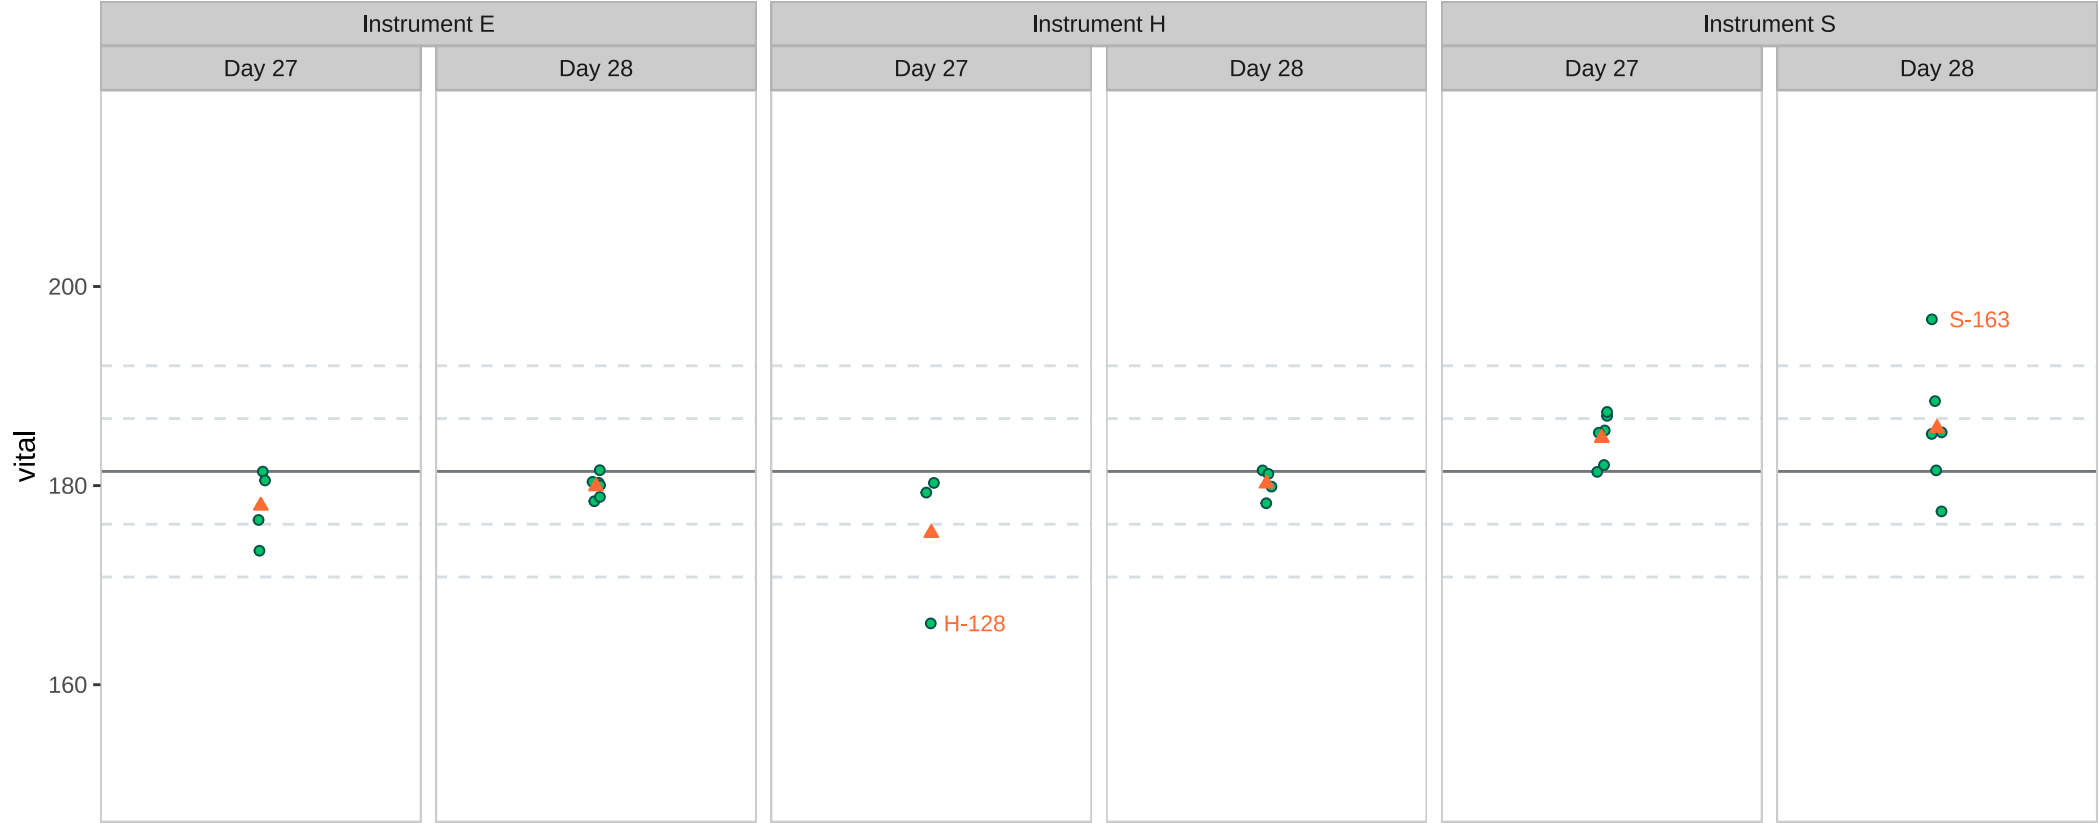

Individual measurements shown in green, mean of day in poppy triangles. Grey line shows global mean, with dashed lines as  $\pm 2SD$ . Points outside of  $\pm 2.5SD$  are labeled for investigation. Day refers to the date in Apr.

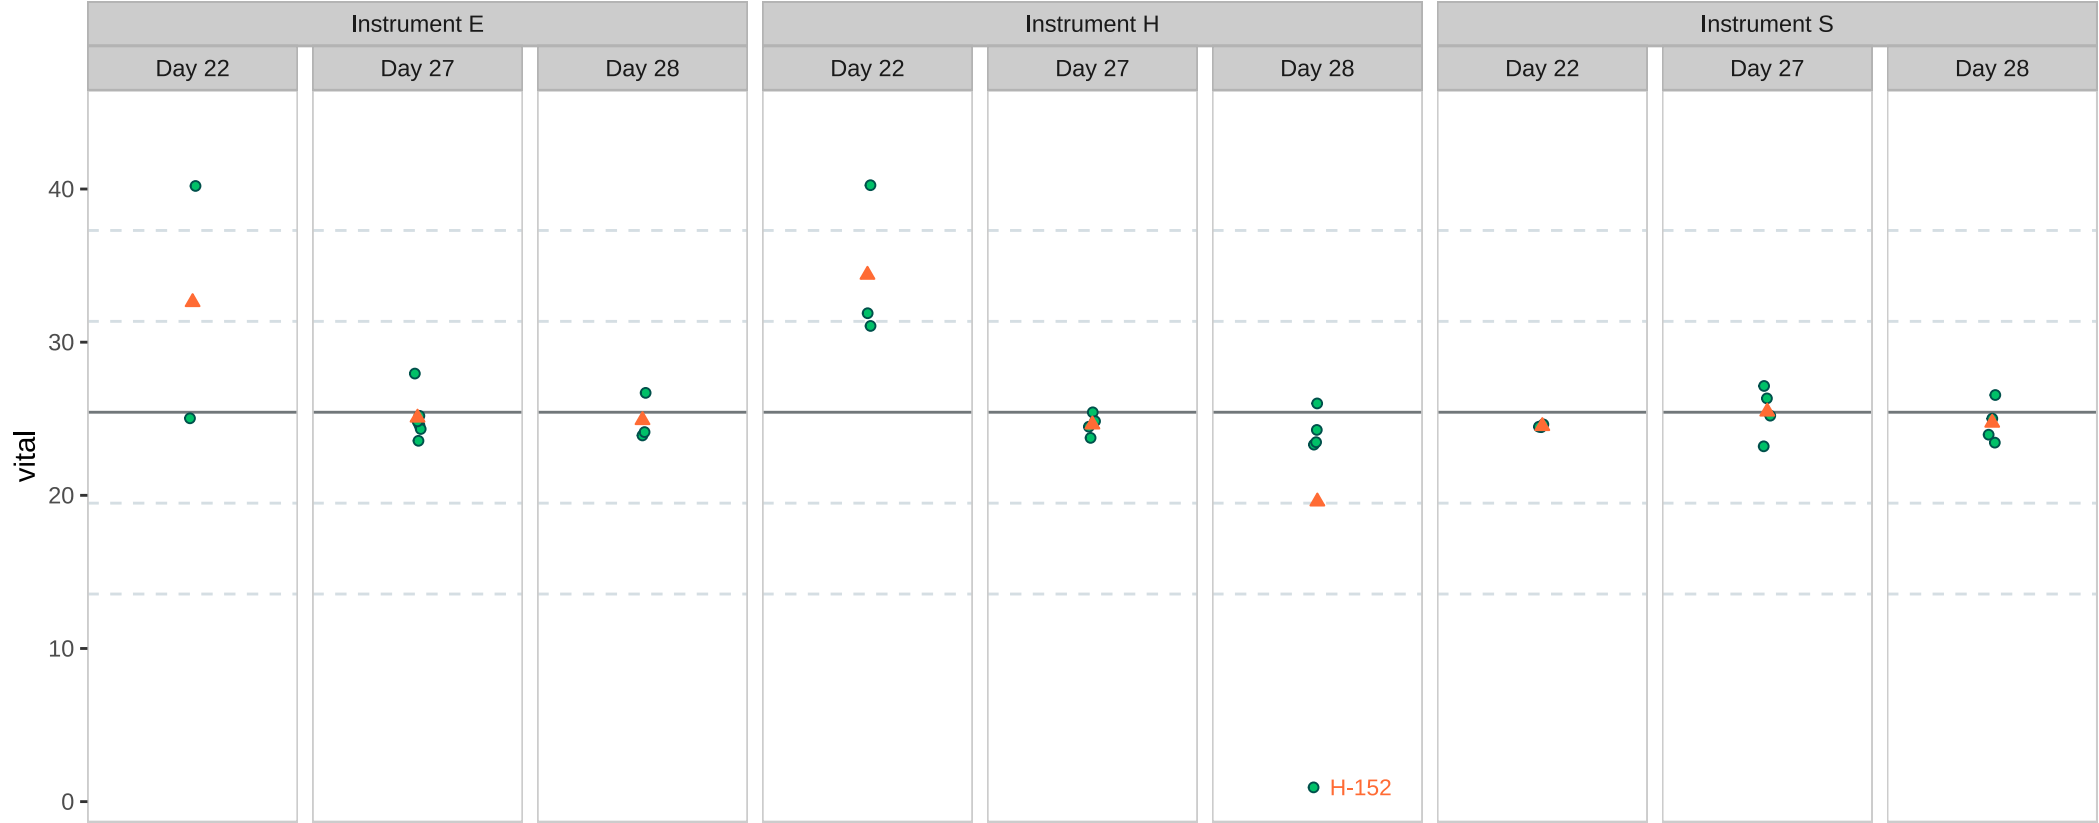

# AST-Control H

Individual measurements shown in green, mean of day in poppy triangles. Grey line shows global mean, with dashed lines as +/- 2SD. Points outside of +/- 2.5SD are labeled for investigation. Day refers to the date in Apr.

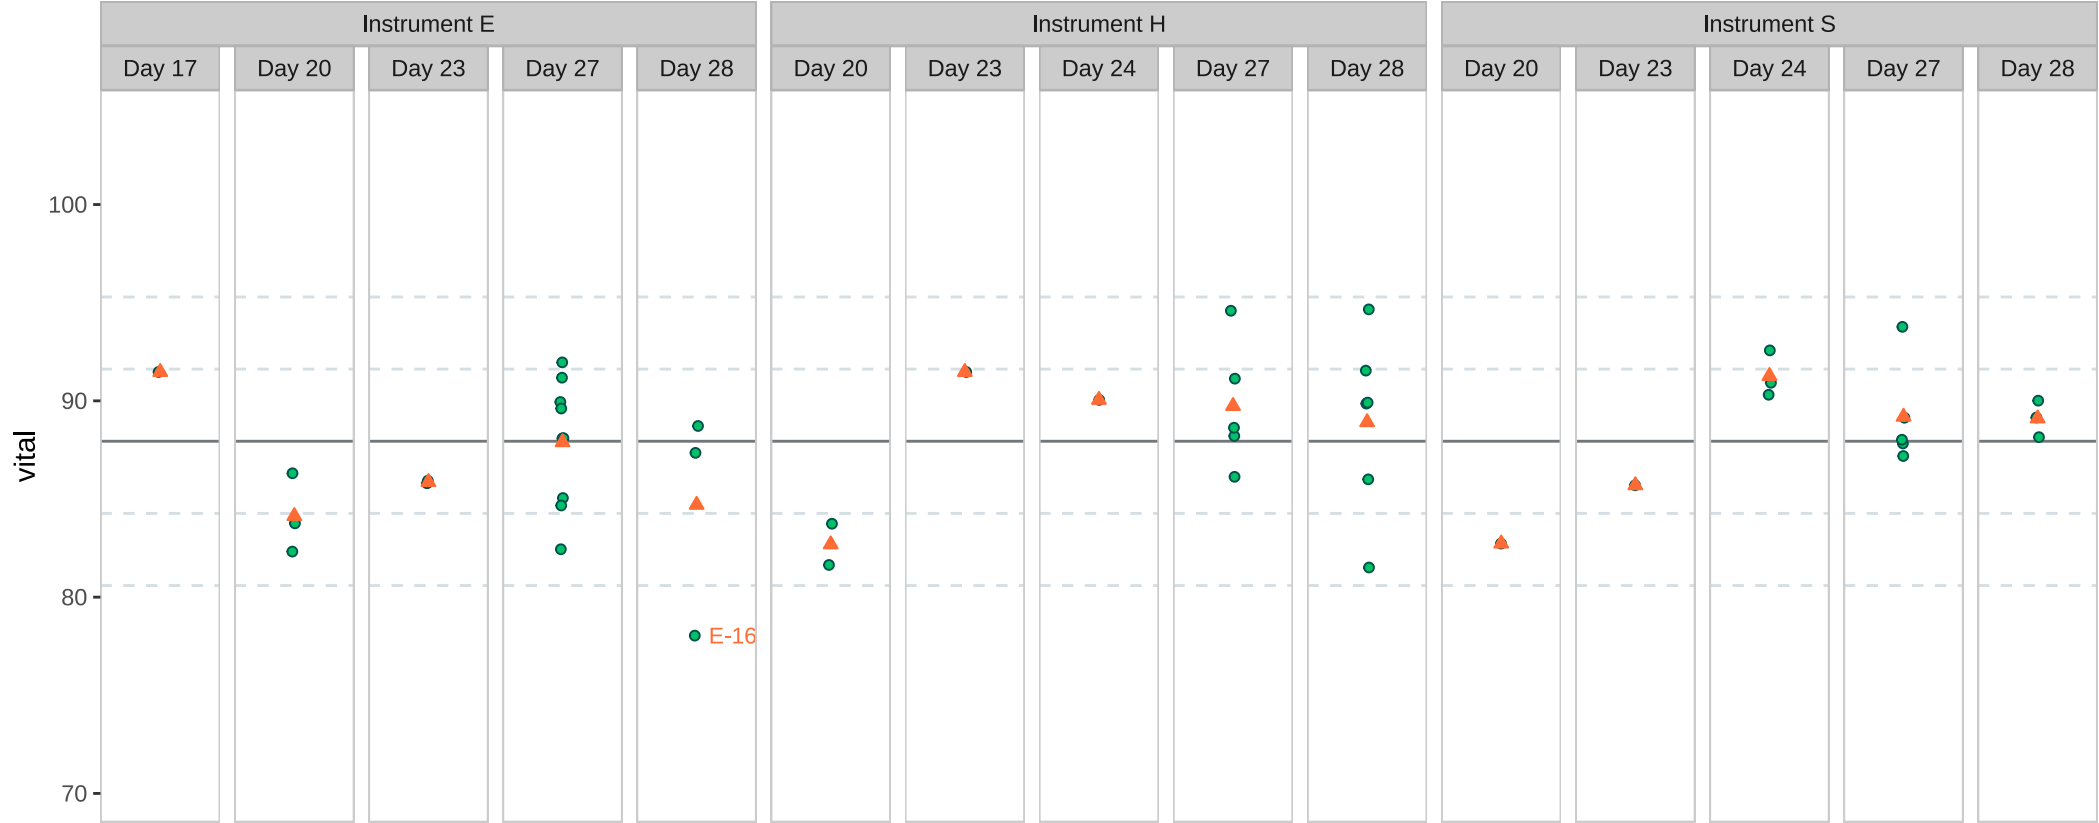

# AST-Control L

Individual measurements shown in green, mean of day in poppy triangles. Grey line shows global mean, with dashed lines as +/- 2SD. Points outside of +/- 2.5SD are labeled for investigation. Day refers to the date in Apr.

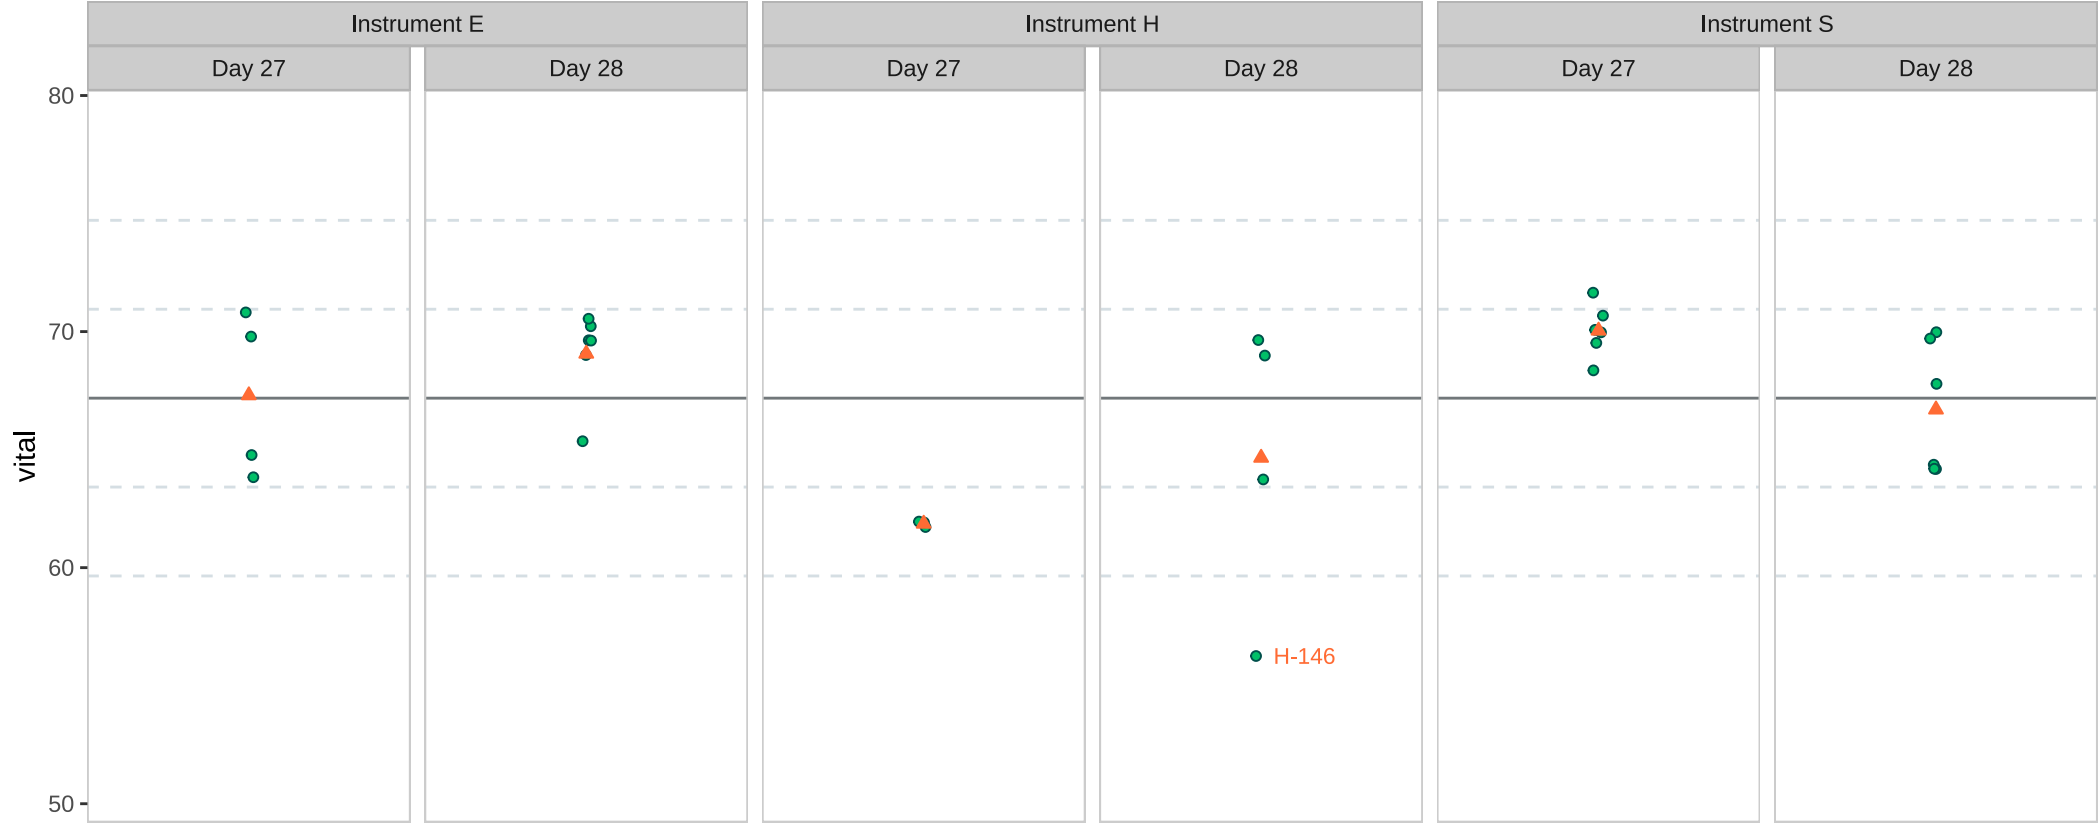

# AST-Control M

Individual measurements shown in green, mean of day in poppy triangles. Grey line shows global mean, with dashed lines as +/- 2SD. Points outside of +/- 2.5SD are labeled for investigation. Day refers to the date in Apr.

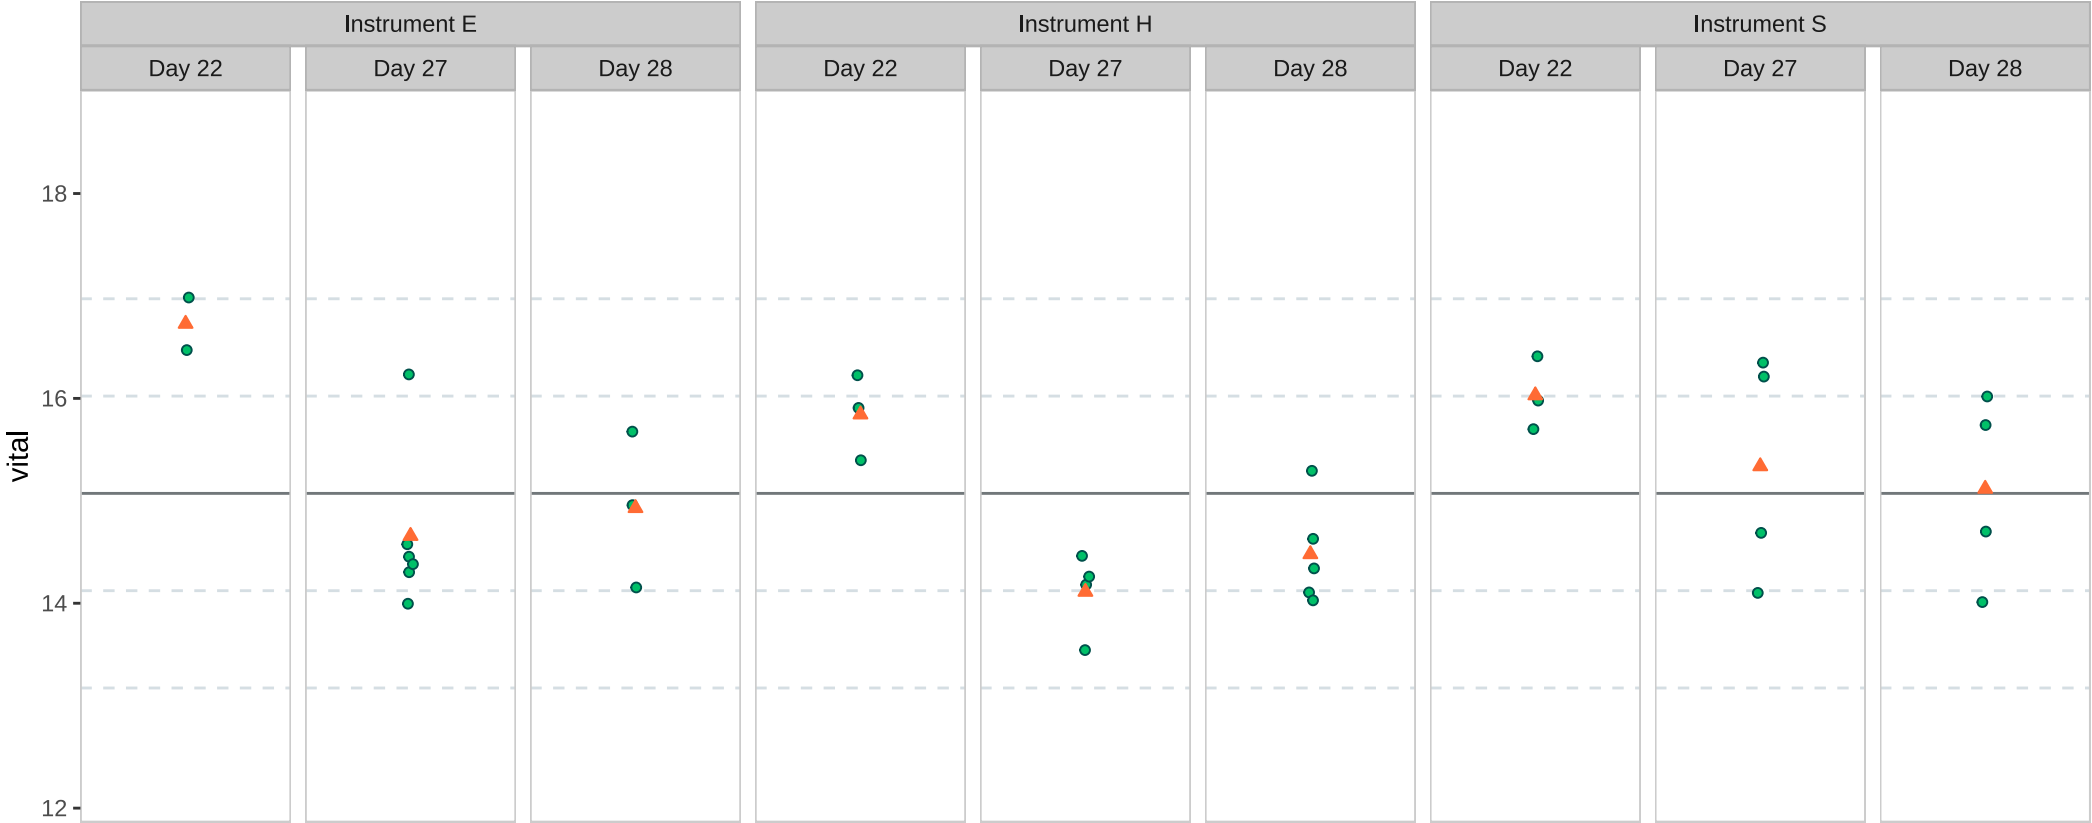

# BUN-Control H

Individual measurements shown in green, mean of day in poppy triangles. Grey line shows global mean, with dashed lines as +/- 2SD. Points outside of +/- 2.5SD are labeled for investigation. Day refers to the date in Apr.

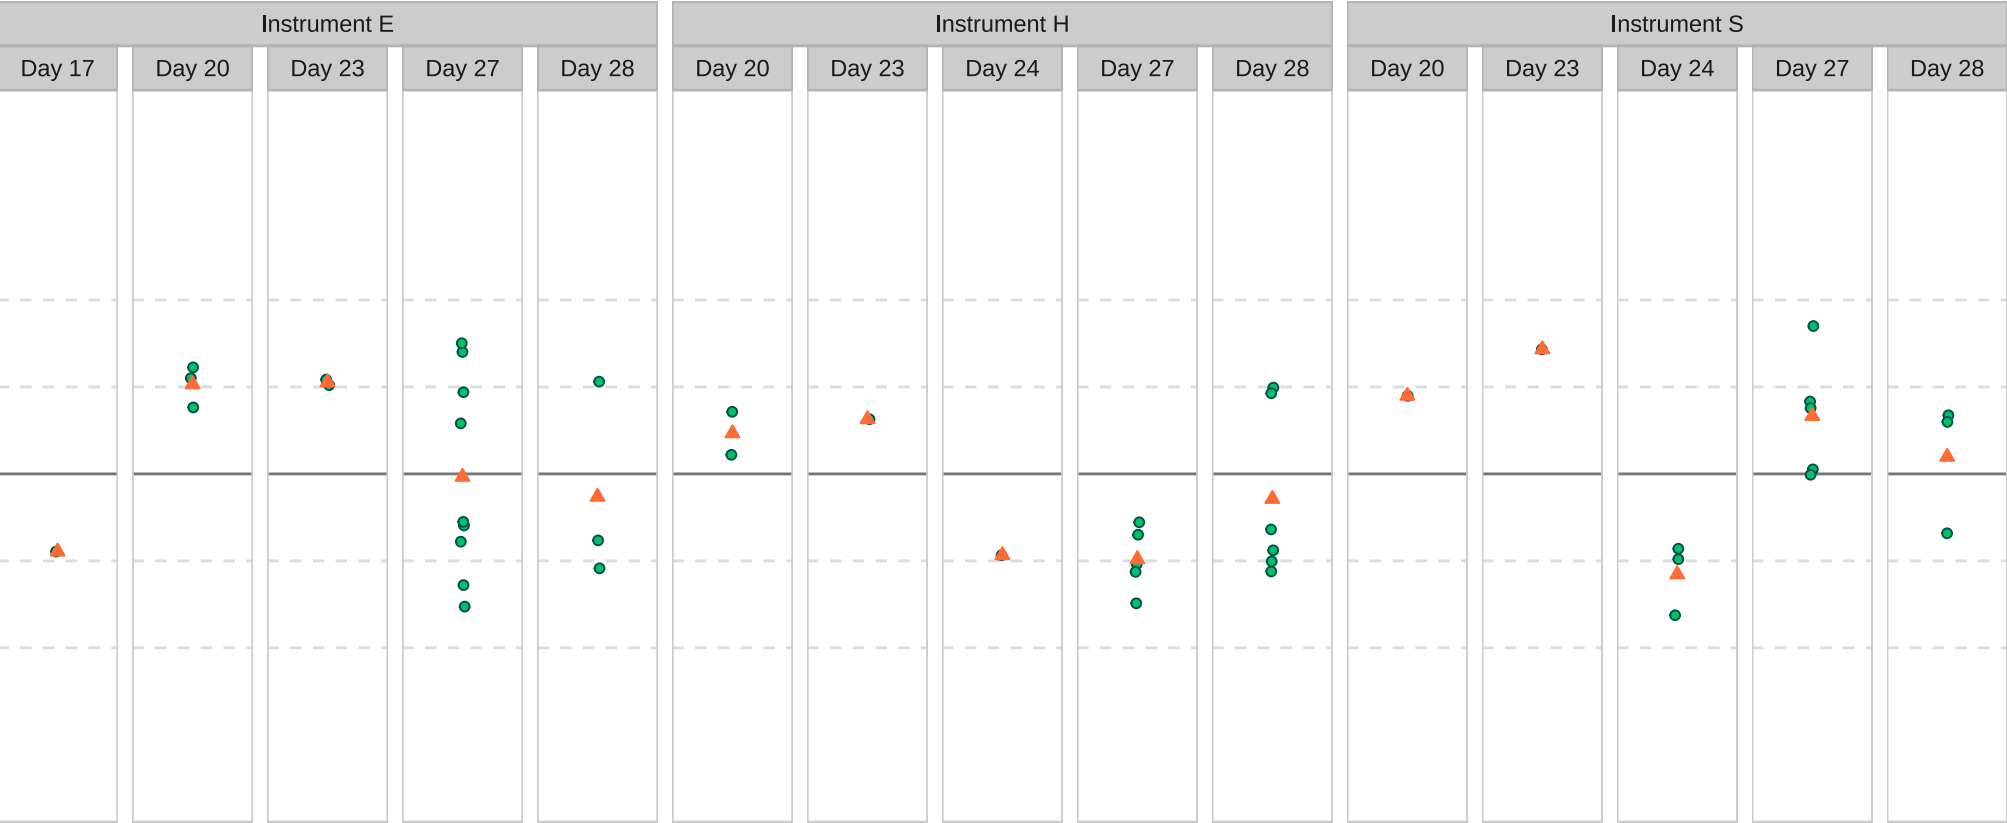

# BUN-Control L

Individual measurements shown in green, mean of day in poppy triangles. Grey line shows global mean, with dashed lines as +/- 2SD. Points outside of +/- 2.5SD are labeled for investigation. Day refers to the date in Apr.

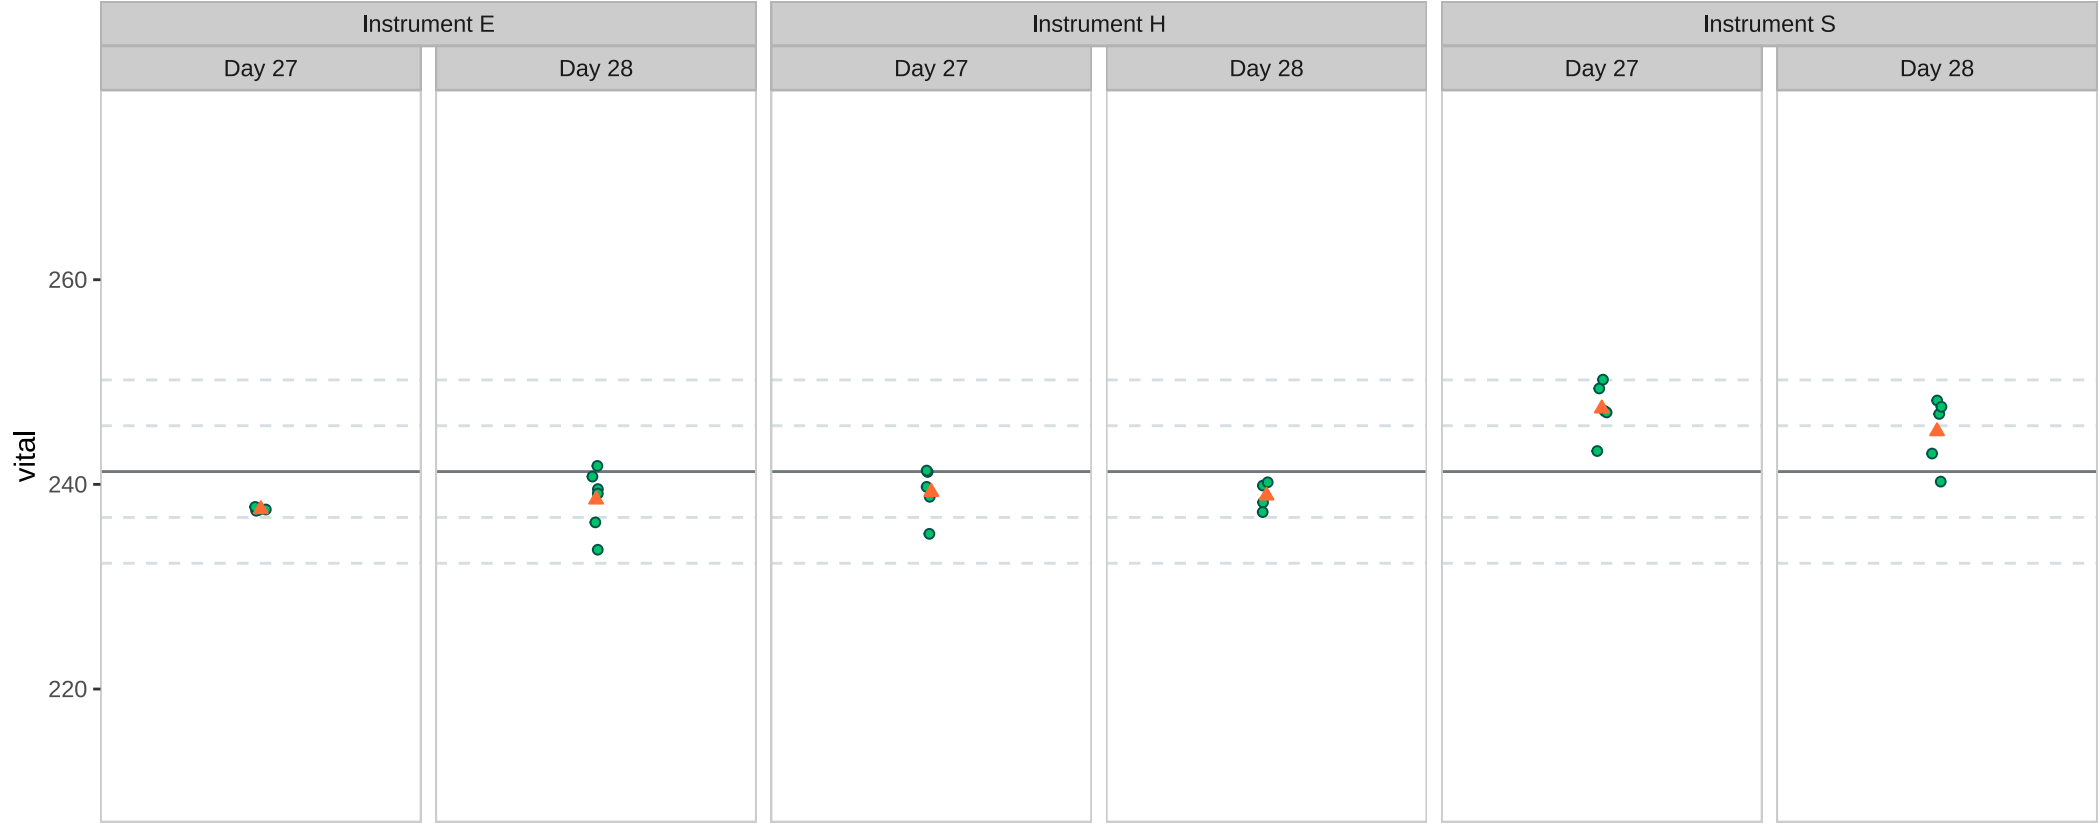

# BUN-Control M

Individual measurements shown in green, mean of day in poppy triangles. Grey line shows global mean, with dashed lines as +/- 2SD. Points outside of +/- 2.5SD are labeled for investigation. Day refers to the date in Apr.

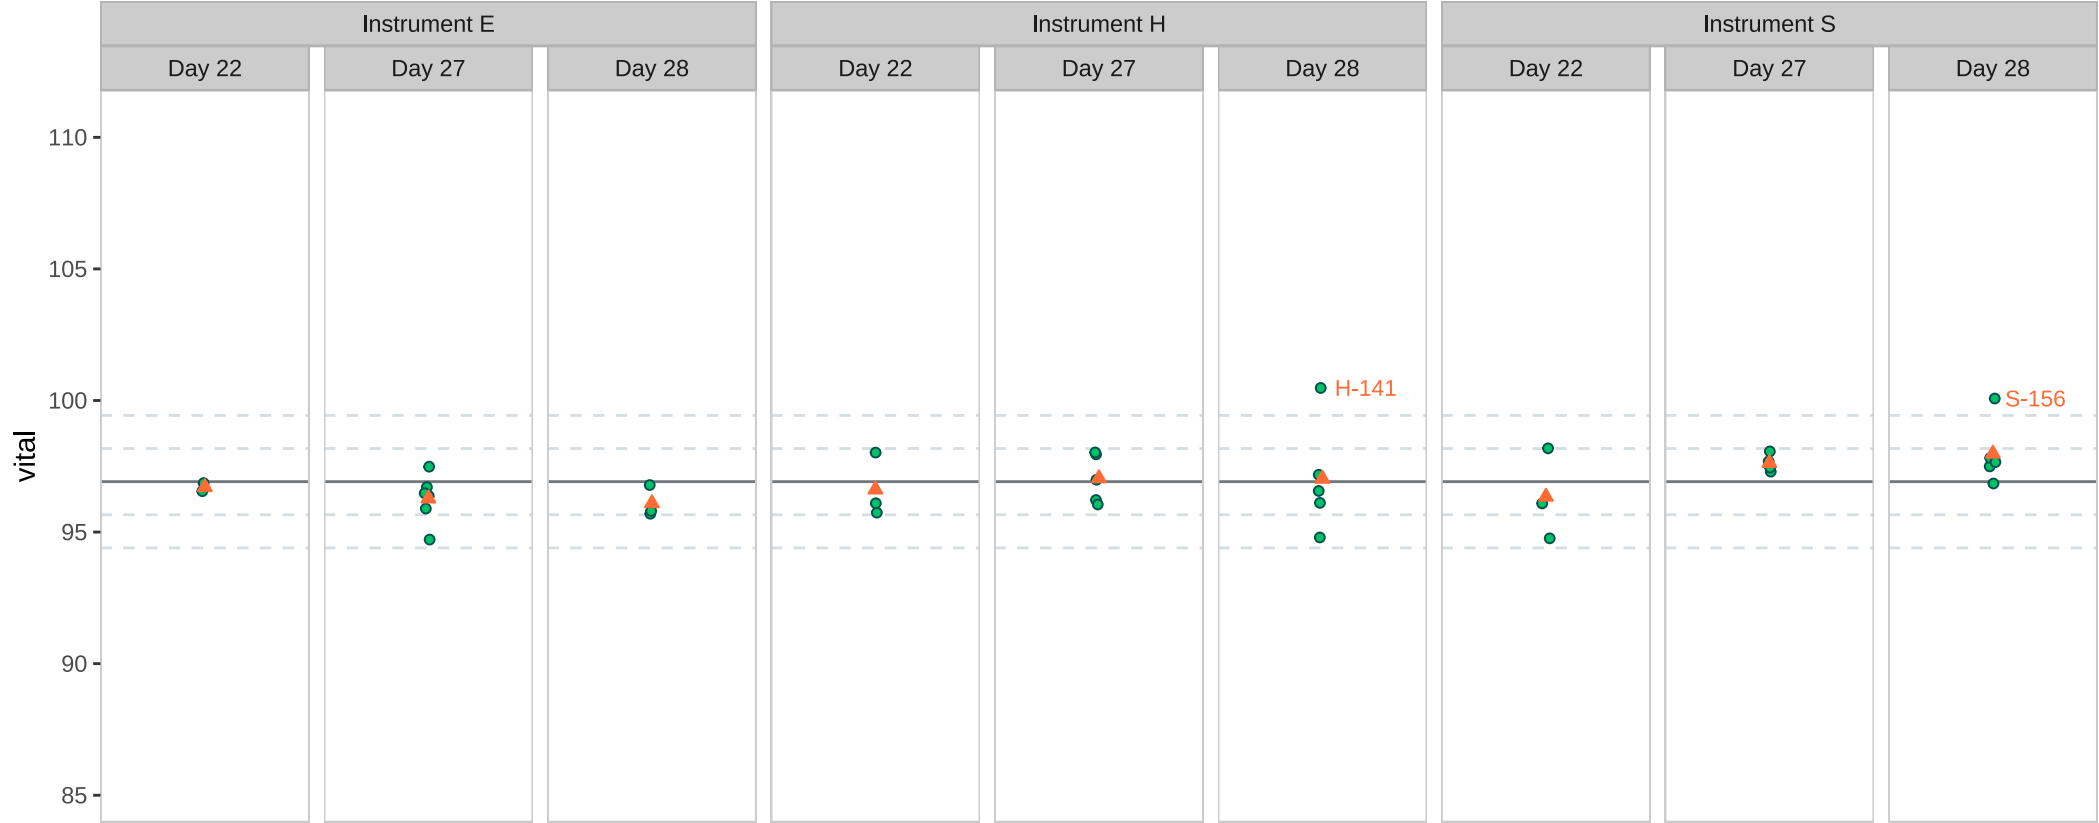

# CHOL-Control H

Individual measurements shown in green, mean of day in poppy triangles. Grey line shows global mean, with dashed lines as +/- 2SD. Points outside of +/- 2.5SD are labeled for investigation. Day refers to the date in Apr.

# CHOL-Control L

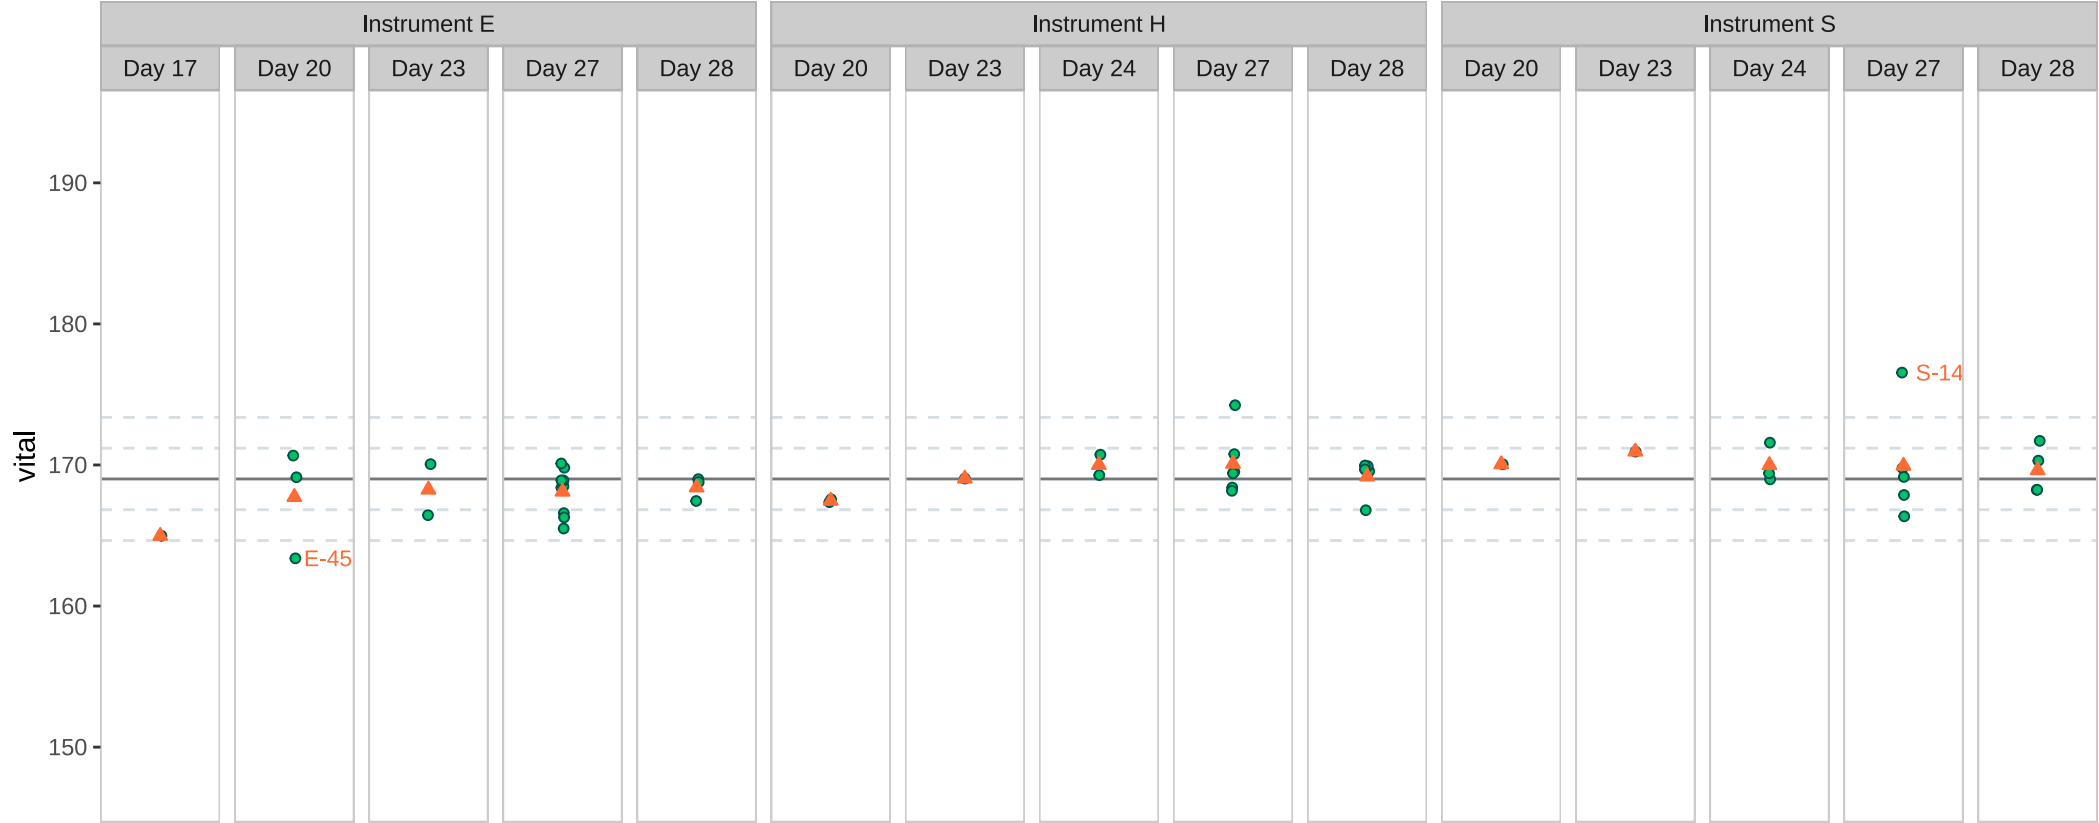

Individual measurements shown in green, mean of day in poppy triangles. Grey line shows global mean, with dashed lines as +/- 2SD. Points outside of +/- 2.5SD are labeled for investigation. Day refers to the date in Apr.

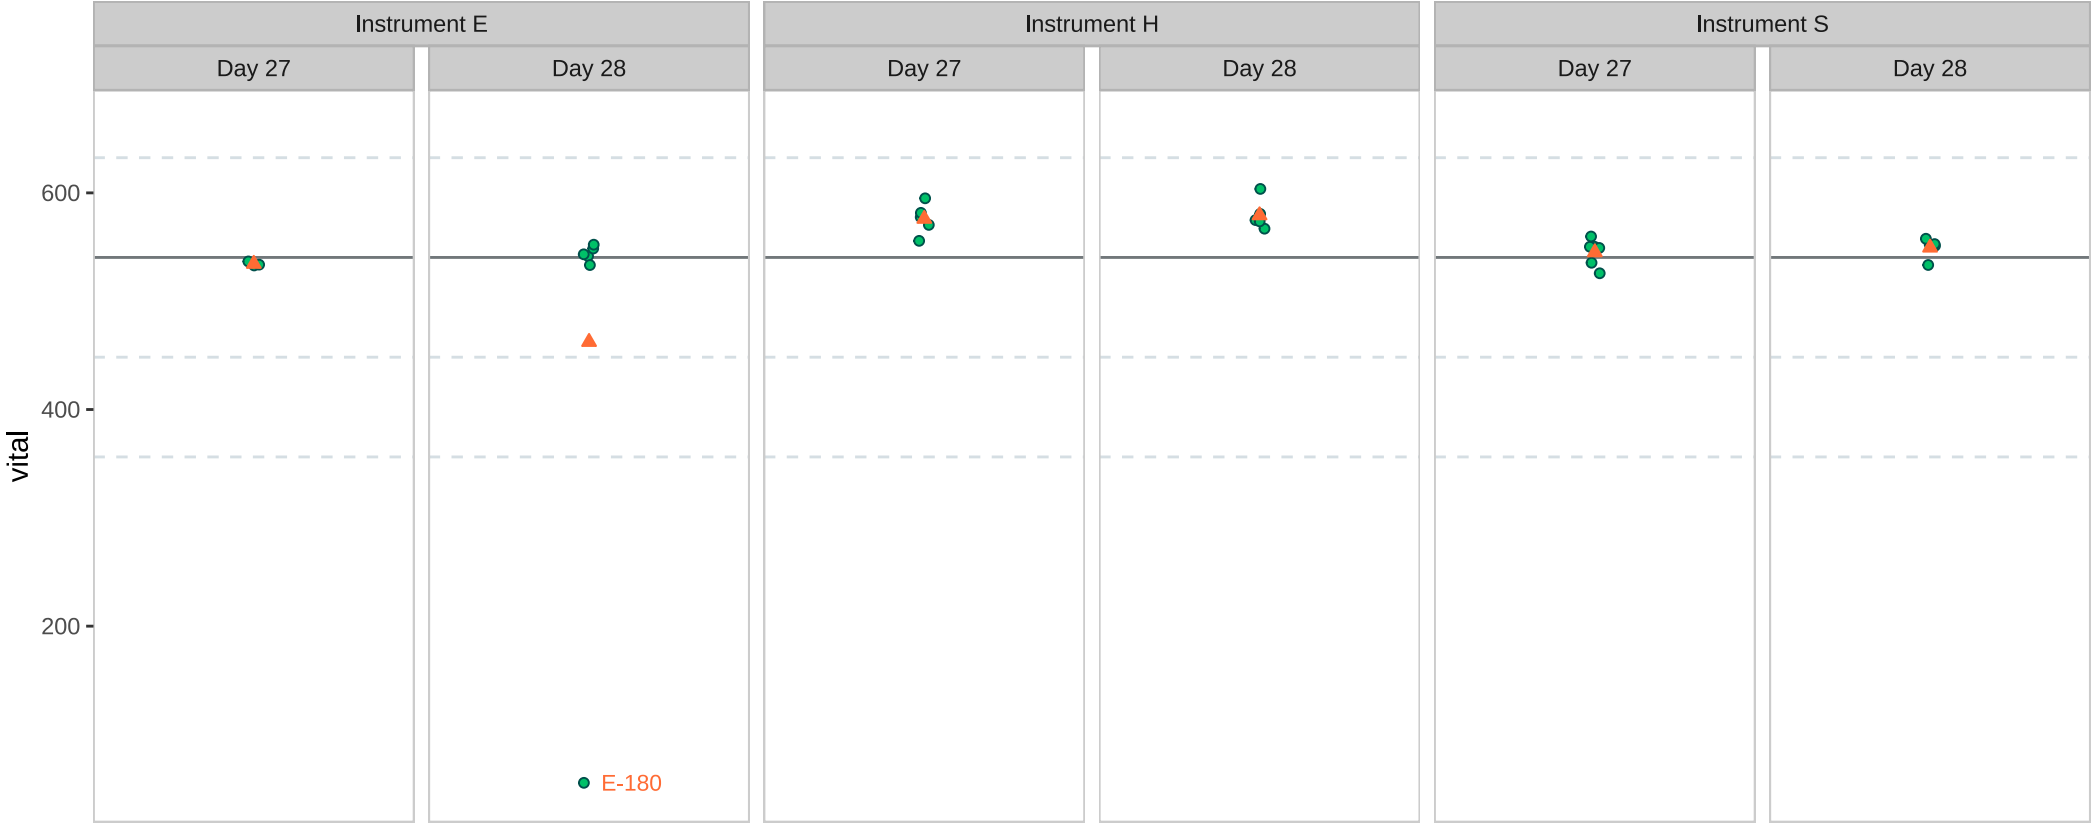

# CHOL-Control M

Individual measurements shown in green, mean of day in poppy triangles. Grey line shows global mean, with dashed lines as +/- 2SD. Points outside of +/- 2.5SD are labeled for investigation. Day refers to the date in Apr.

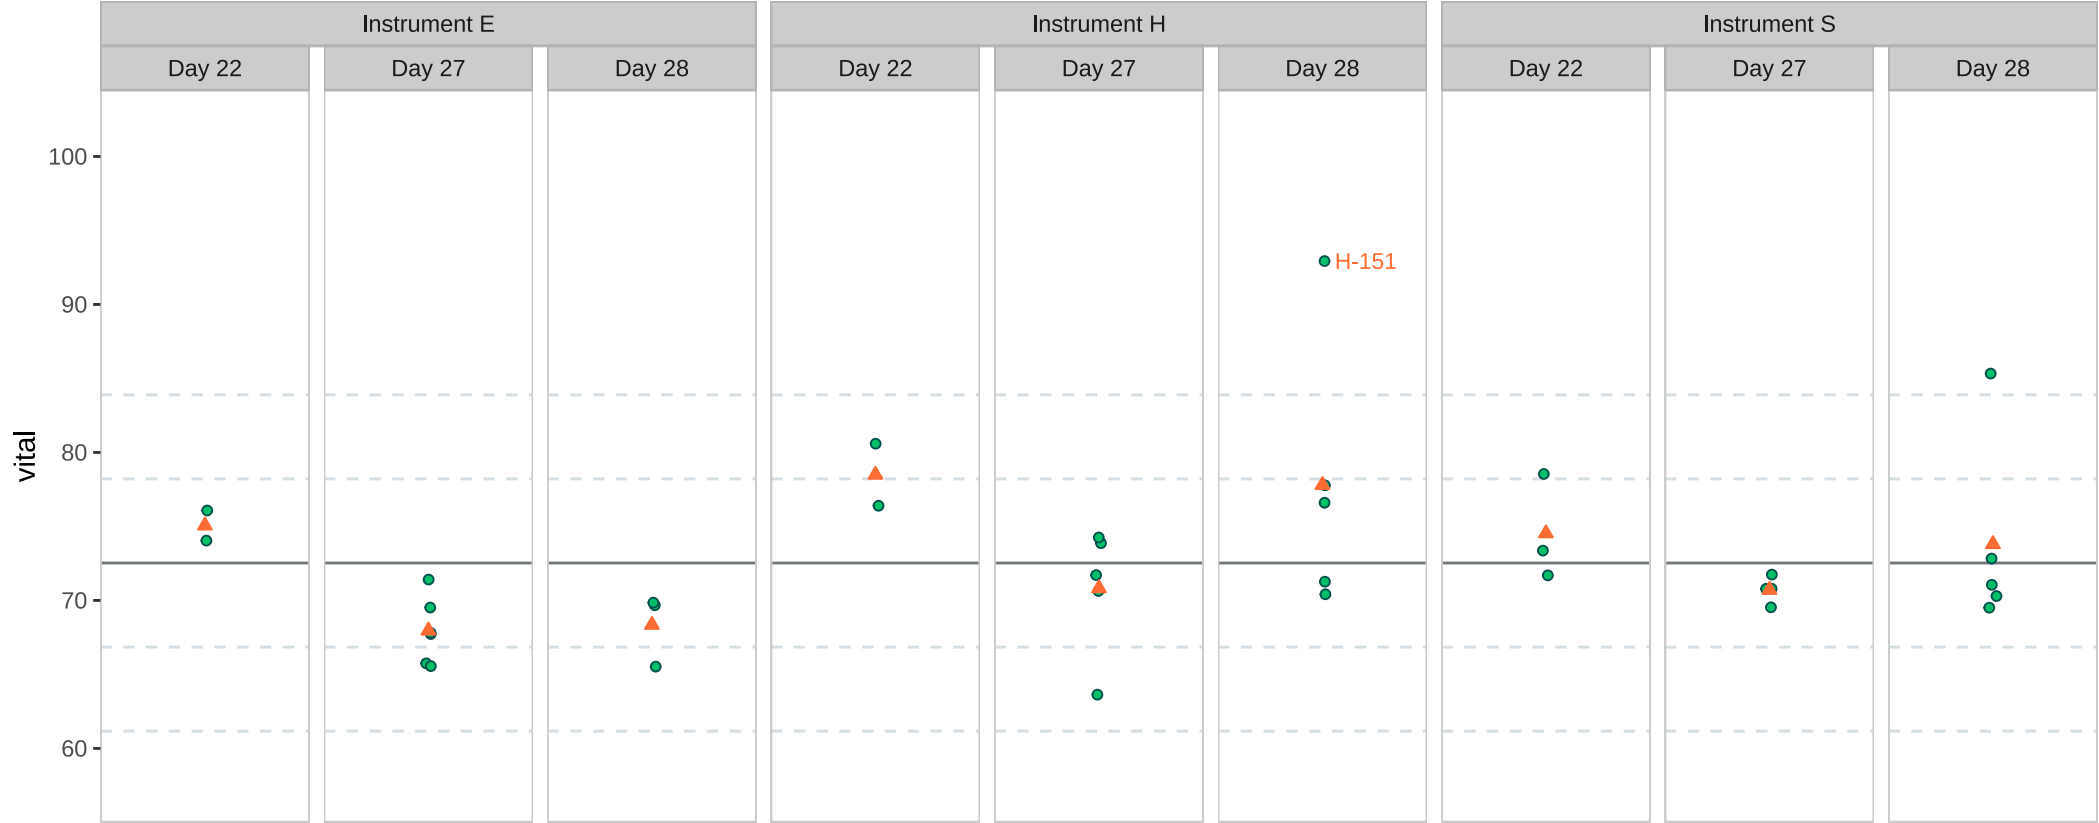

# CK-Control H

Individual measurements shown in green, mean of day in poppy triangles. Grey line shows global mean, with dashed lines as +/- 2SD. Points outside of +/- 2.5SD are labeled for investigation. Day refers to the date in Apr.

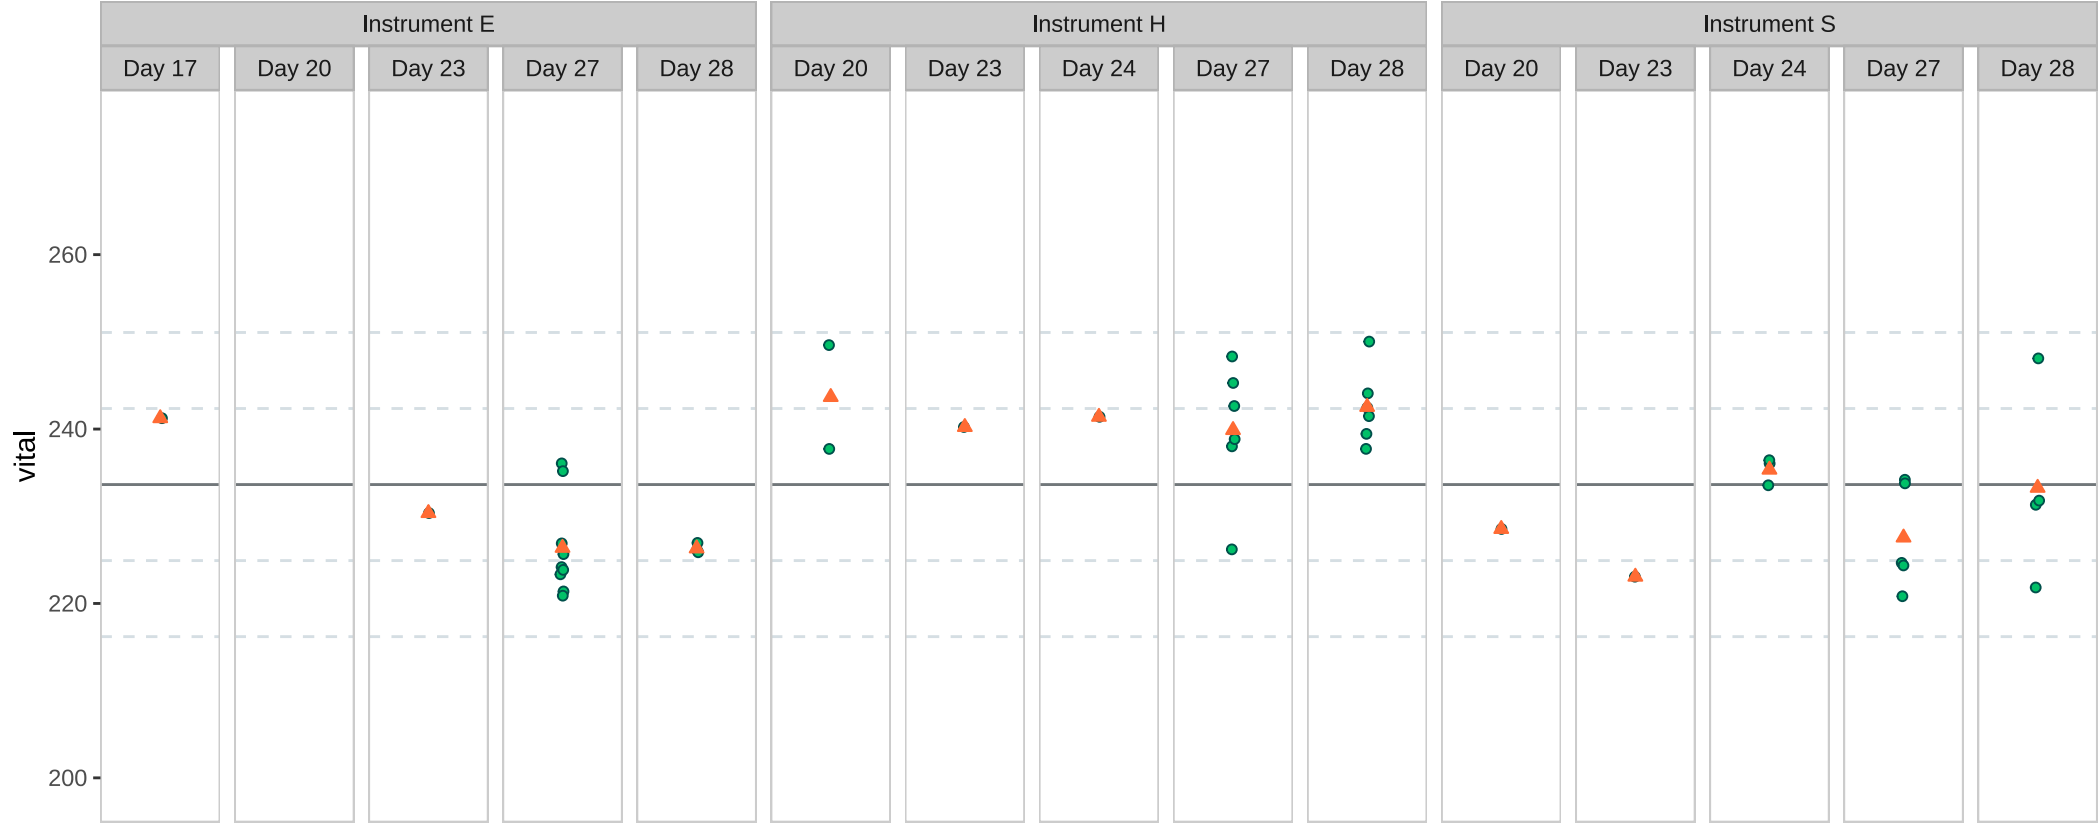

# CK-Control L

Individual measurements shown in green, mean of day in poppy triangles. Grey line shows global mean, with dashed lines as +/- 2SD. Points outside of +/- 2.5SD are labeled for investigation. Day refers to the date in Apr.

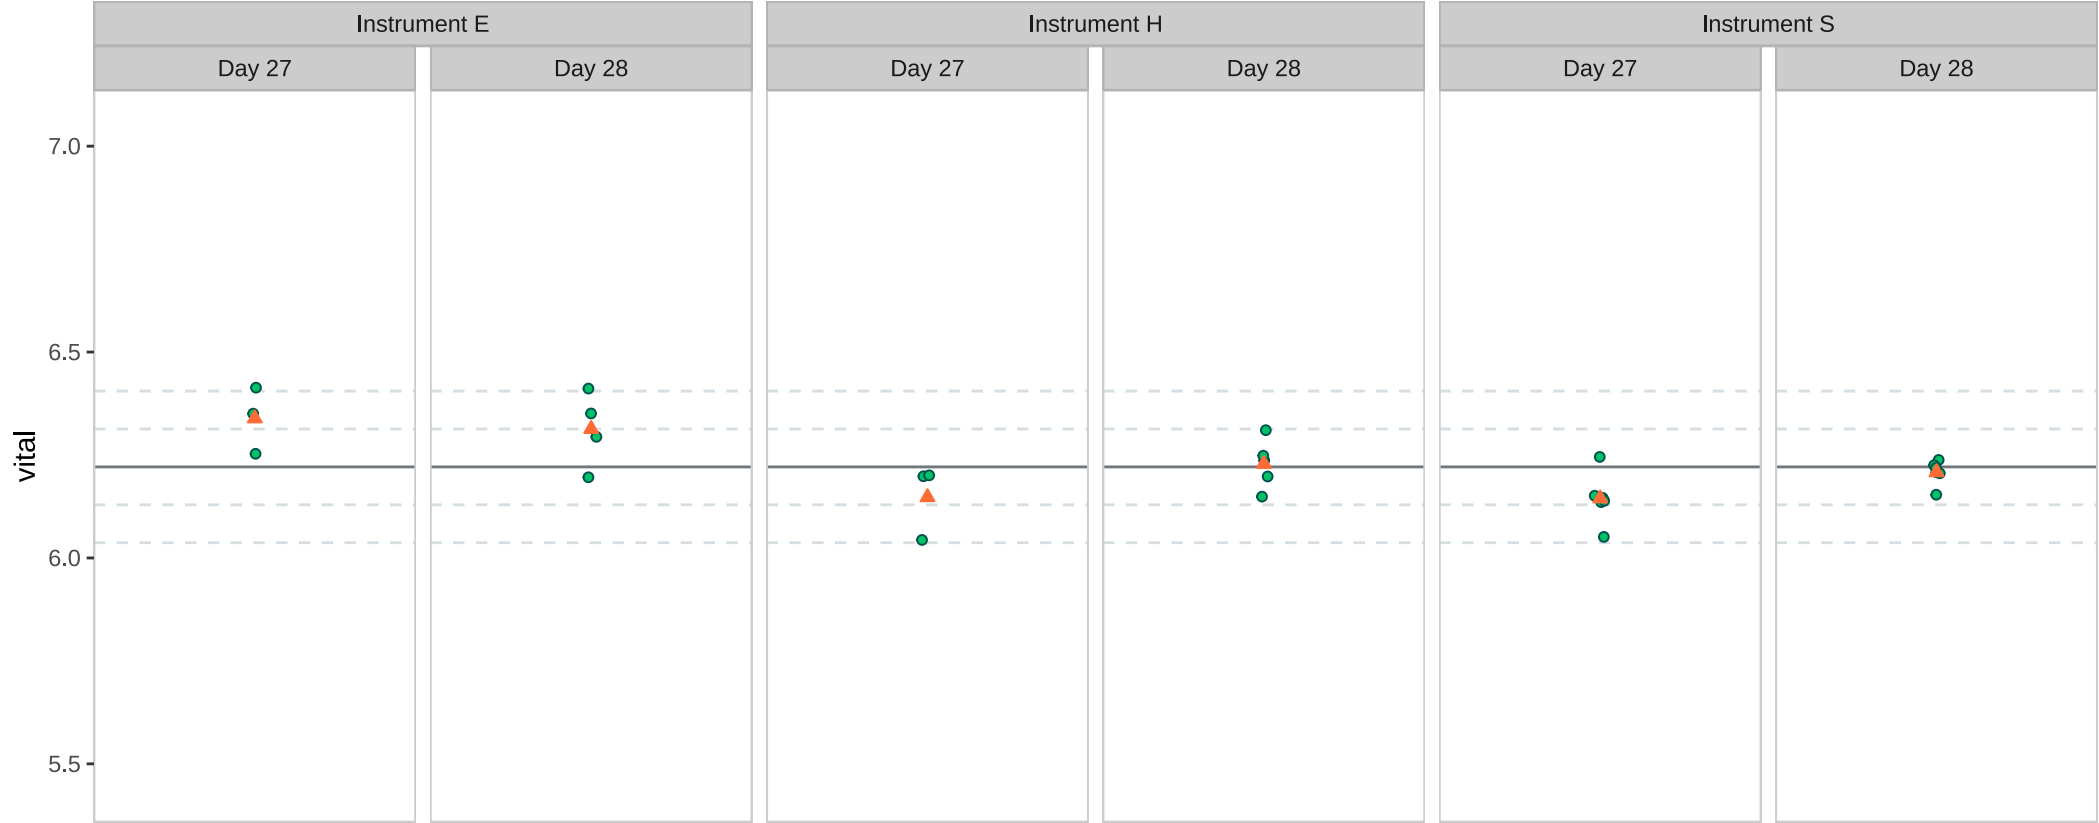

# CK-Control M

Individual measurements shown in green, mean of day in poppy triangles. Grey line shows global mean, with dashed lines as +/- 2SD. Points outside of +/- 2.5SD are labeled for investigation. Day refers to the date in Apr.

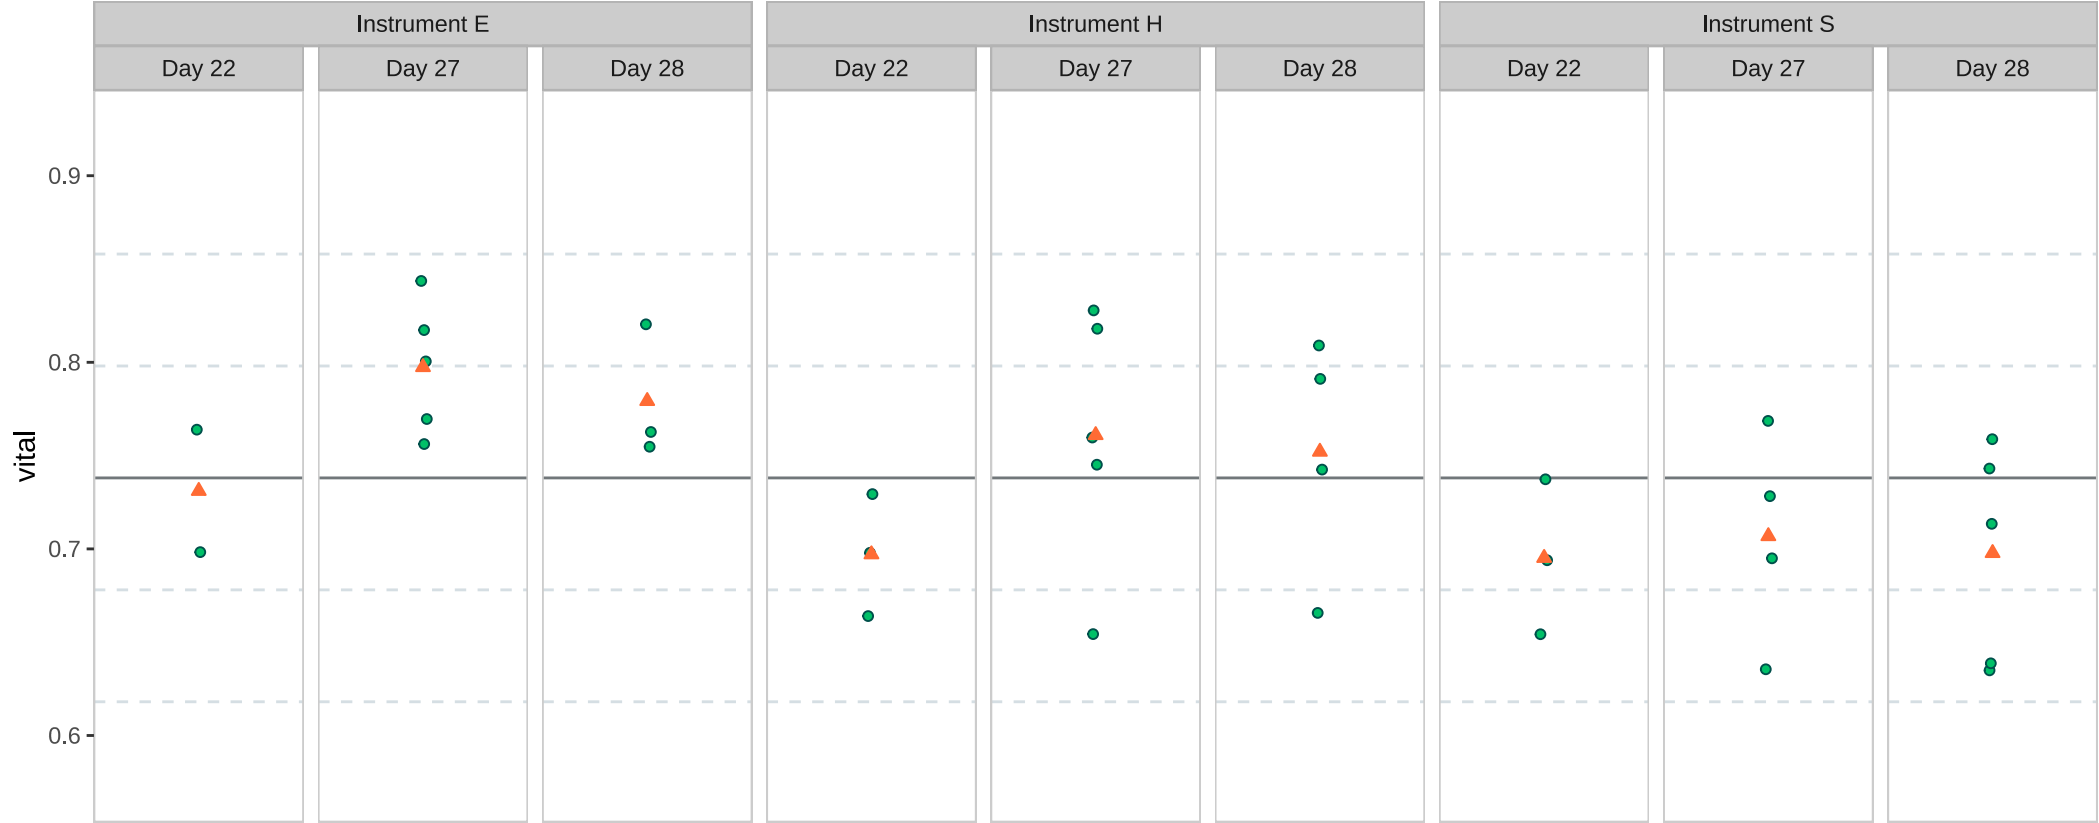

# CREA-Control H

Individual measurements shown in green, mean of day in poppy triangles. Grey line shows global mean, with dashed lines as +/- 2SD. Points outside of +/- 2.5SD are labeled for investigation. Day refers to the date in Apr.

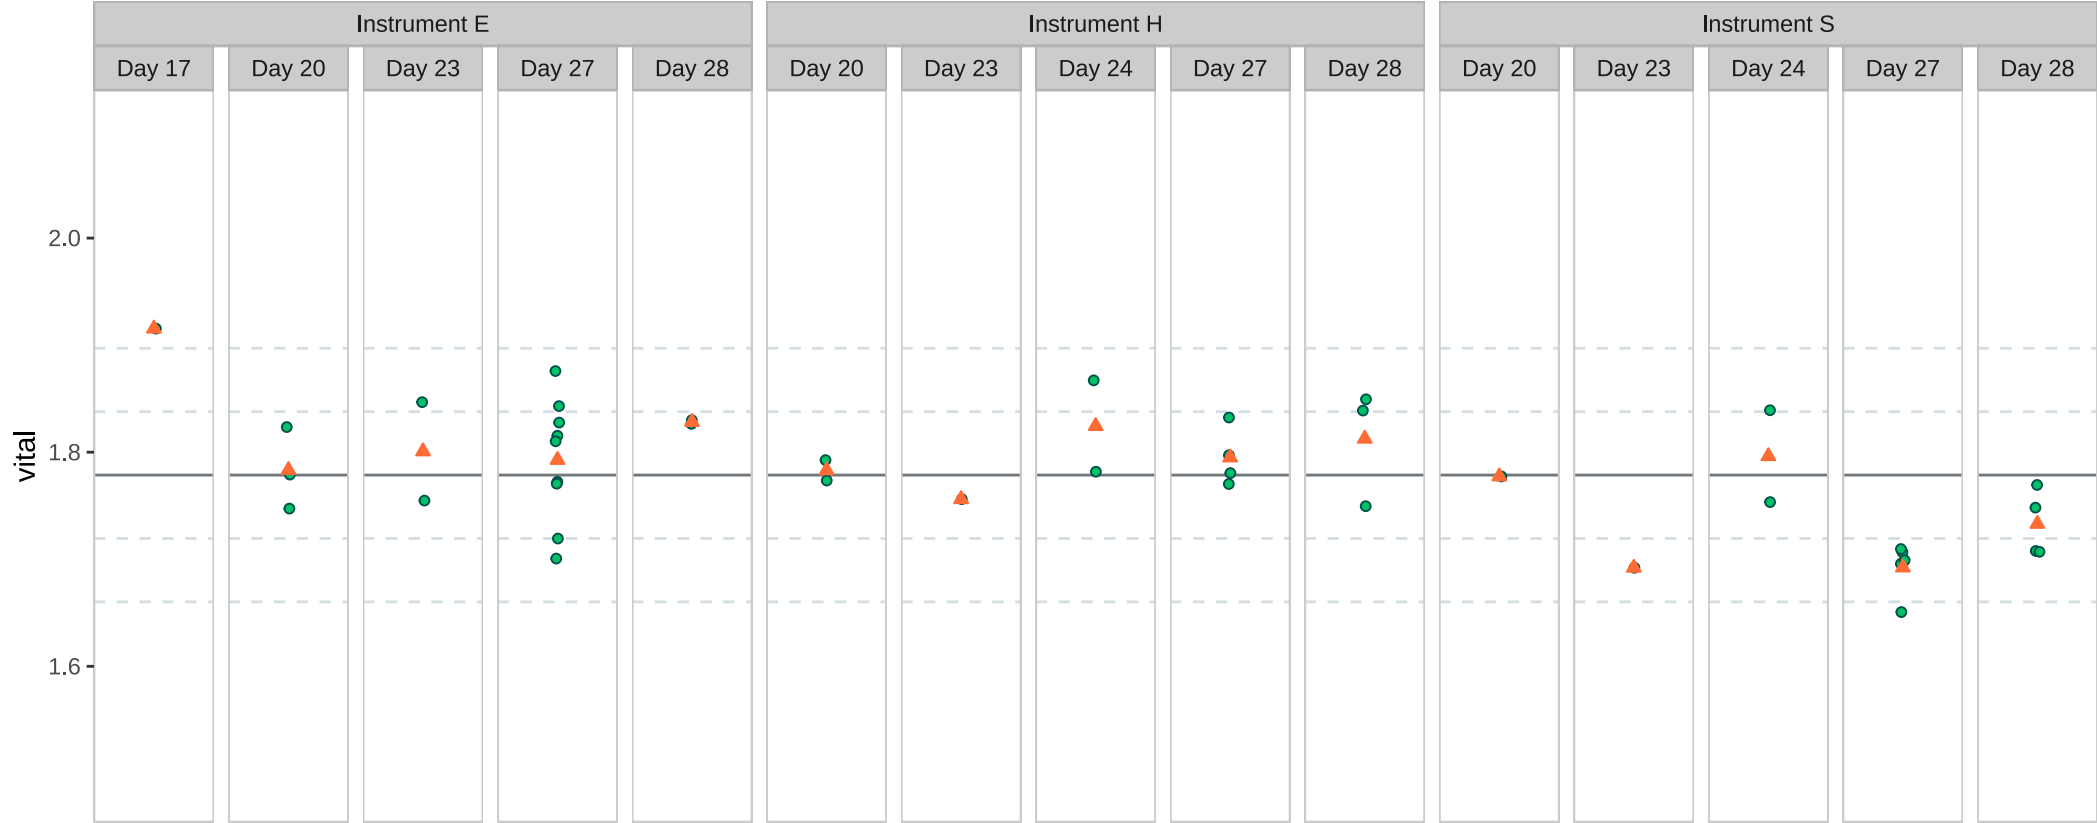

# CREA-Control L

Individual measurements shown in green, mean of day in poppy triangles. Grey line shows global mean, with dashed lines as +/- 2SD. Points outside of +/- 2.5SD are labeled for investigation. Day refers to the date in Apr.

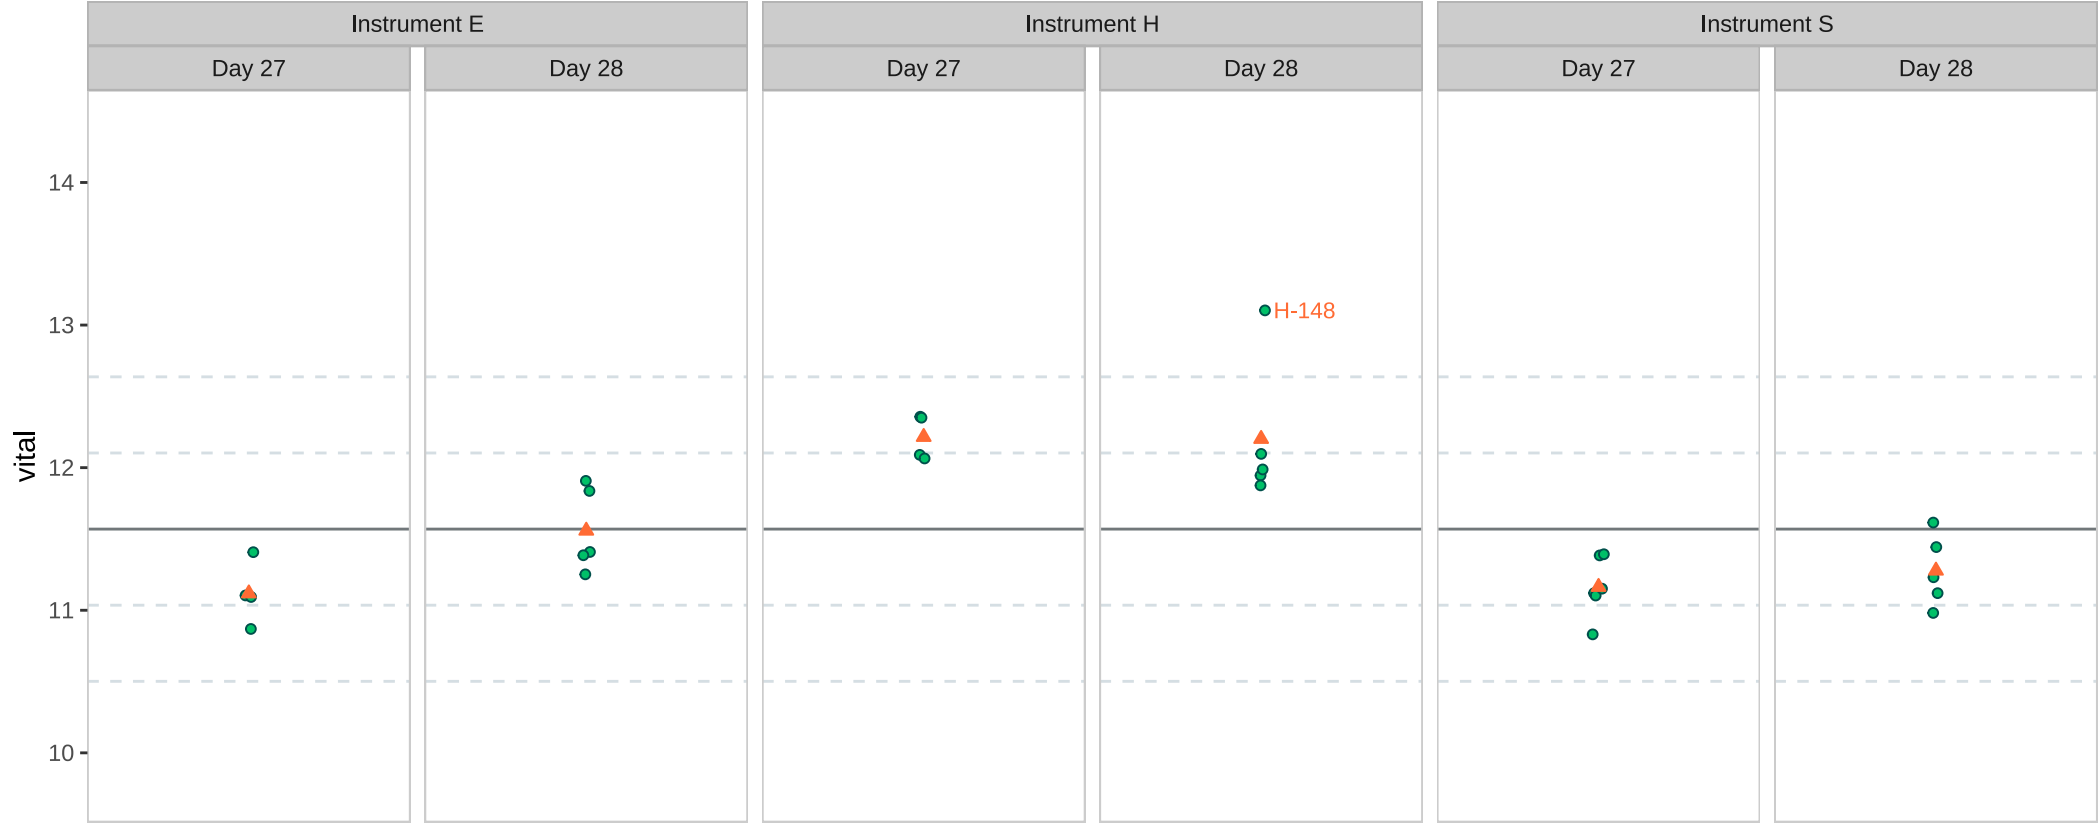

# CREA-Control M

Individual measurements shown in green, mean of day in poppy triangles. Grey line shows global mean, with dashed lines as +/- 2SD. Points outside of +/- 2.5SD are labeled for investigation. Day refers to the date in Apr.

# Ca-Control H

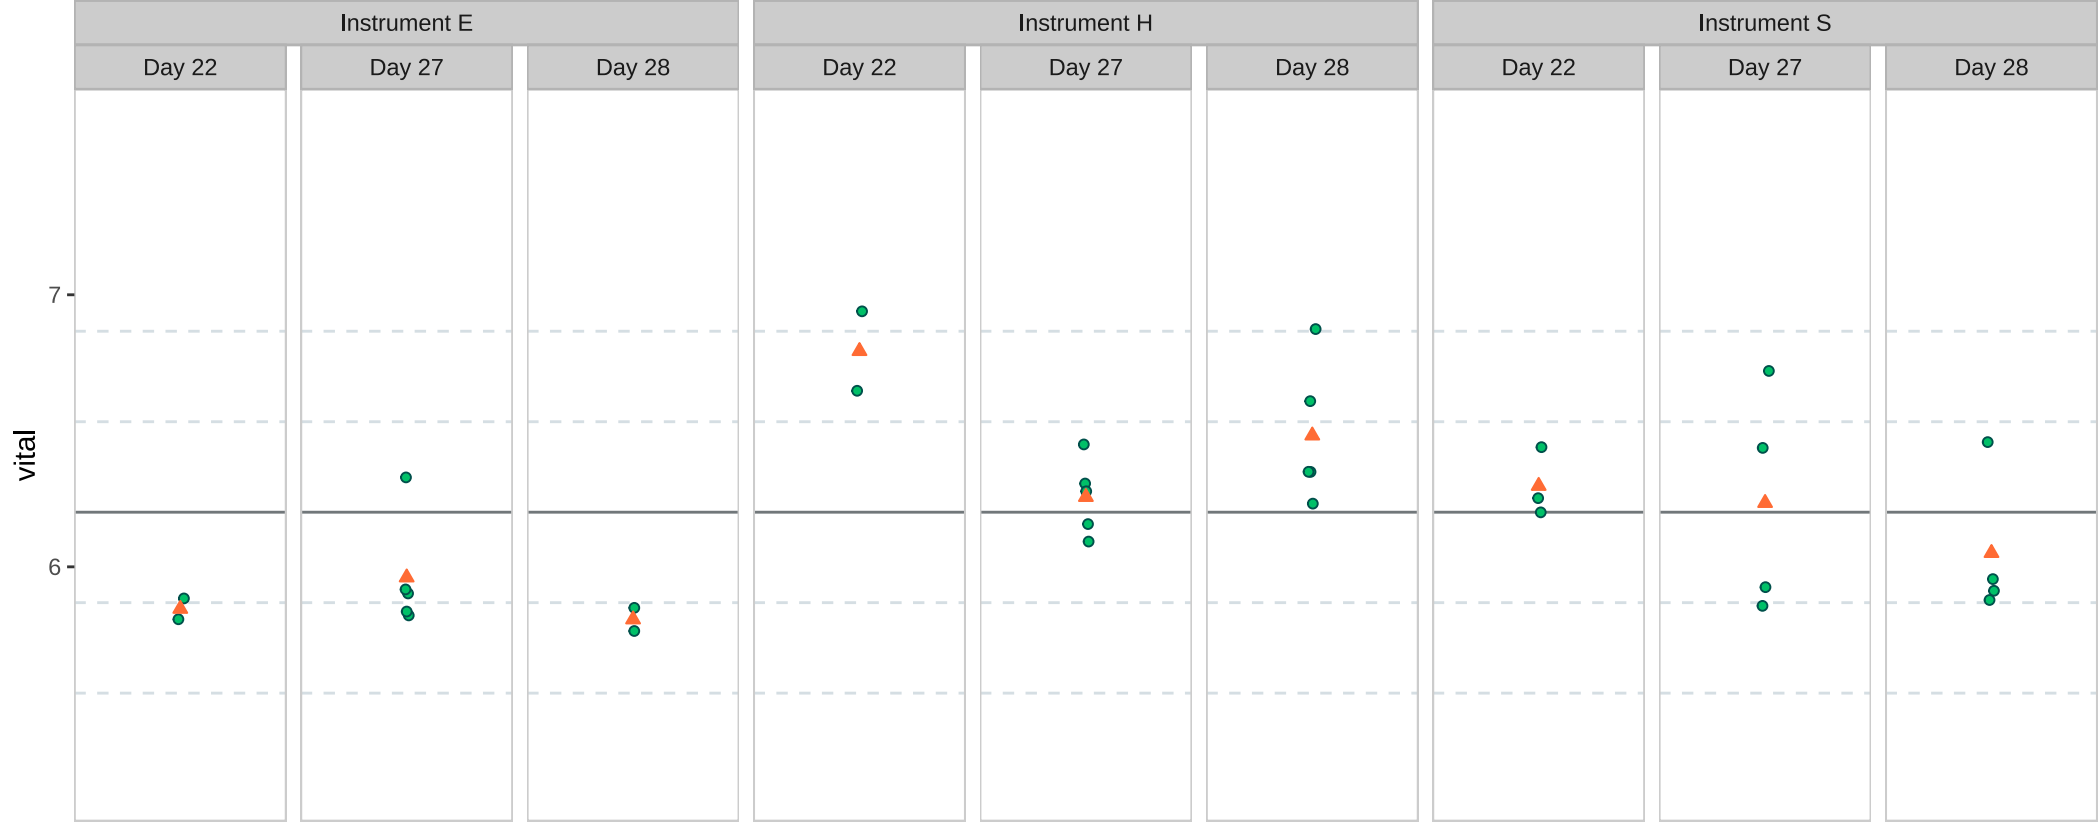

Individual measurements shown in green, mean of day in poppy triangles. Grey line shows global mean, with dashed lines as +/- 2SD. Points outside of +/- 2.5SD are labeled for investigation. Day refers to the date in Apr.

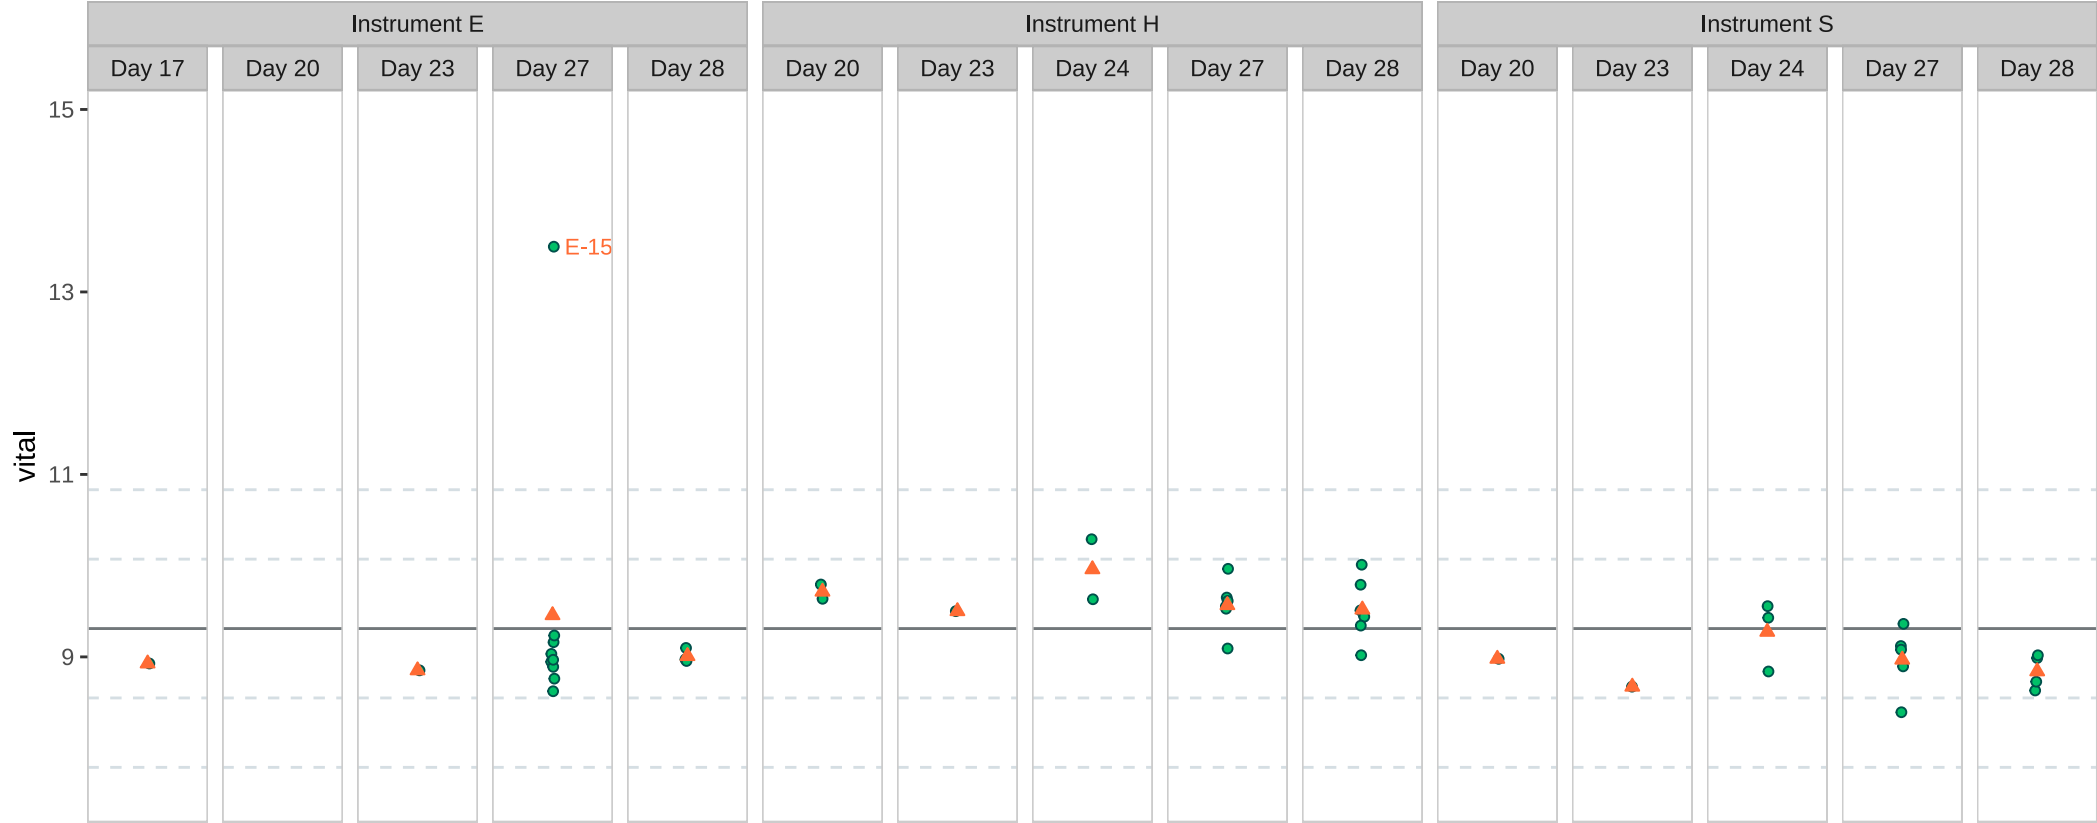

# Ca-Control L

Individual measurements shown in green, mean of day in poppy triangles. Grey line shows global mean, with dashed lines as +/- 2SD. Points outside of +/- 2.5SD are labeled for investigation. Day refers to the date in Apr.

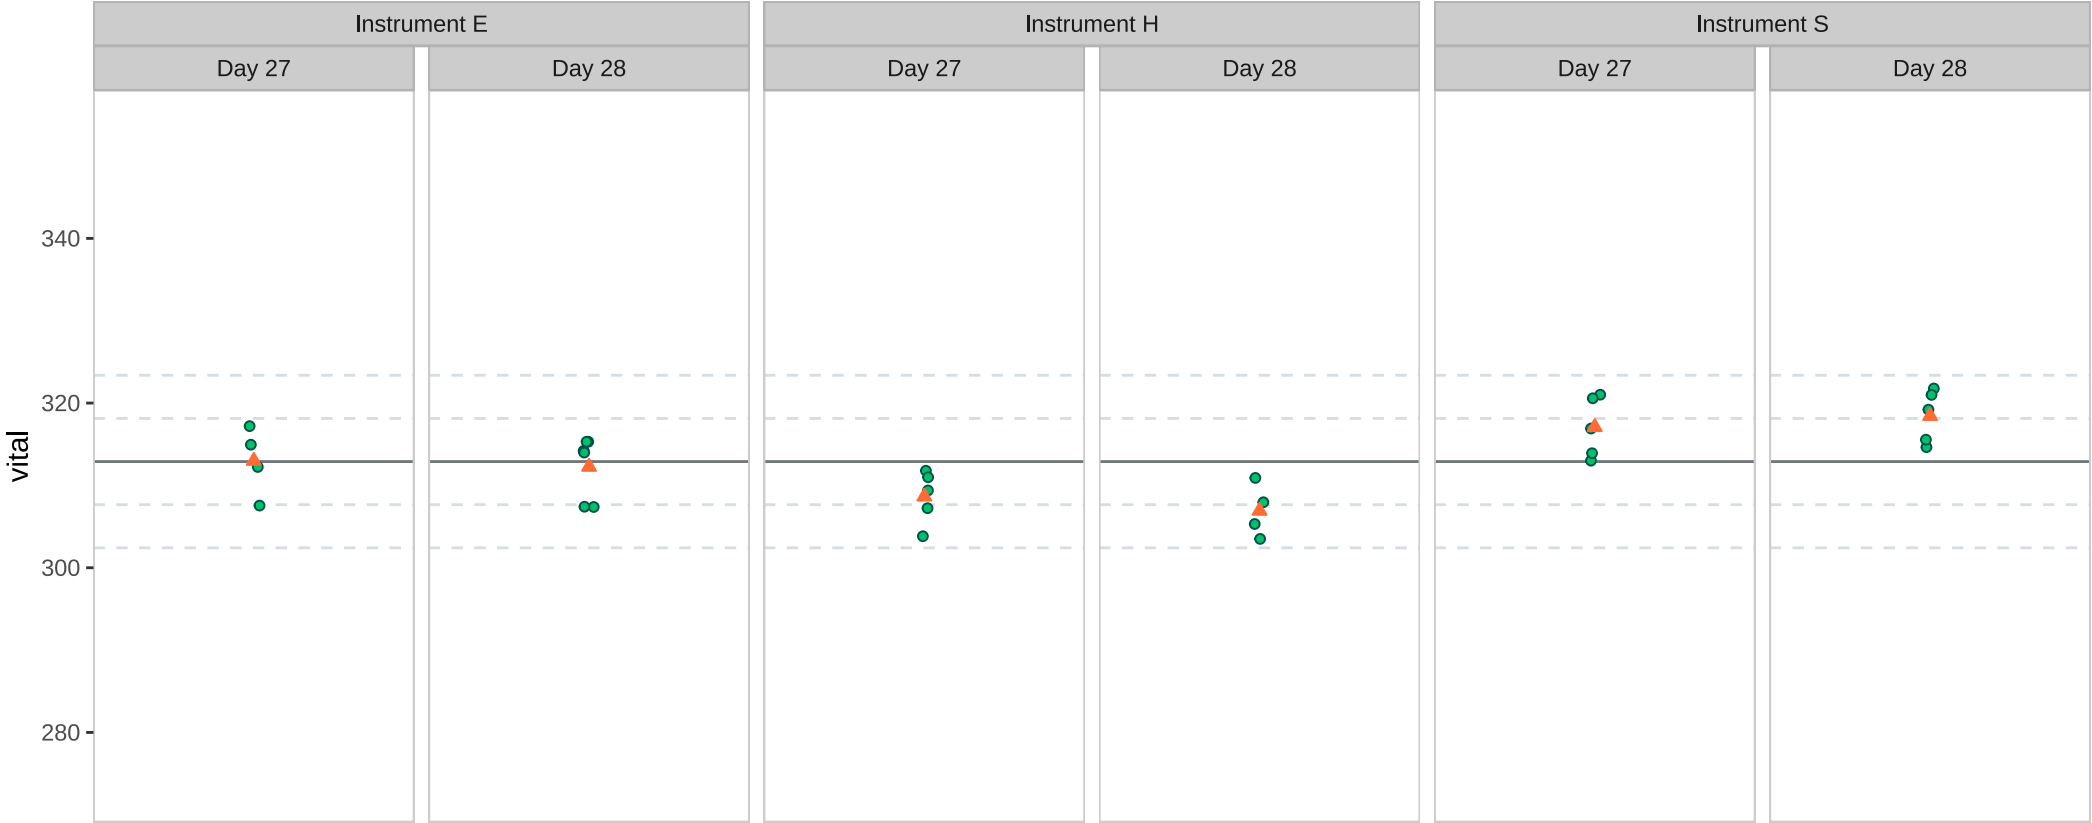

# Ca-Control M

Individual measurements shown in green, mean of day in poppy triangles. Grey line shows global mean, with dashed lines as +/- 2SD. Points outside of +/- 2.5SD are labeled for investigation. Day refers to the date in Apr.

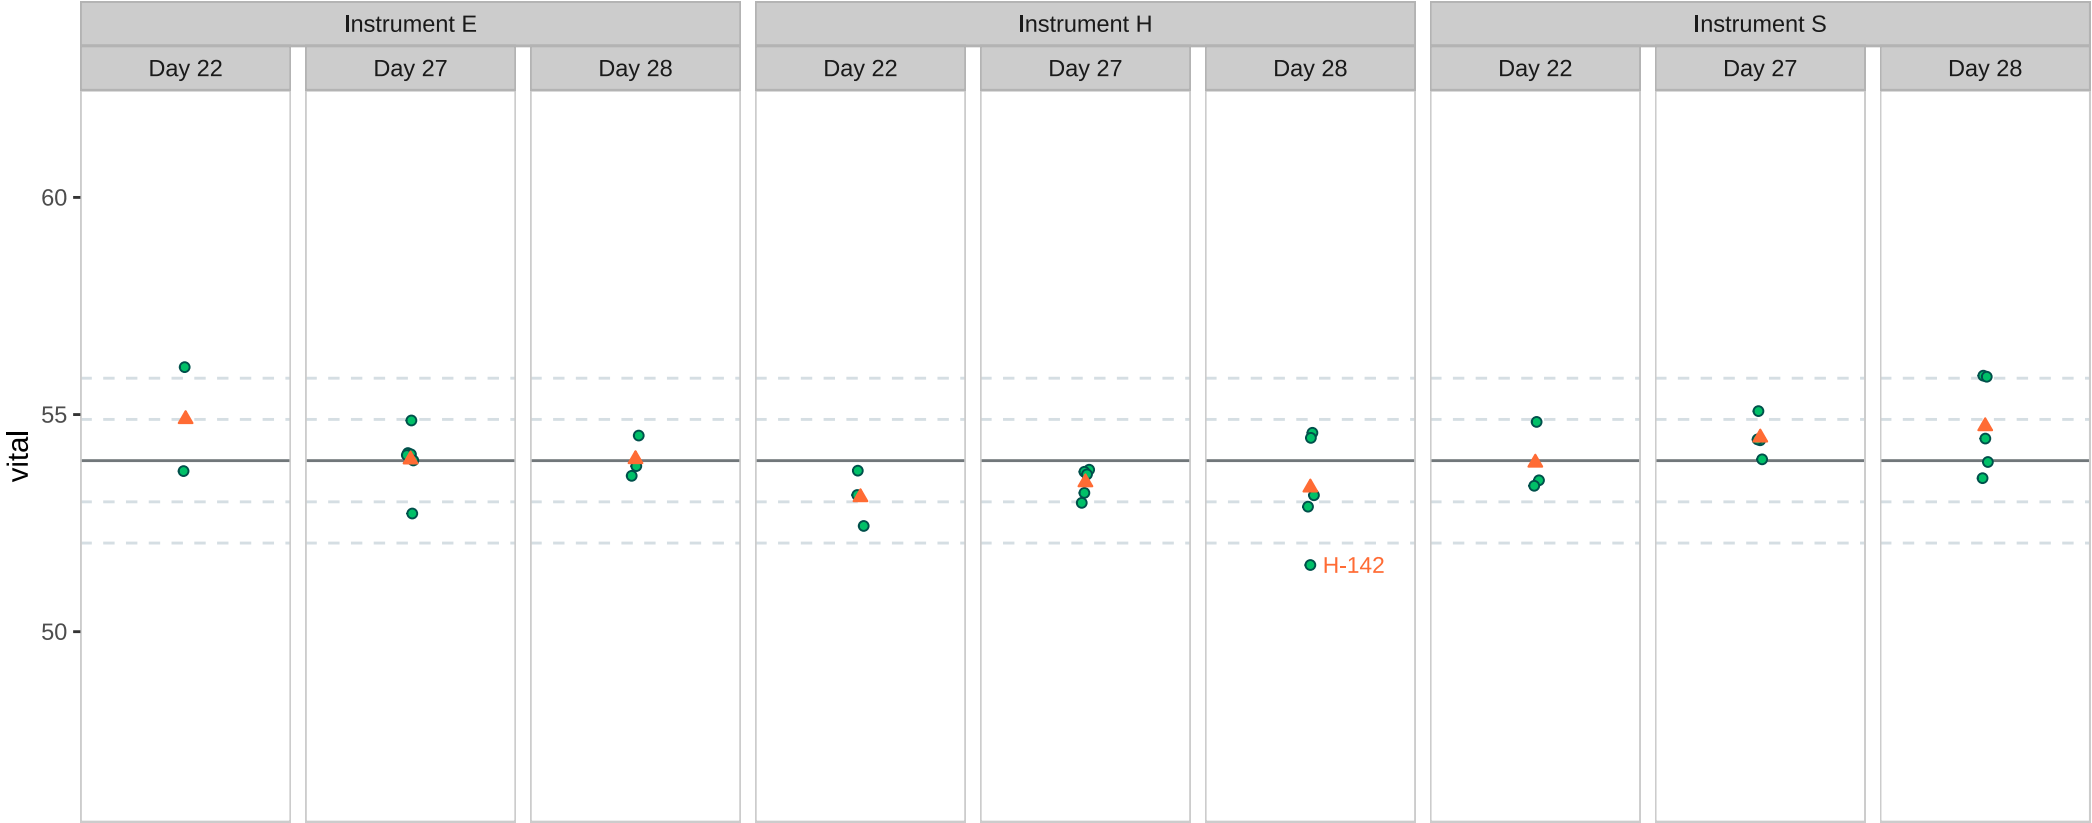

# GLU-Control H

Individual measurements shown in green, mean of day in poppy triangles. Grey line shows global mean, with dashed lines as +/- 2SD. Points outside of +/- 2.5SD are labeled for investigation. Day refers to the date in Apr.

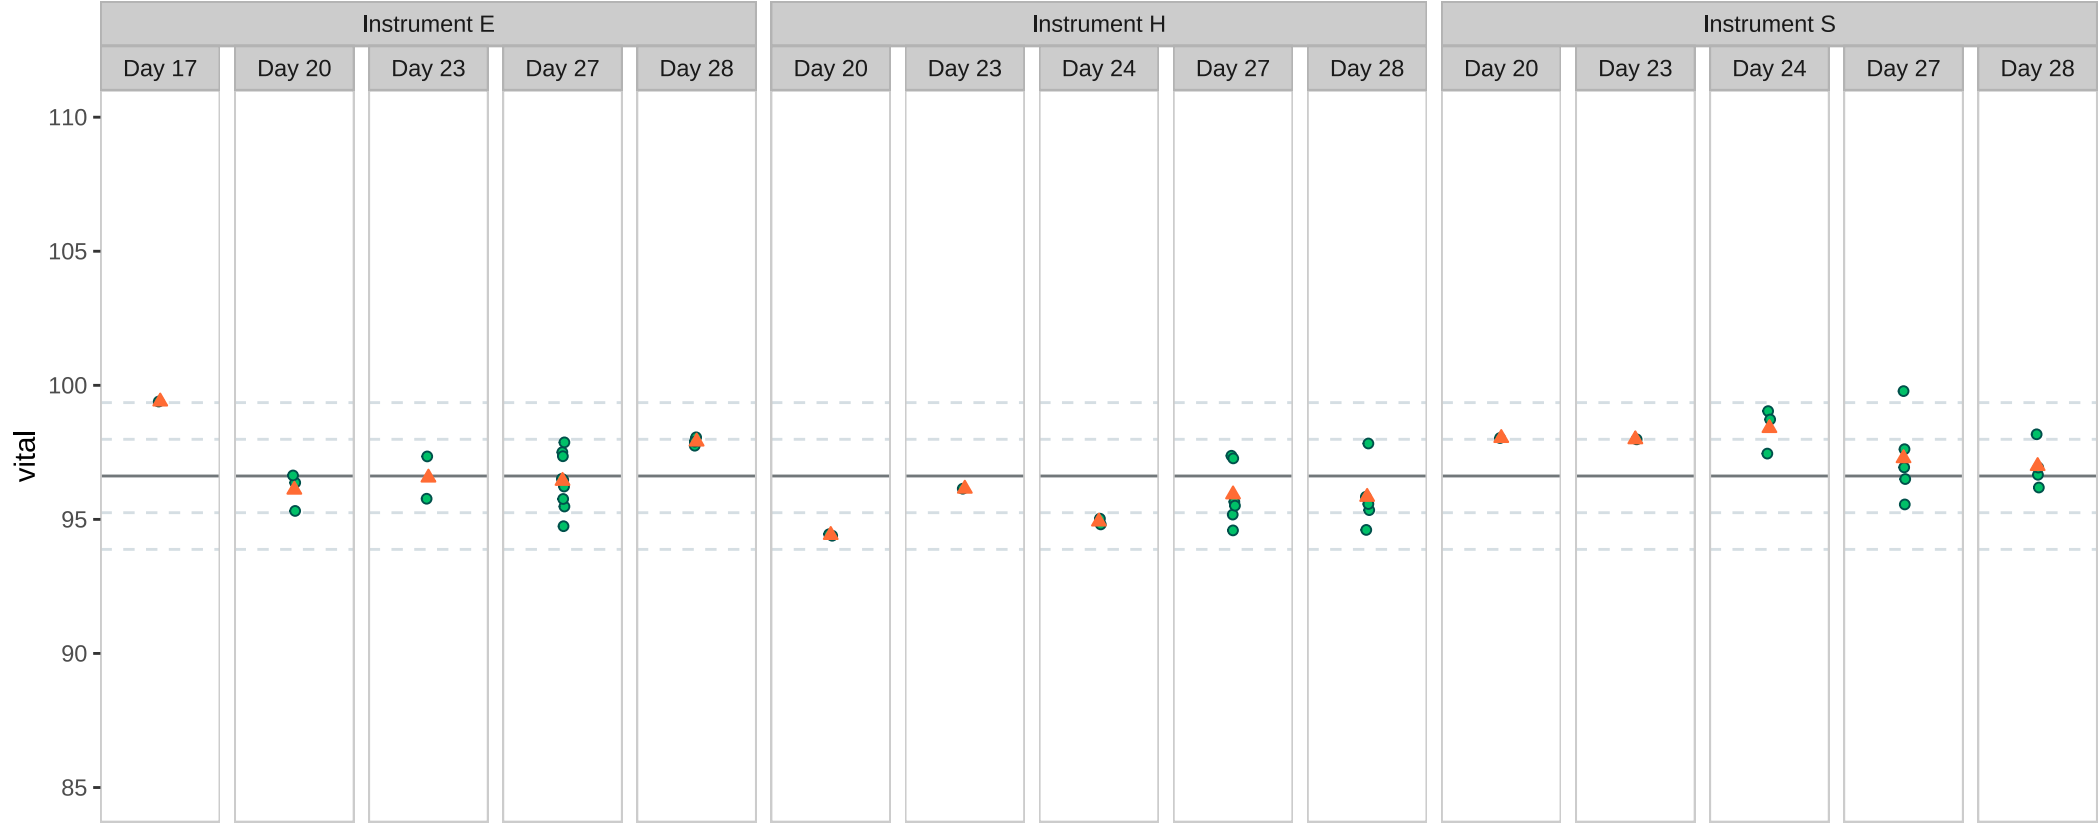

# GLU-Control L

Individual measurements shown in green, mean of day in poppy triangles. Grey line shows global mean, with dashed lines as +/- 2SD. Points outside of +/- 2.5SD are labeled for investigation. Day refers to the date in Apr.

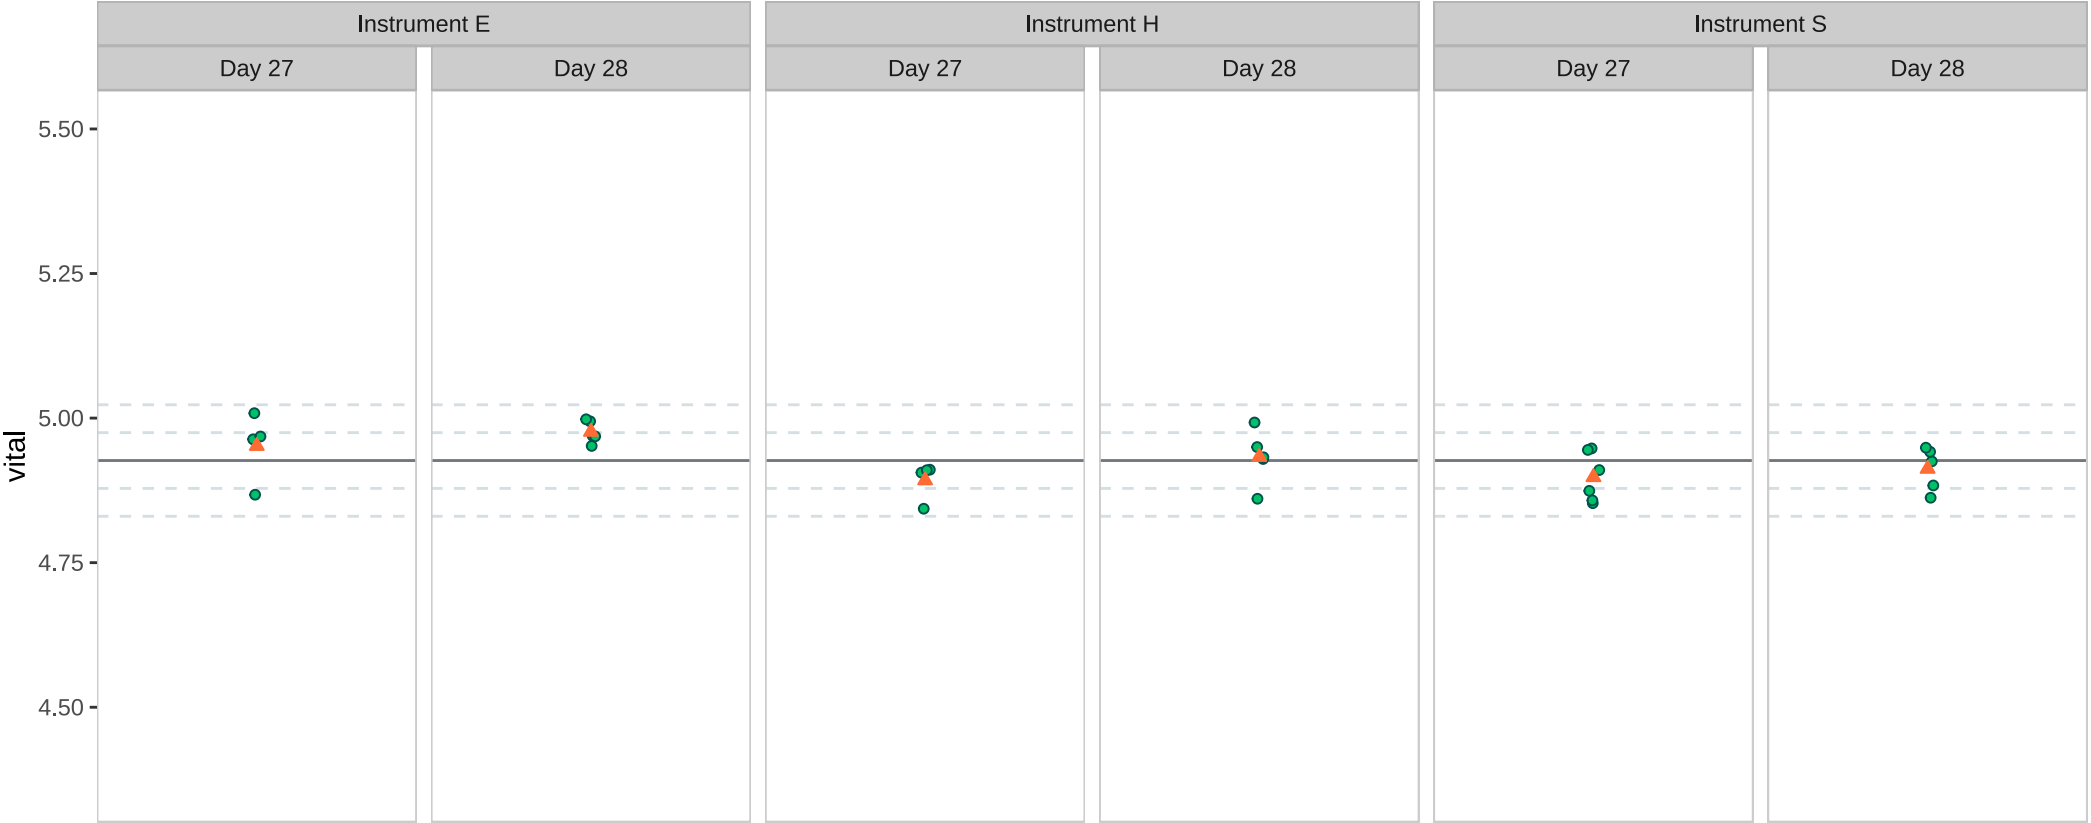

# GLU-Control M

Individual measurements shown in green, mean of day in poppy triangles. Grey line shows global mean, with dashed lines as  $\pm 2SD$ . Points outside of  $\pm 2.5SD$  are labeled for investigation. Day refers to the date in Apr.

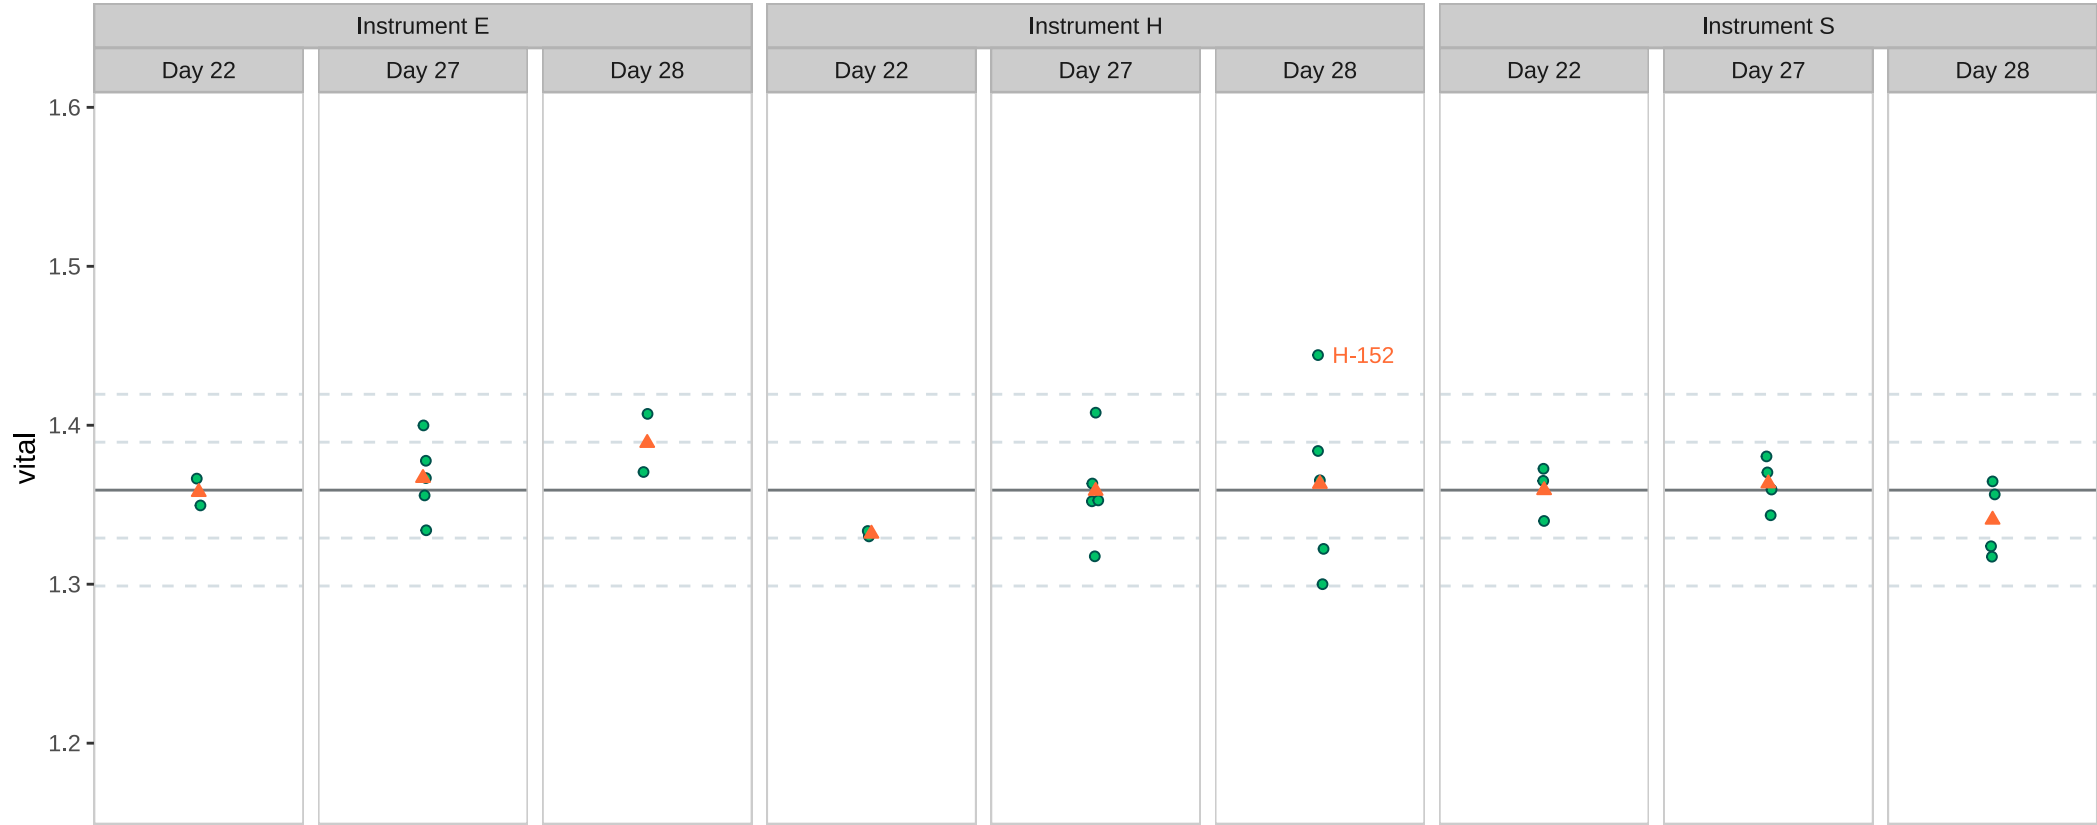

# LAC-Control H

Individual measurements shown in green, mean of day in poppy triangles. Grey line shows global mean, with dashed lines as +/- 2SD. Points outside of +/- 2.5SD are labeled for investigation. Day refers to the date in Apr.

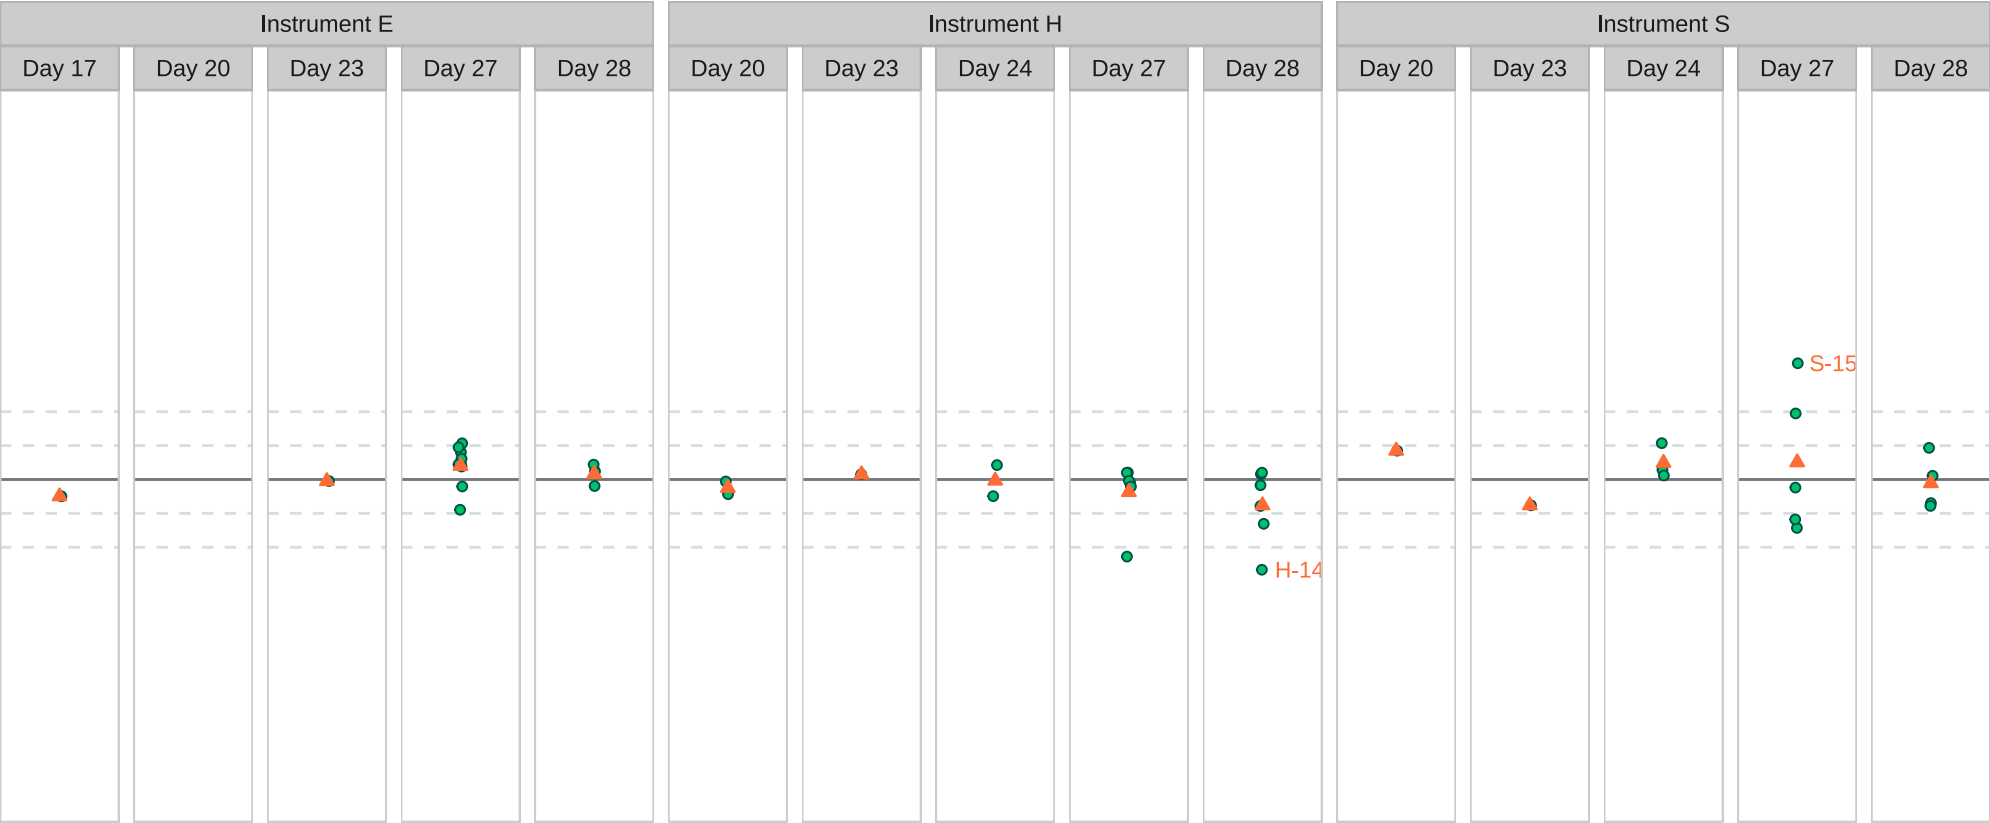

# LAC-Control L

Individual measurements shown in green, mean of day in poppy triangles. Grey line shows global mean, with dashed lines as +/- 2SD. Points outside of +/- 2.5SD are labeled for investigation. Day refers to the date in Apr.

# LAC-Control M

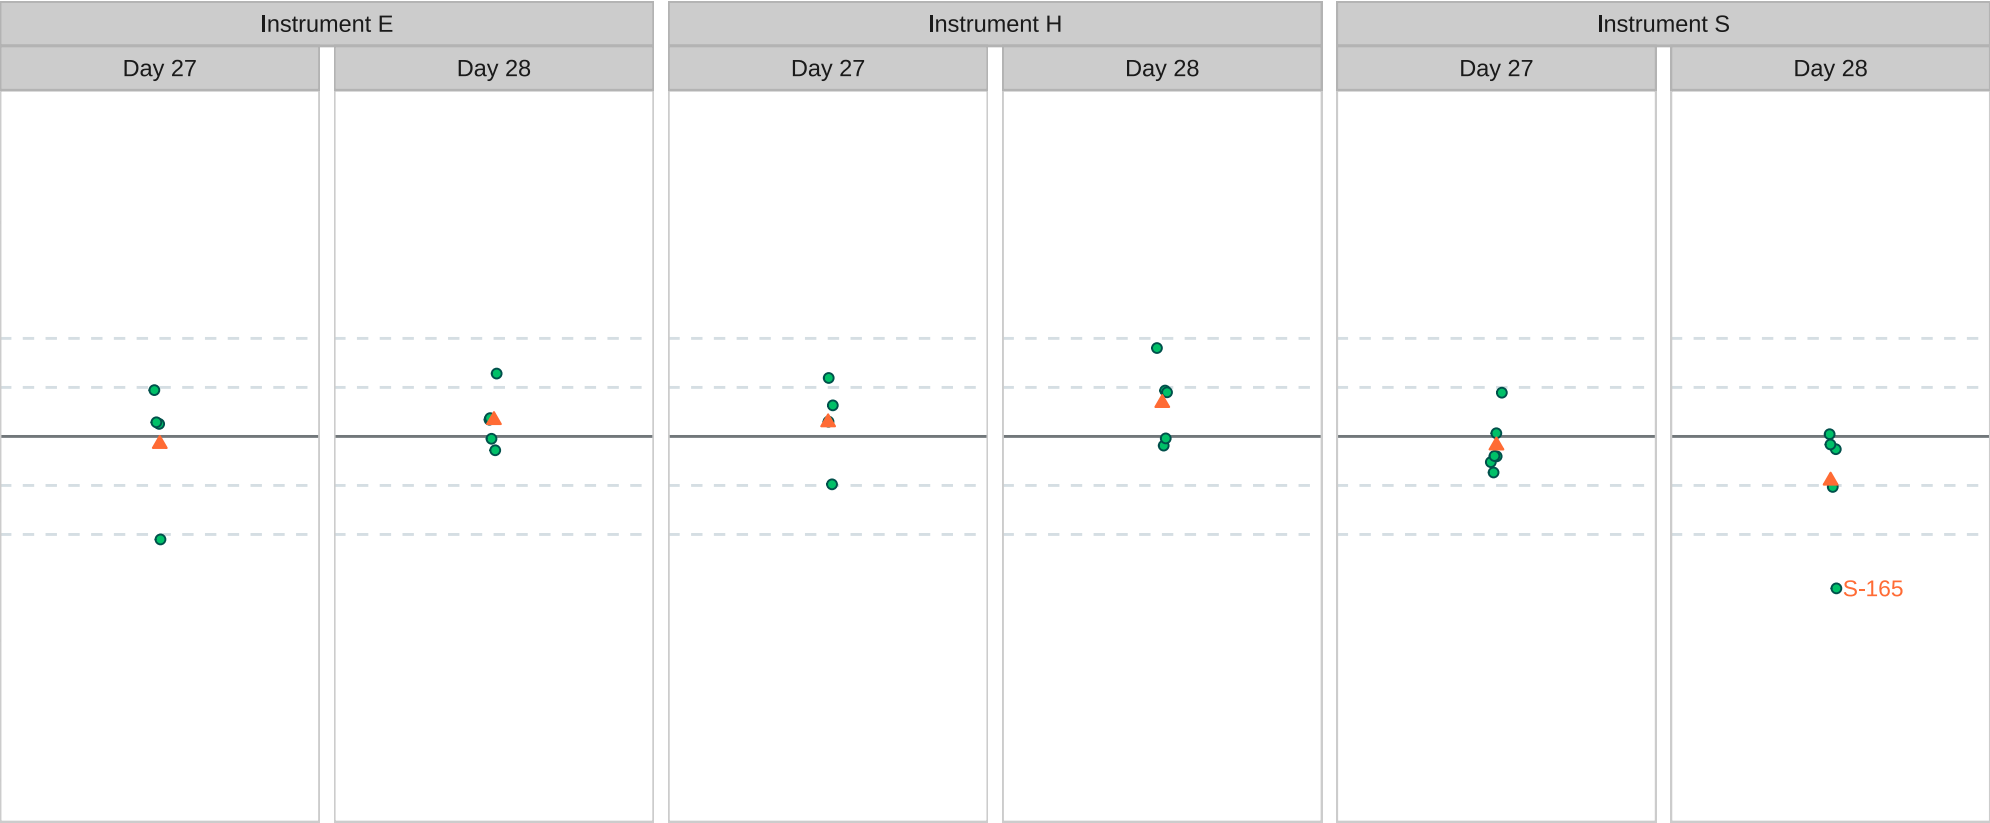

Individual measurements shown in green, mean of day in poppy triangles. Grey line shows global mean, with dashed lines as +/- 2SD. Points outside of +/- 2.5SD are labeled for investigation. Day refers to the date in Apr.

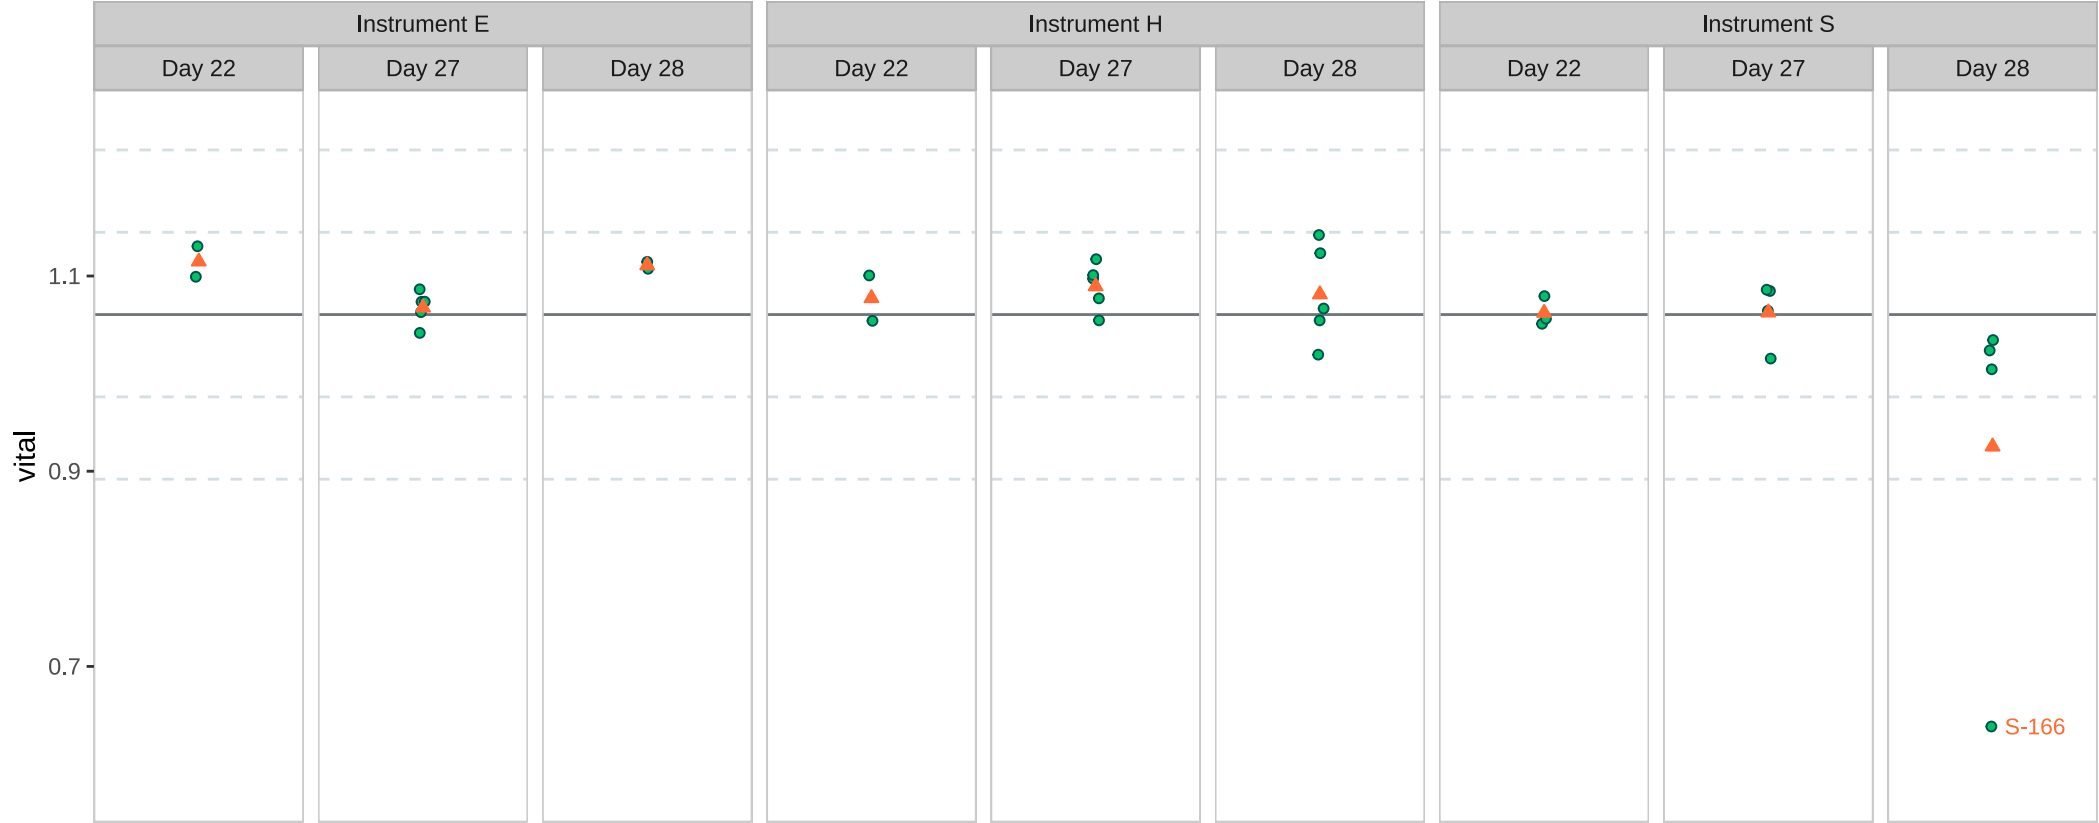

# Mg-Control H

Individual measurements shown in green, mean of day in poppy triangles. Grey line shows global mean, with dashed lines as +/- 2SD. Points outside of +/- 2.5SD are labeled for investigation. Day refers to the date in Apr.

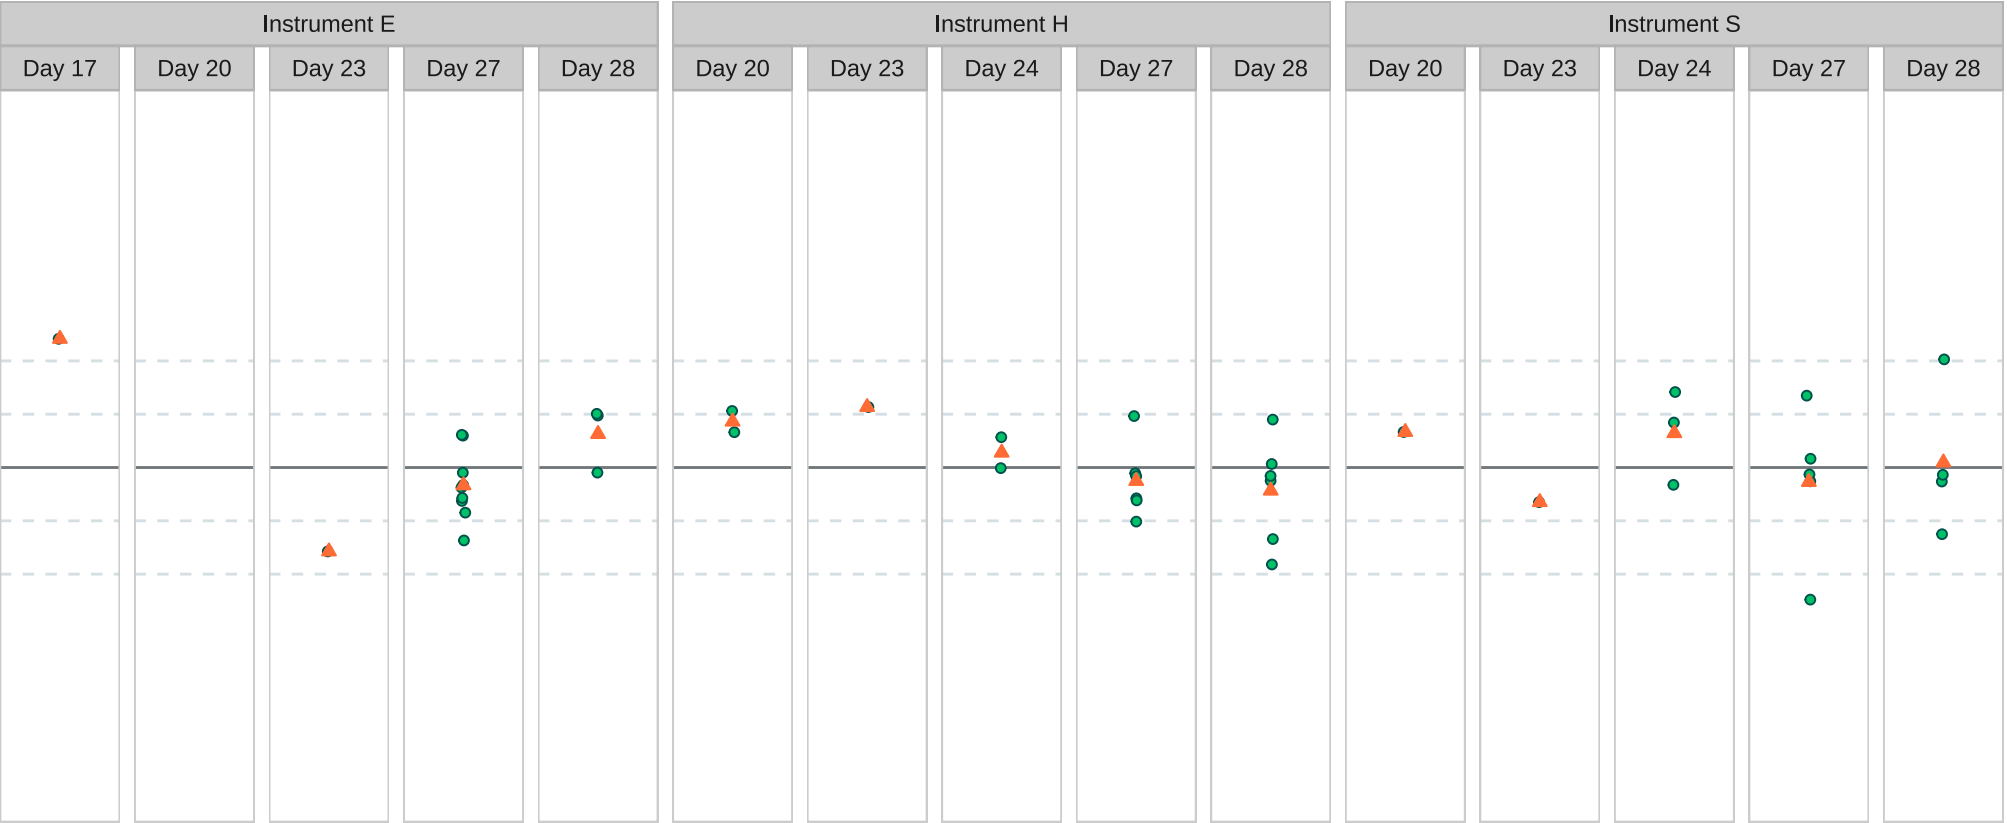

# Mg-Control L

Individual measurements shown in green, mean of day in poppy triangles. Grey line shows global mean, with dashed lines as +/- 2SD. Points outside of +/- 2.5SD are labeled for investigation. Day refers to the date in Apr.

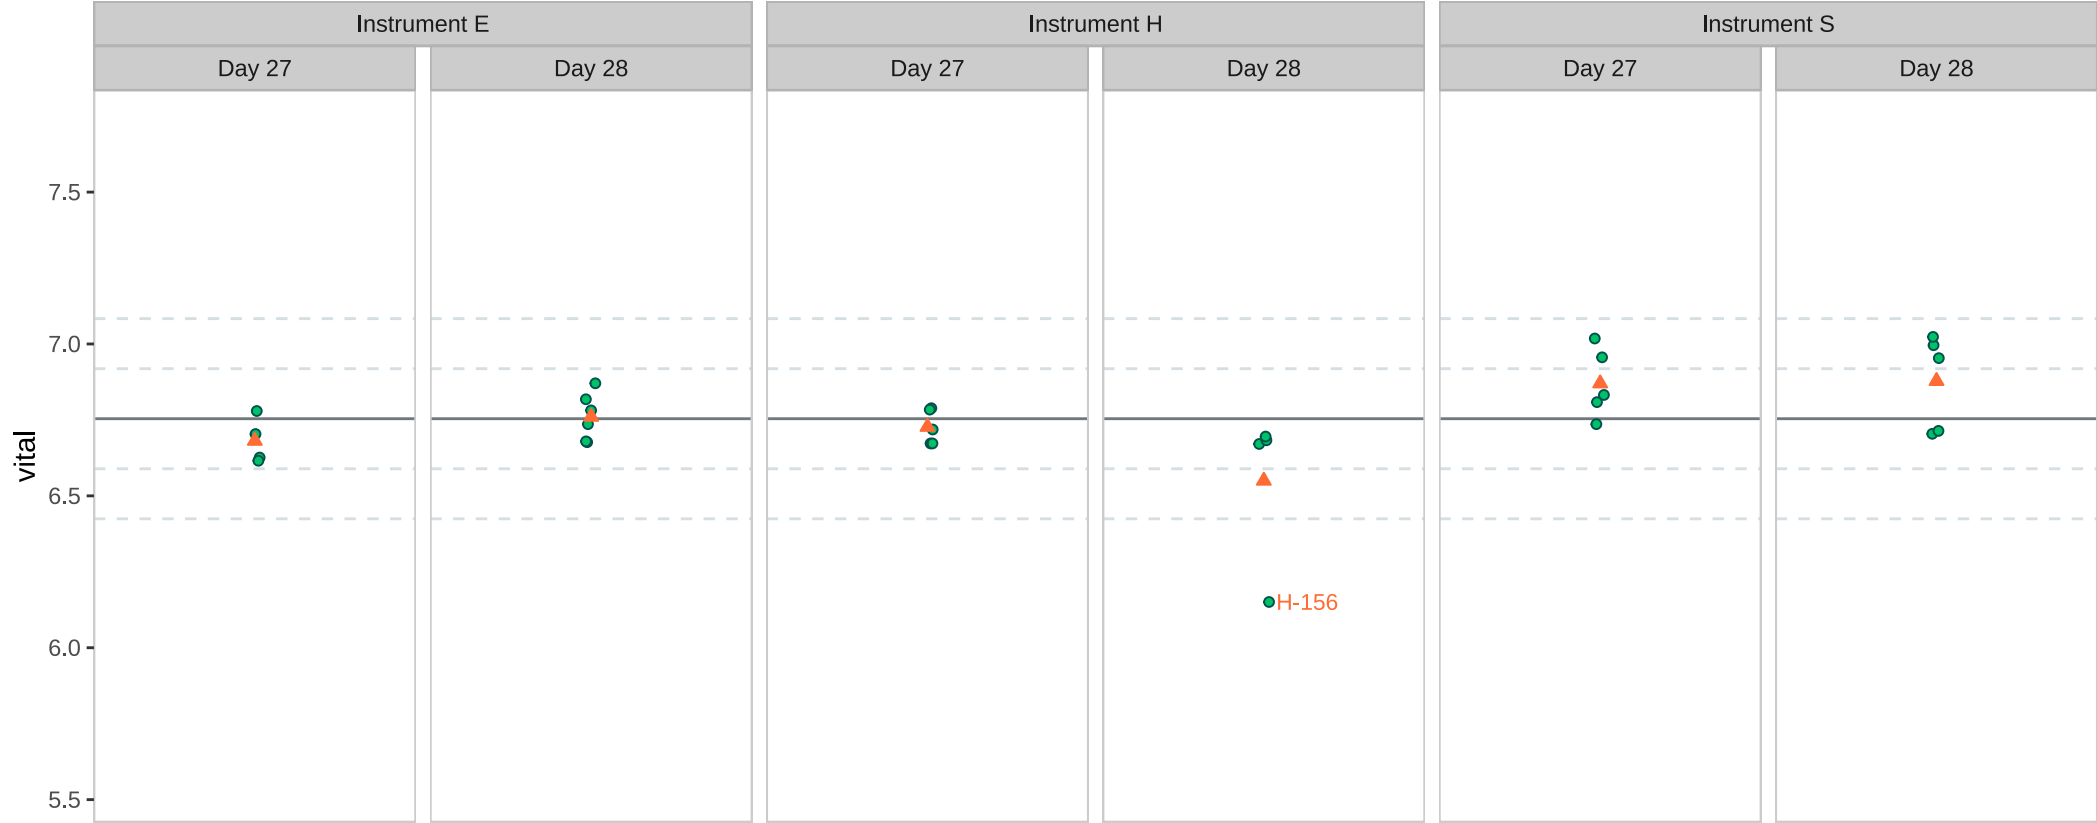

# Mg-Control M

Individual measurements shown in green, mean of day in poppy triangles. Grey line shows global mean, with dashed lines as +/- 2SD. Points outside of +/- 2.5SD are labeled for investigation. Day refers to the date in Apr.

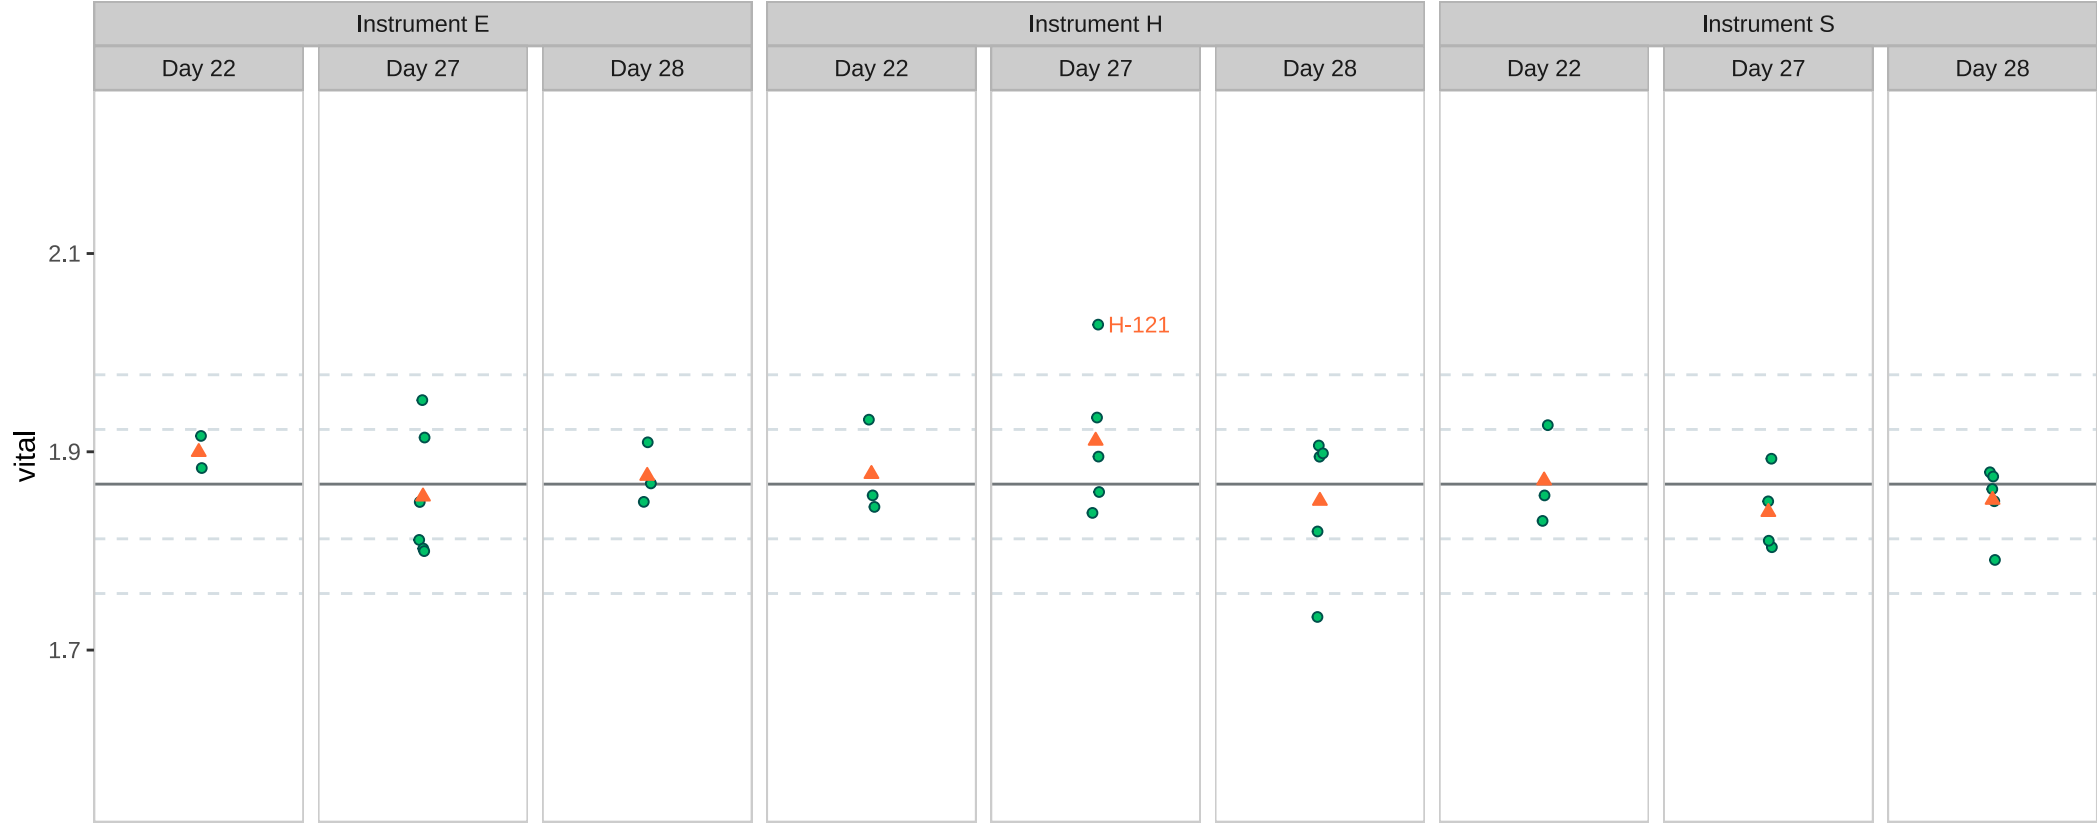

# PHOS-Control H

Individual measurements shown in green, mean of day in poppy triangles. Grey line shows global mean, with dashed lines as +/- 2SD. Points outside of +/- 2.5SD are labeled for investigation. Day refers to the date in Apr.

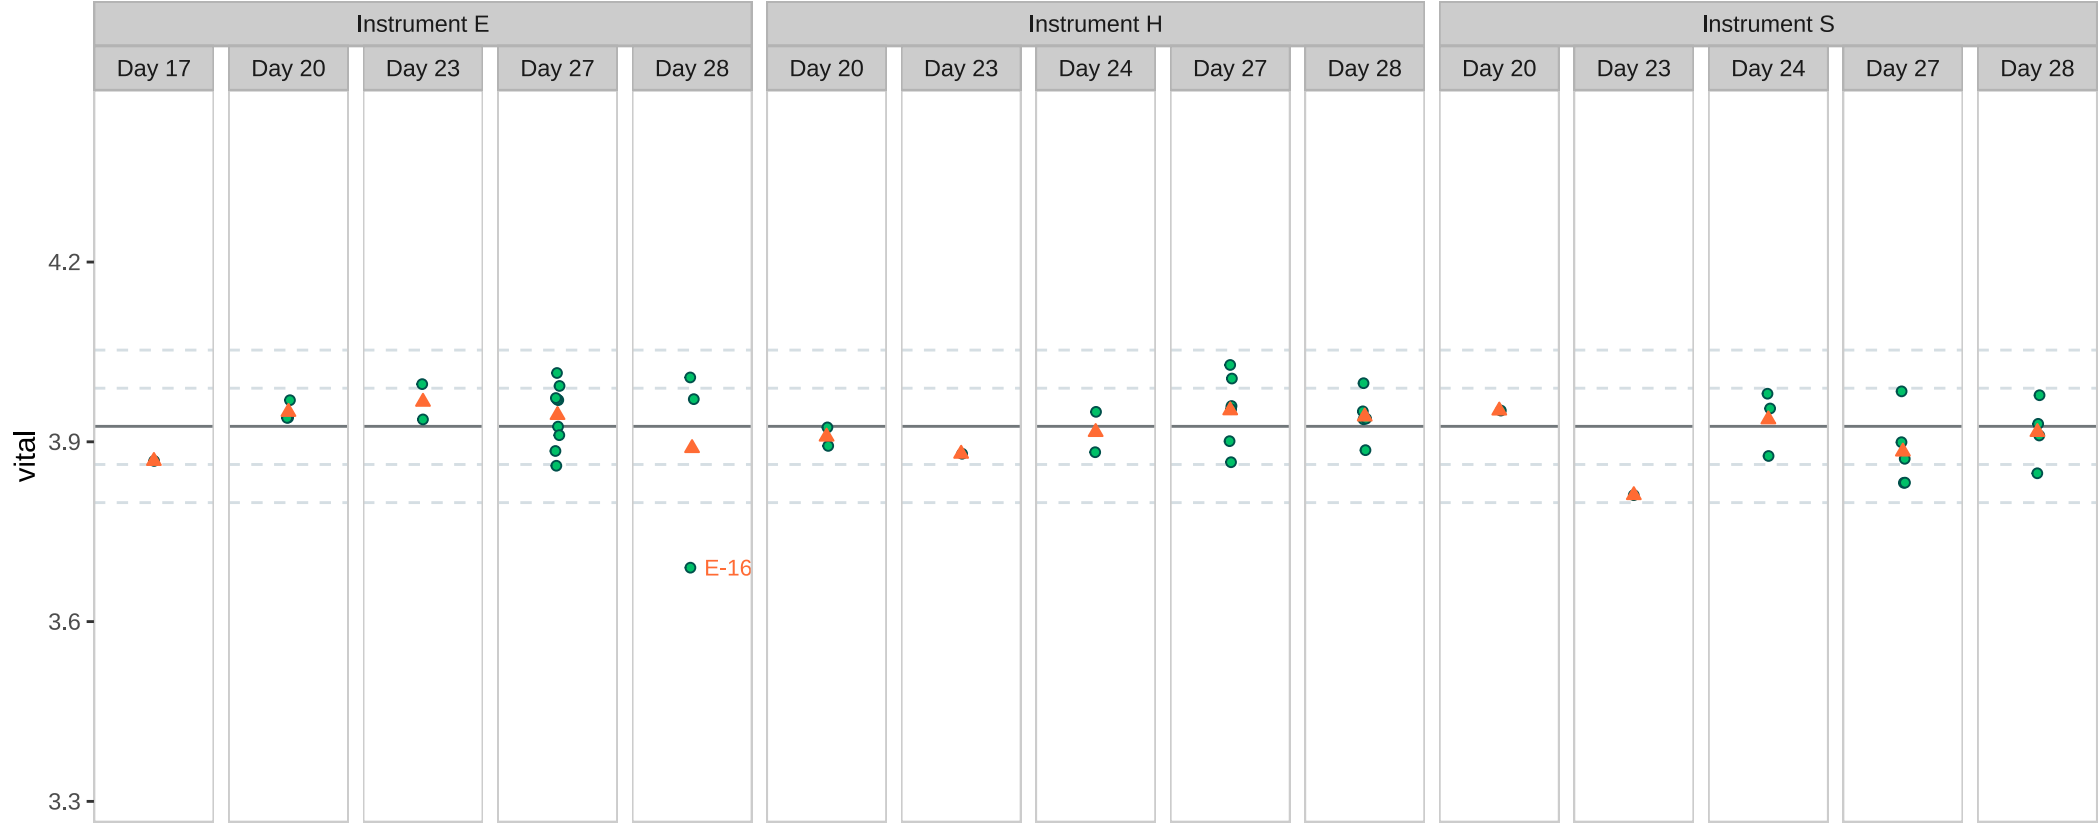

# PHOS-Control L

Individual measurements shown in green, mean of day in poppy triangles. Grey line shows global mean, with dashed lines as +/- 2SD. Points outside of +/- 2.5SD are labeled for investigation. Day refers to the date in Apr.

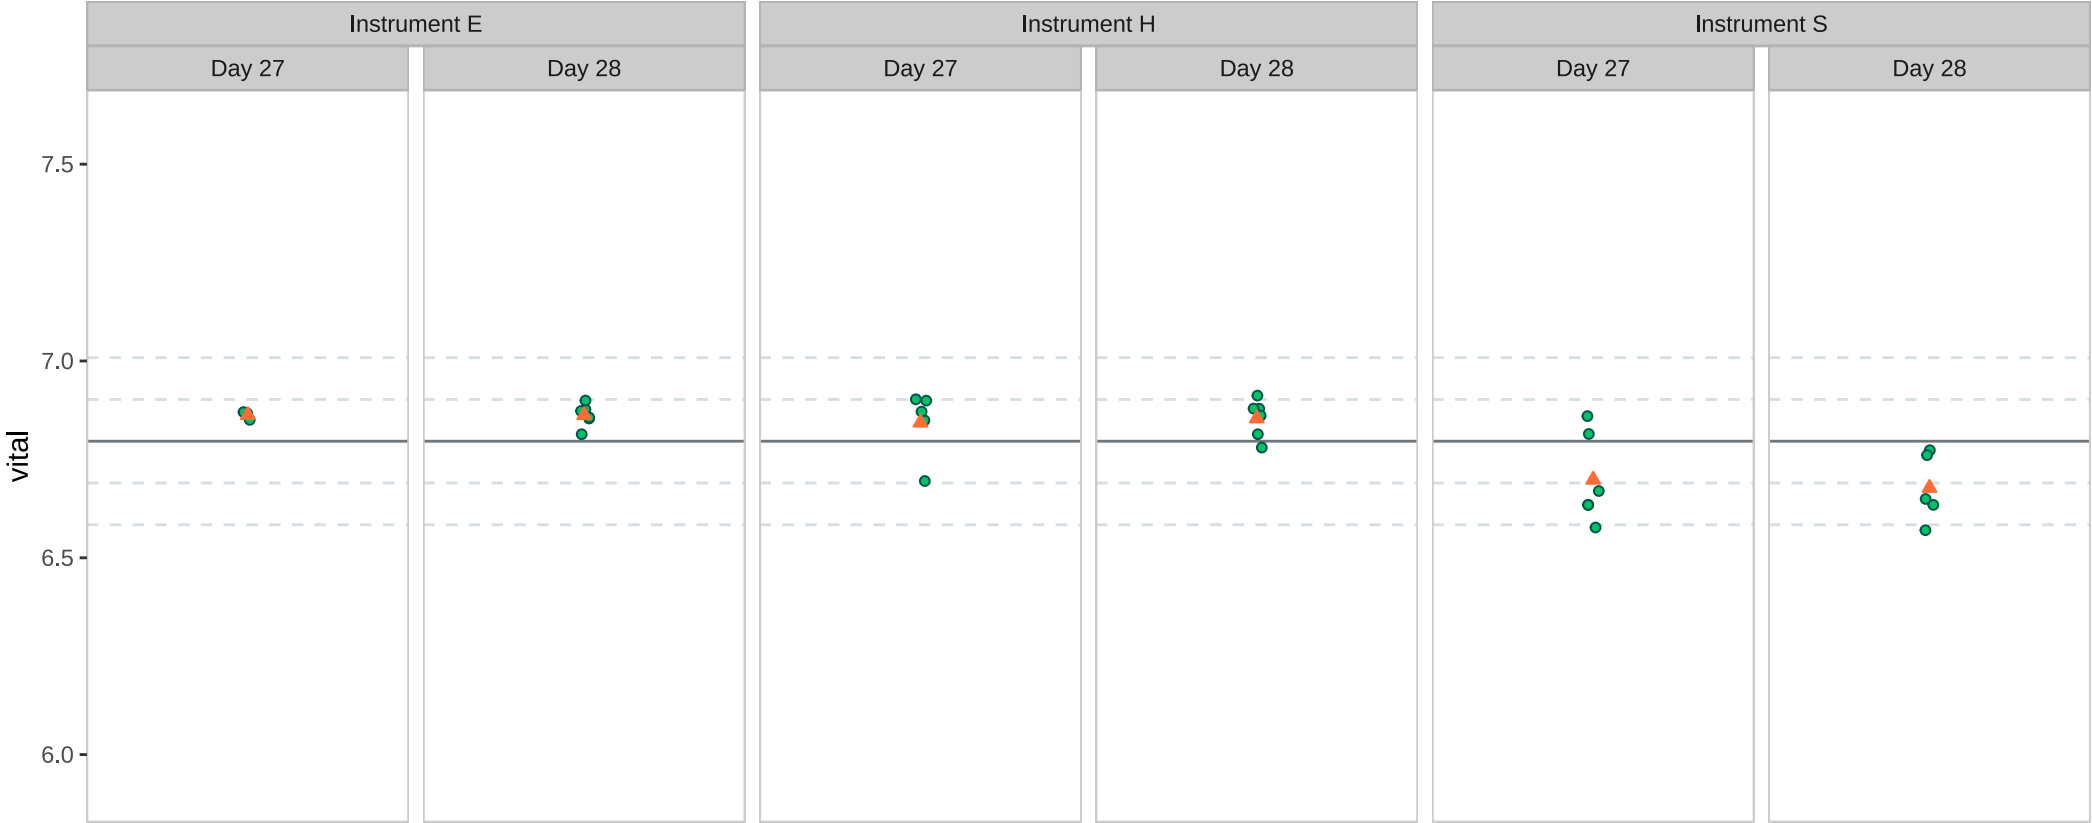

# PHOS-Control M

Individual measurements shown in green, mean of day in poppy triangles. Grey line shows global mean, with dashed lines as +/- 2SD. Points outside of +/- 2.5SD are labeled for investigation. Day refers to the date in Apr.

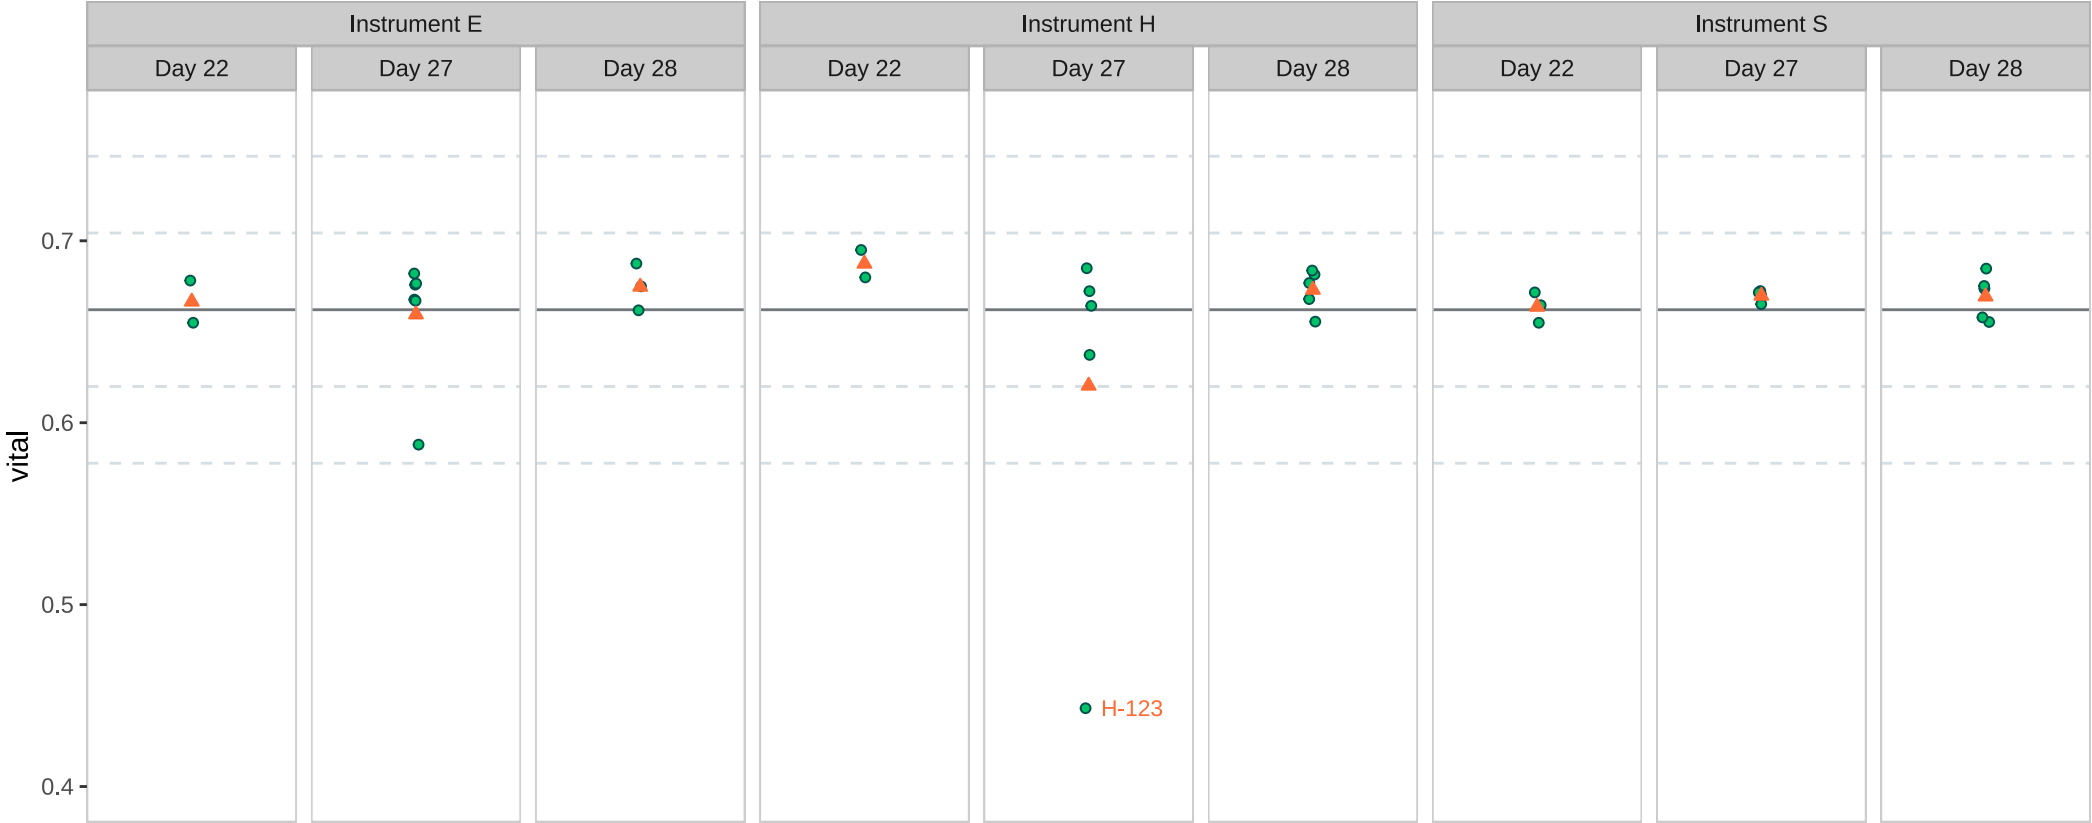

# TBIL-Control H

Individual measurements shown in green, mean of day in poppy triangles. Grey line shows global mean, with dashed lines as +/- 2SD. Points outside of +/- 2.5SD are labeled for investigation. Day refers to the date in Apr.

# TBIL-Control L

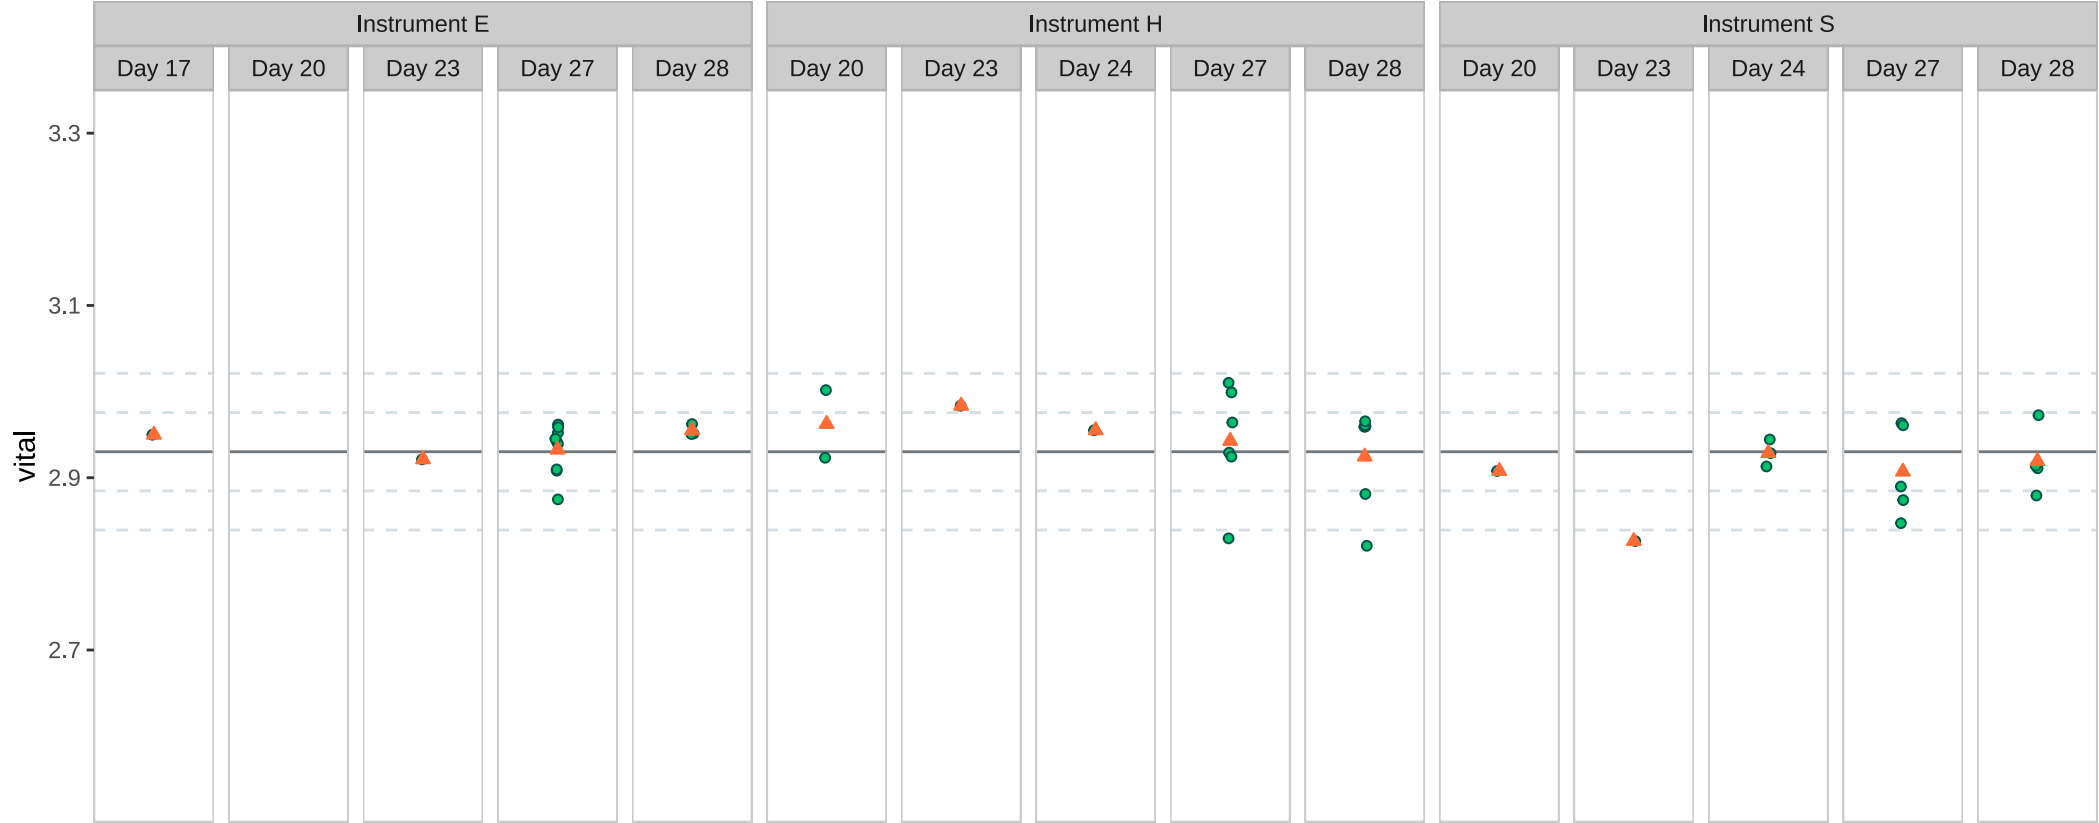

Individual measurements shown in green, mean of day in poppy triangles. Grey line shows global mean, with dashed lines as +/- 2SD. Points outside of +/- 2.5SD are labeled for investigation. Day refers to the date in Apr.

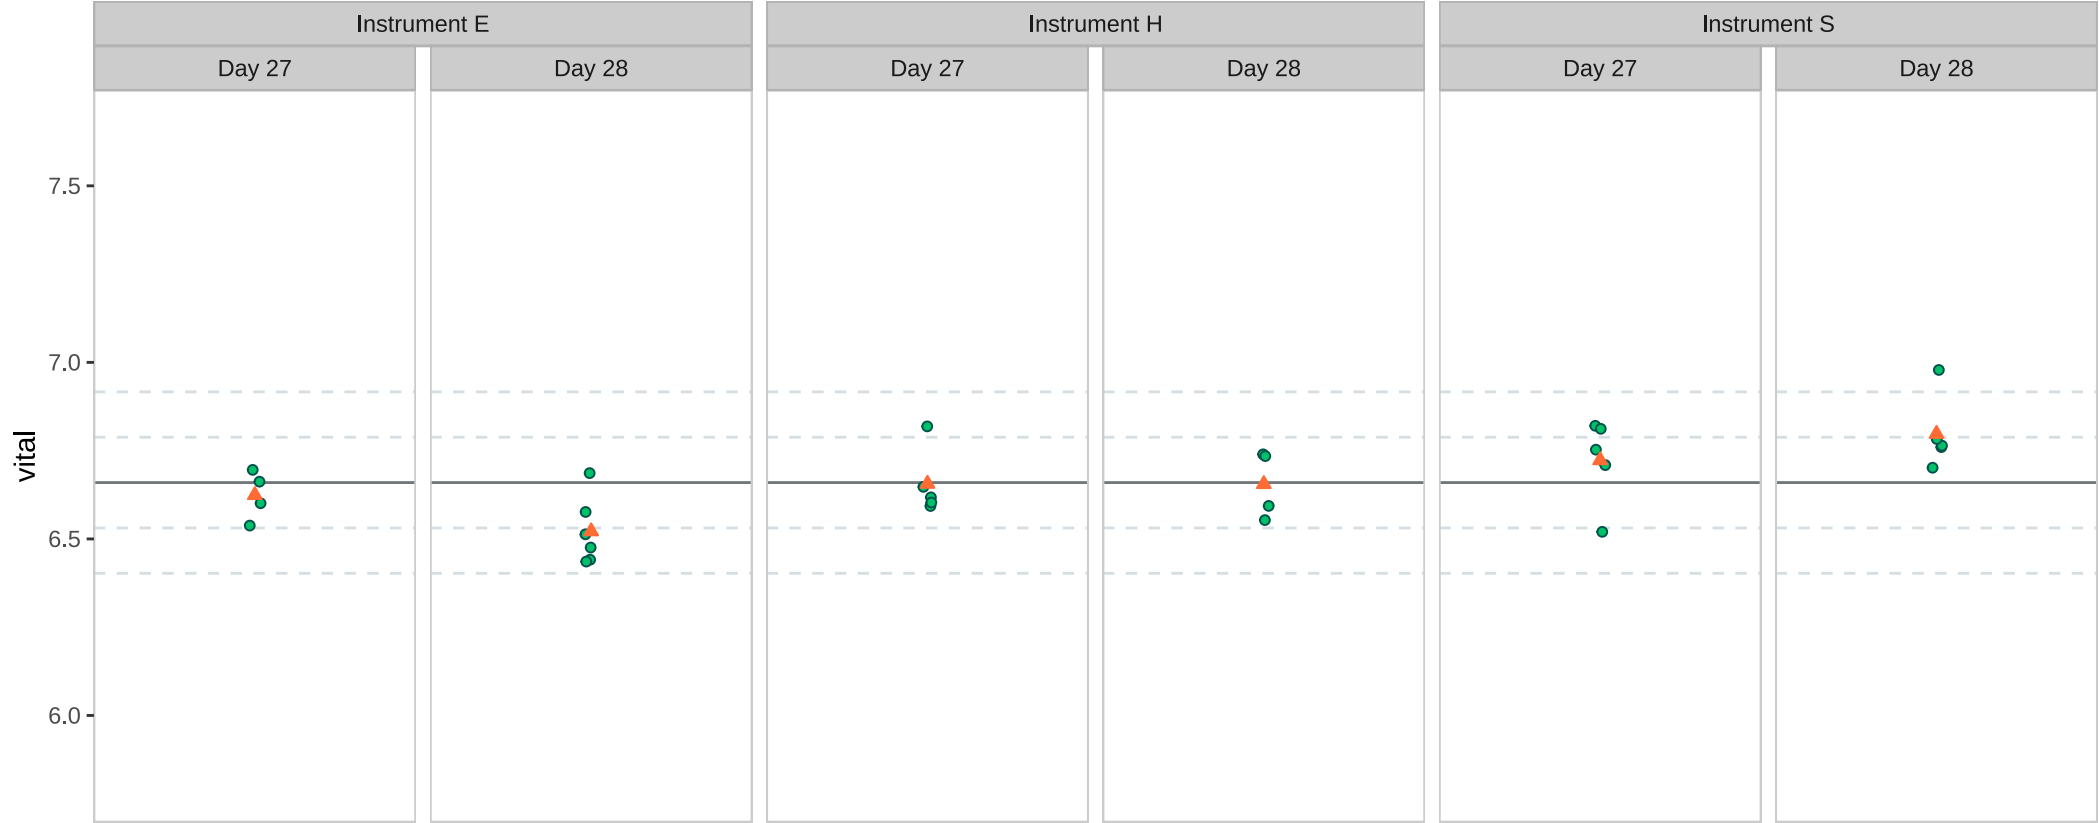

# TBIL-Control M

Individual measurements shown in green, mean of day in poppy triangles. Grey line shows global mean, with dashed lines as +/- 2SD. Points outside of +/- 2.5SD are labeled for investigation. Day refers to the date in Apr.

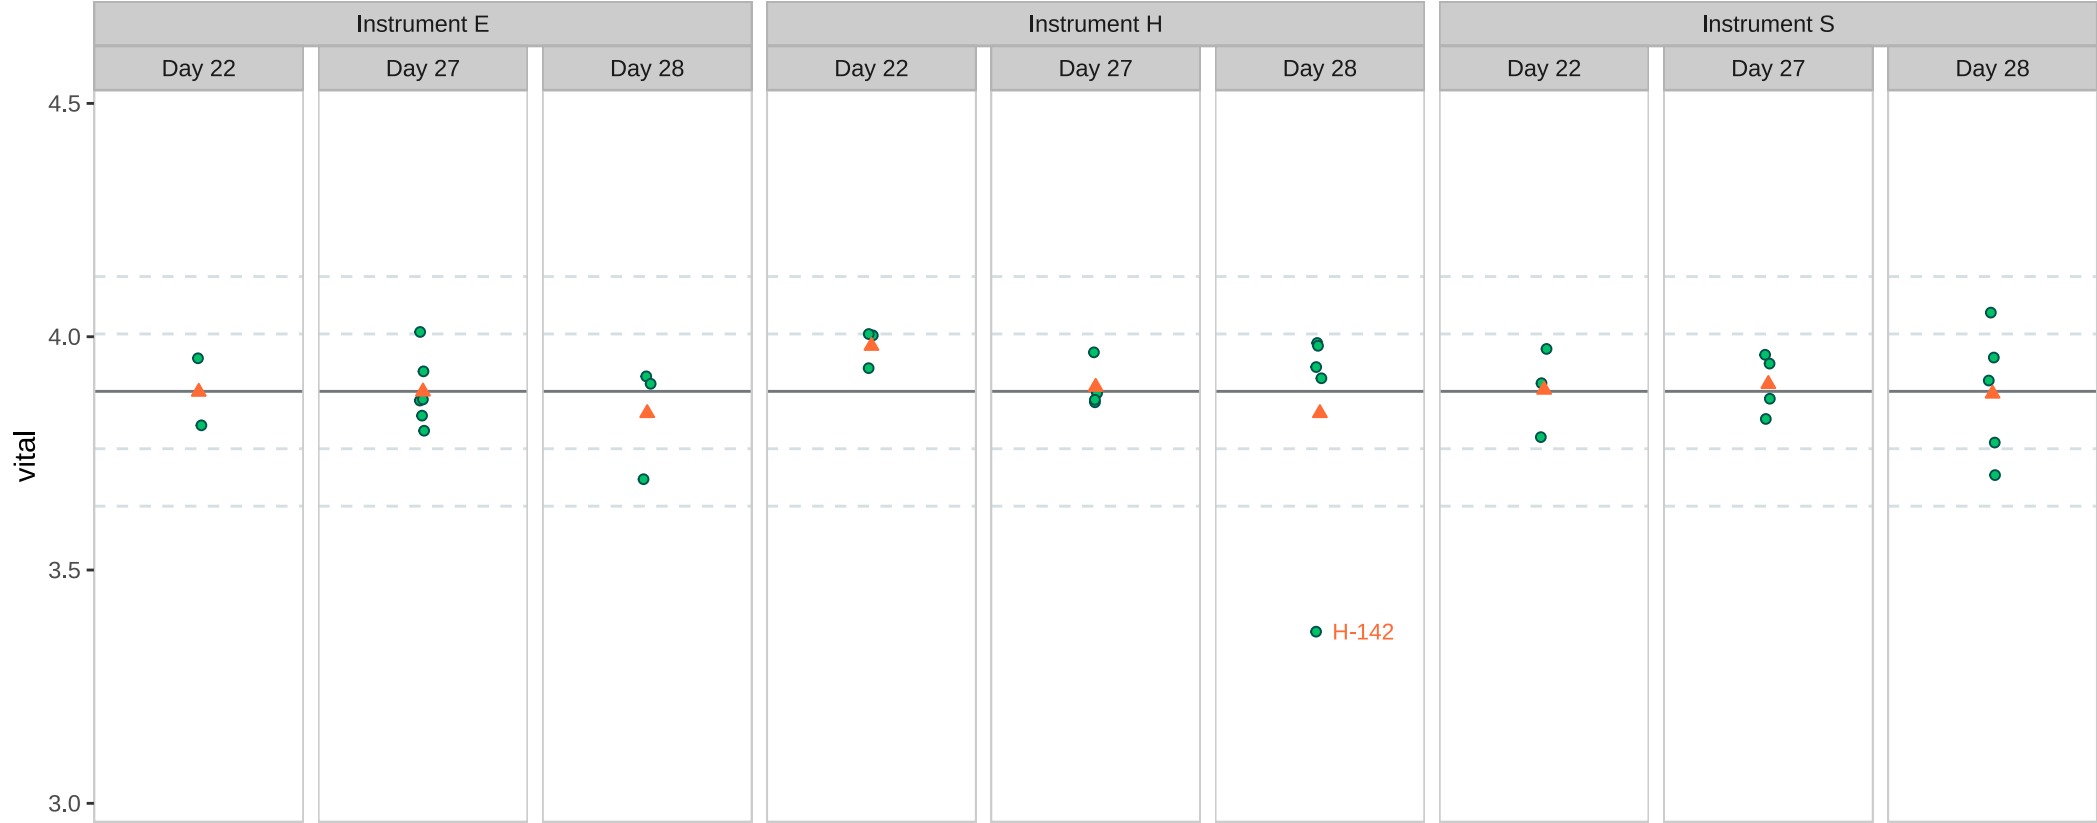

# TP-Control H

Individual measurements shown in green, mean of day in poppy triangles. Grey line shows global mean, with dashed lines as +/- 2SD. Points outside of +/- 2.5SD are labeled for investigation. Day refers to the date in Apr.

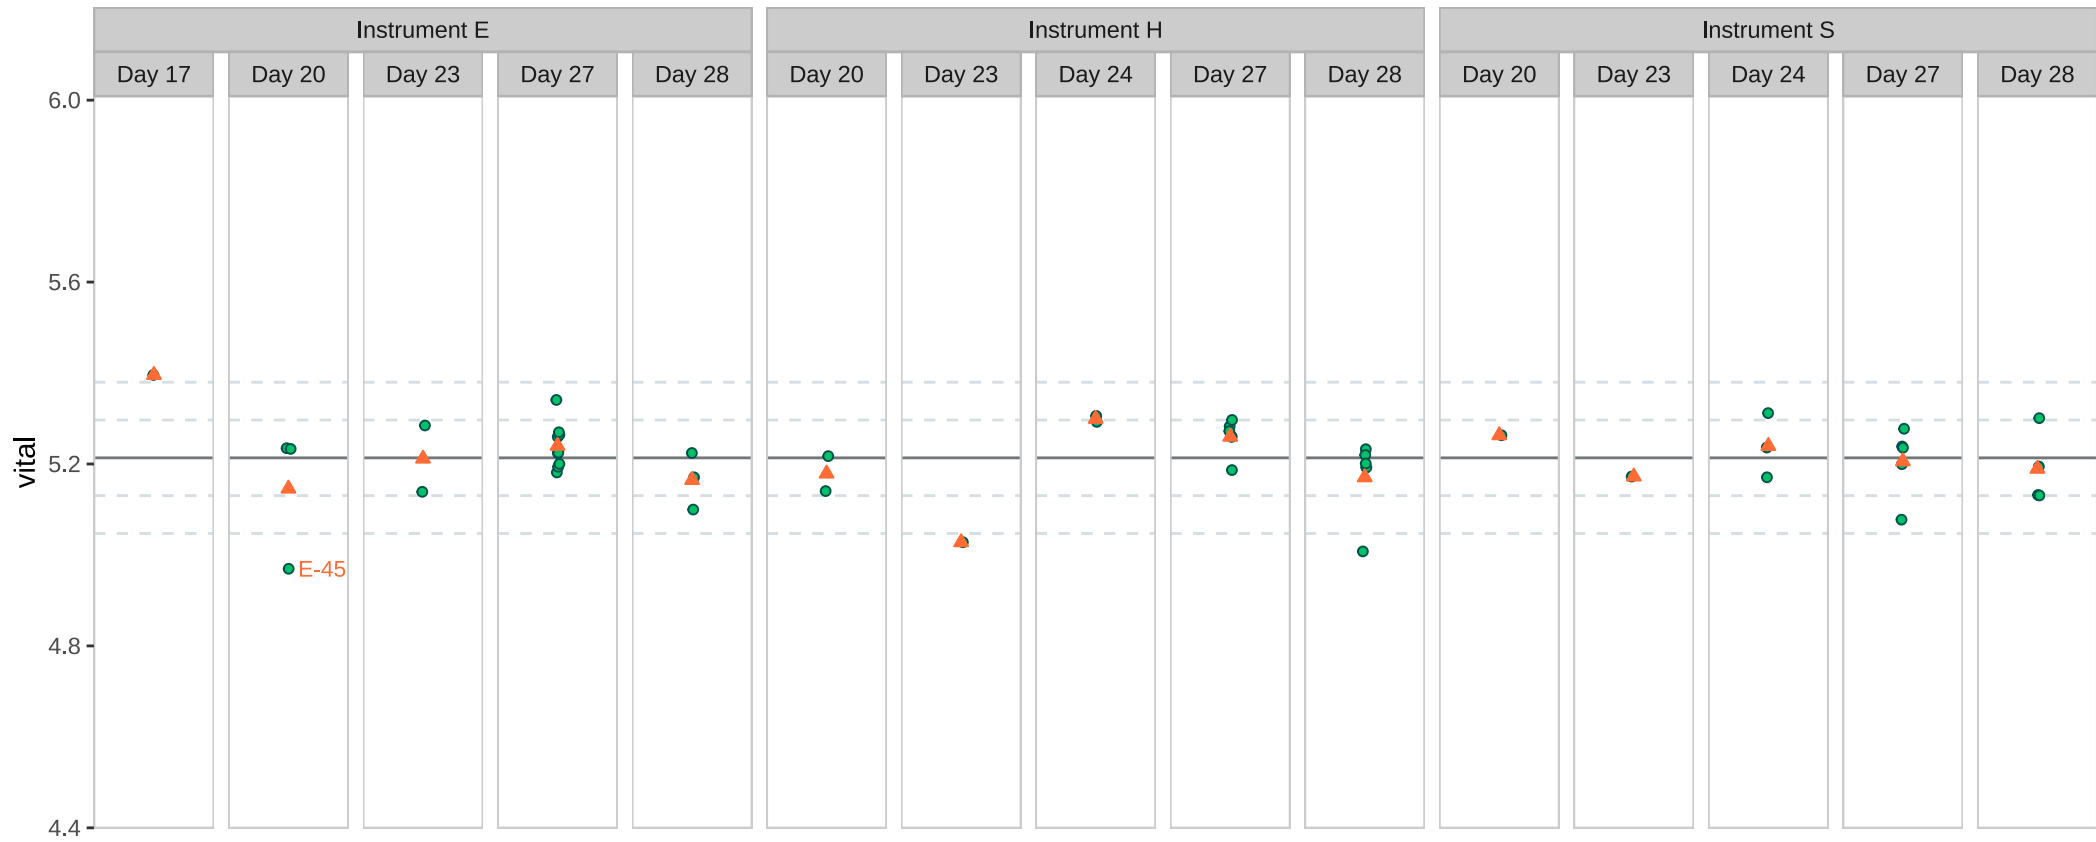

# TP-Control L

Individual measurements shown in green, mean of day in poppy triangles. Grey line shows global mean, with dashed lines as +/- 2SD. Points outside of +/- 2.5SD are labeled for investigation. Day refers to the date in Apr.

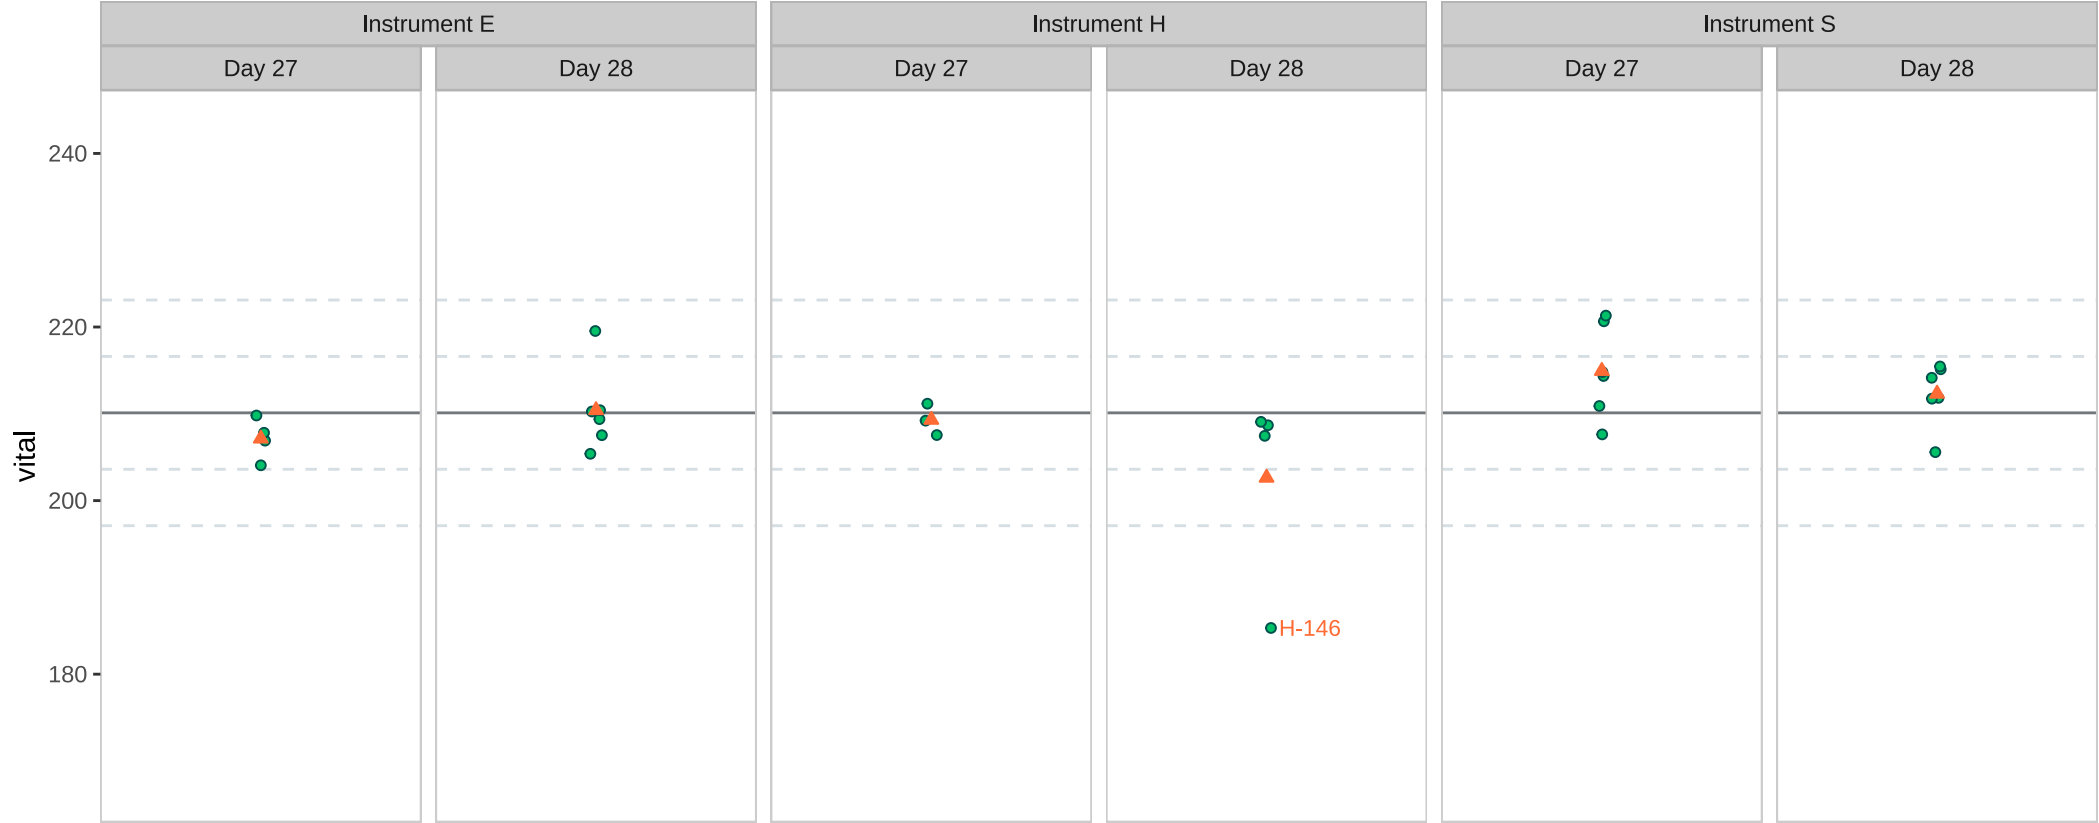

# TP-Control M

Individual measurements shown in green, mean of day in poppy triangles. Grey line shows global mean, with dashed lines as  $\pm 2SD$ . Points outside of  $\pm 2.5SD$  are labeled for investigation. Day refers to the date in Apr.

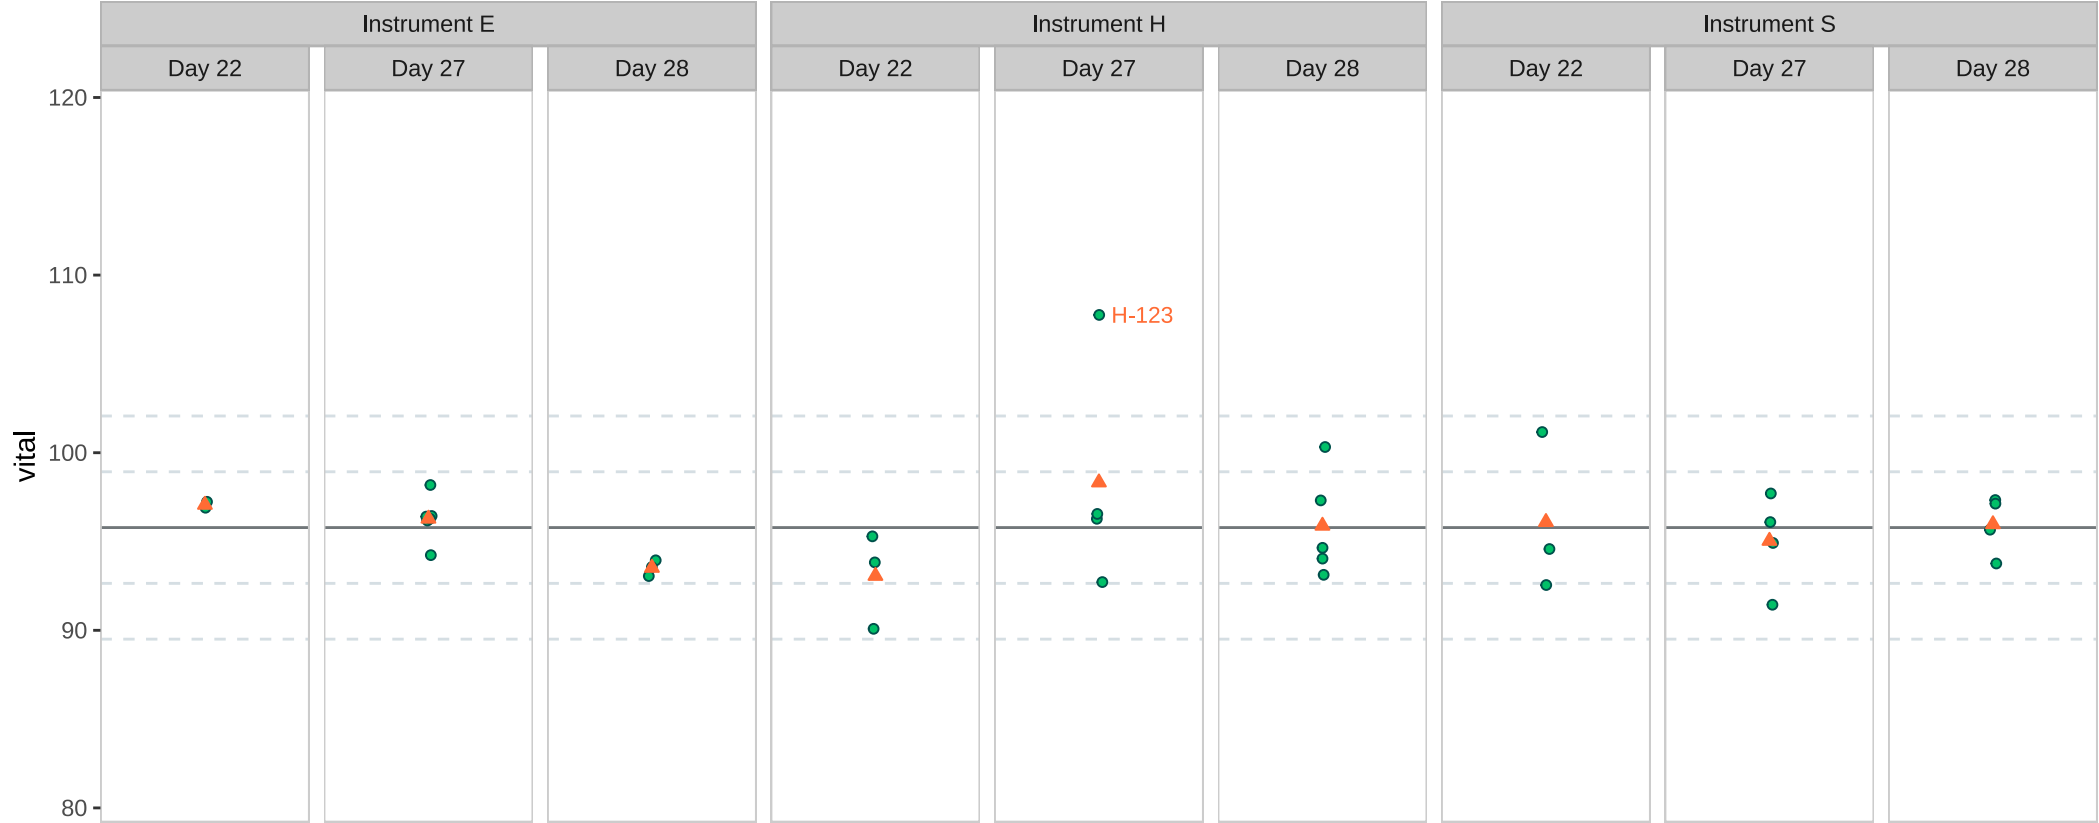

# TRIG-Control H

Individual measurements shown in green, mean of day in poppy triangles. Grey line shows global mean, with dashed lines as +/- 2SD. Points outside of +/- 2.5SD are labeled for investigation. Day refers to the date in Apr.

# TRIG-Control L

Individual measurements shown in green, mean of day in poppy triangles. Grey line shows global mean, with dashed lines as +/- 2SD. Points outside of +/- 2.5SD are labeled for investigation. Day refers to the date in Apr.

# TRIG-Control M

Individual measurements shown in green, mean of day in poppy triangles. Grey line shows global mean, with dashed lines as  $\pm 2SD$ . Points outside of  $\pm 2.5SD$  are labeled for investigation. Day refers to the date in Apr.
